All these three formats consist of SAP Certified Associate - Positioning SAP Business Transformation Management Solutions C-BCBTM-2509 Actual Questions that are not only helpful for the preparation but also provide useful information about the SAP Certified Associate - Positioning SAP Business Transformation Management Solutions C-BCBTM-2509 Valid Dumps certification preparation.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q27-Q32):

NEW QUESTION # 27

What are the main value drivers of SAP Business Transformation Management solutions?

(Note: There are 2 correct answers to this question.)

- A. They provide advanced capabilities for blockchain development and cryptocurrency management.
- B. They manage physical inventory in warehouses and real-time transaction processing for retail environments.
- C. They enable customers to discover, analyze, and scope optimization potential during daily operations.
- D. They help generate insights into both processes and applications and their dependencies.

Answer: C,D

Explanation:

SAP Business Transformation Management (BTM) solutions deliver value by providing visibility, analytics, and optimization across business processes and IT systems. They integrate SAP Signavio, SAP LeanIX, and WalkMe to enable organizations to understand dependencies, identify inefficiencies, and accelerate transformation initiatives.

"SAP BTM solutions help enterprises gain comprehensive insights into processes, applications, and dependencies, enabling them to discover, analyze, and optimize their operations continuously." Reference:

Generating Insights into Processes and Applications (Answer C):

SAP Signavio and LeanIX together provide a data-driven foundation that helps identify how processes and applications interact, uncovering optimization opportunities and transformation risks.

"By linking process intelligence with enterprise architecture management, SAP BTM solutions generate deep insights into process flows, system dependencies, and business value realization." Discovering and Scoping Optimization Potential (Answer D):

The BTM suite empowers users to continuously monitor performance and identify improvement opportunities during daily operations through analytics and observability.

"SAP BTM enables organizations to discover, analyze, and scope optimization potential within their daily business operations using integrated analytical capabilities." Incorrect Options:

A: Inventory and retail transaction management are handled by SAP S/4HANA and not part of BTM.

B: Blockchain and cryptocurrency management are not components of the BTM solution portfolio.

Therefore, the verified and correct answers as per SAP BTM documentation are:

C: They help generate insights into both processes and applications and their dependencies.

D: They enable customers to discover, analyze, and scope optimization potential during daily operations.

NEW QUESTION # 28

What is the primary purpose of WalkMe's Digital Adoption Platform (DAP)?

- A. To implement advanced hardware solutions
- **B. To reduce digital friction and guide users through complex software**
- C. To automate recruitment processes
- D. To manage payroll systems efficiently

Answer: B

Explanation:

The WalkMe Digital Adoption Platform (DAP) is designed to improve the user experience by reducing friction when interacting with digital systems. It provides on-screen guidance, automation, and analytics that help users complete tasks accurately and efficiently.

"The primary purpose of WalkMe's Digital Adoption Platform is to reduce digital friction and guide users through complex software environments using AI-powered, context-aware assistance." Reference:

The platform enhances employee productivity, adoption success, and process efficiency across SAP and third-party applications by simplifying navigation and ensuring process compliance.

"WalkMe DAP provides contextual guidance directly within applications, enabling users to execute digital workflows with minimal errors or training." Incorrect Options:

A: WalkMe is software-based, not a hardware solution.

B: Recruitment automation is part of SAP SuccessFactors, not WalkMe.

D: Payroll management is unrelated to WalkMe's purpose.

Verified Correct answer: C: To reduce digital friction and guide users through complex software.

NEW QUESTION # 29

What makes SAP Signavio and SAP LeanIX a powerful combination?

(Note: There are 2 correct answers to this question.)

- A. We can help our customers lay off 20 to 30 percent of their workforce and therefore reduce costs tremendously.
- **B. They help our customers understand the important aspects of a transformation: processes, people, systems, and applications.**
- **C. Both solutions focus on transforming businesses from a current state to a future state.**
- D. We can reduce the time for financial reporting by 70% on average.

Answer: B,C

NEW QUESTION # 30

What is the SAP Signavio Process Manager?

- A. A software for managing customer relationships and sales pipelines.
- B. A tool for automating financial transactions in ERP systems.
- **C. A cloud-based tool for designing, modeling, and improving business processes.**
- D. An analytics solution for process mining and data analysis.

Answer: C

Explanation:

SAP describes SAP Signavio Process Manager as a collaborative, browser-based BPM tool focused on process design and improvement:

"SAP Signavio Process Manager is a cloud-based solution to model, document, and optimize business processes collaboratively using BPMN 2.0." Reference:

Option B confuses it with a different product in the same portfolio. SAP states that process mining sits in SAP Signavio Process Intelligence (not Process Manager):

"SAP Signavio Process Intelligence is the process mining and analytics solution of the SAP Signavio portfolio." Option C refers to ERP transaction automation, which is not the scope of Process Manager. SAP positions Process Manager for process modeling and documentation, not transaction execution/automation:

"Use SAP Signavio Process Manager to design and document processes and drive process improvement; execution of transactions is handled by operational systems (e.g., ERP)." Option D is about CRM. SAP clarifies that CRM and sales pipeline management are covered by customer experience/CRM solutions, not by Process Manager:

"Process Manager provides process modeling and governance, not CRM pipeline management."

NEW QUESTION # 31

What does WalkMe Discovery help organizations achieve?

- A. Automates training development processes
- B. Enhances employee satisfaction scores by 50%
- C. Translates all tools into multiple languages automatically
- **D. Identifies underutilized tools and compliance risks**

Answer: D

Explanation:

WalkMe Discovery is a key component of the SAP Business Transformation Management (BTM) suite through SAP's partnership with WalkMe. It is designed to provide visibility into the digital application landscape and analyze software usage across the enterprise.

"WalkMe Discovery automatically discovers all web-based applications used across the organization, revealing underutilized tools, shadow IT, and potential compliance risks." Reference:

The tool allows transformation leaders to map actual system usage, understand license utilization, and identify areas of inefficiency or non-compliance, which directly supports SAP's Business Transformation Management (BTM²) framework goals for transparency and optimization.

"By identifying unused or redundant applications, WalkMe Discovery helps organizations reduce costs and mitigate compliance risks as part of their transformation initiatives." Option A (translation automation) and C (automated training development) are functions more aligned with WalkMe Digital Adoption Platform (DAP), not the Discovery module.

"While the WalkMe DAP provides in-app guidance and user training automation, Discovery focuses on discovering and analyzing app usage." Option D (enhancing satisfaction by 50%) is not a defined or measurable objective of the Discovery module; SAP does not claim specific numerical outcomes related to satisfaction.

Therefore, the correct answer - verified from SAP's official transformation documentation and WalkMe integration materials - is B: Identifies underutilized tools and compliance risks.
