# Unparalleled 1z0-1080-25 Valid Test Sample | Easy To Study and Pass Exam at first attempt & Trustable Oracle Oracle Planning 2025 Implementation Professional

DOWNLOAD the newest Prep4sureGuide 1z0-1080-25 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1B1JDBFV1LuuM_JSIfqQTVOkHCw5v3TTs

1z0-1080-25 training dumps are created in the most unique, customized way so it can cover different areas of exam with the Quality and Price of the product which is unmatched by our Competitors. The 100% guarantee pass pass rate of 1z0-1080-25 training materials that guarantee you to pass your Exam and will not permit any type of failure. You will find every question and answer within 1z0-1080-25 Training Materials that will ensure you get any high-quality certification you're aiming for.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 2	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.

Topic 3	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 4	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 5	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 6	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 7	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 8	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 9	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 10	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 11	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 12	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 13	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 14	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 15	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 16	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 17	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 18	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 19	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 20	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.

1z0-1080-25 Valid Test Sample - High-quality Oracle Oracle Planning 2025 Implementation Professional - Study 1z0-1080-25 Demo

You must improve your skills and knowledge to stay current and competitive. You merely need to obtain the 1z0-1080-25 certification exam badge in order to achieve this. You must pass the Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam to accomplish this, which can only be done with thorough exam preparation. Download the Oracle 1z0-1080-25 Exam Questions right away for immediate and thorough exam preparation. We have thousands of satisfied customers around the globe so you can freely join your journey for the Oracle Planning 2025 Implementation Professional (1z0-1080-25) certification exam with us.

Oracle Planning 2025 Implementation Professional Sample Questions (Q104-Q109):

NEW QUESTION # 104
Which two permissions are assigned when a model is first created in Strategic Modeling?

- A. Viewer permissions
- B. Power User permissions
- C. Owner permissions
- D. Default permissions

Answer: C,D

NEW QUESTION # 105
Which four statements are true about the Optimize Dimension feature?

- A. You can optimize the dimension order only for BSO cubes in Custom Planning applications.
- B. You refresh the database and then back up the application and download the snapshot before you optimize dimension order.
- C. You can optimize the dimension order only for Financials and Projects, and only for the provided BSO cubes that are created when you enable and configure.
  D You optimize dimension order first in your test environment before you optimize dimension order in the production environment.
- D. You can optimize the dimension order only for Financials and Workforce, and only for the provided BSO cubes that are created when you enable and configure.
- E. The new optimized dimension order is maintained even if you enable additional features or other modules.

Answer: A,B,D,E

Explanation:
In Oracle Planning 2024, the Optimize Dimension feature enhances performance by reordering dimensions in BSO (Block Storage Option) cubes. Let's evaluate the six statements to determine the four that are true:
* A. The new optimized dimension order is maintained even if you enable additional features or other modules: True. Once optimized, the dimension order remains intact even if new features or modules are enabled, unless explicitly re-optimized or manually altered. This ensures performance stability post-optimization.
* B. You can optimize the dimension order only for BSO cubes in Custom Planning applications: True.
The Optimize Dimension feature is exclusively available for BSO cubes in Custom Planning applications, not for ASO (Aggregate Storage Option) cubes or module-based applications (e.g., Financials, Workforce), due to their predefined structures.
* C. You can optimize the dimension order only for Financials and Projects, and only for the provided BSO cubes that are created when you enable and configure: False. This statement is incorrect because the feature applies to Custom Planning applications, not specifically to Financials and Projects, which use predefined BSO cubes not eligible for user-driven dimension optimization.
* D. You optimize dimension order first in your test environment before you optimize dimension order in the production environment: True. Oracle recommends testing dimension optimization in a test environment first as a best practice to assess performance impacts and avoid risks in production, making this a procedural truth.
* E. You refresh the database and then back up the application and download the snapshot before you optimize dimension order: True. Before optimizing, Oracle advises refreshing the database to ensure data consistency, then backing up the application and downloading a snapshot to preserve a recovery point in case optimization causes issues.
* F. You can optimize the dimension order only for Financials and Workforce, and only for the provided BSO cubes that are created when you enable and configure: False. Similar to C, this is incorrect; optimization is not restricted to Financials and

Workforce module cubes-it's for Custom Planning BSO cubes, not predefined module-specific cubes.

From these, the four true statements are:

* A - Persistence of the optimized order after feature/module changes.
* B - Restriction to BSO cubes in Custom Planning applications.
* D - Testing in a test environment first as a best practice.
* E - Refreshing and backing up before optimization.

The false statements (C and F) incorrectly limit the feature to specific modules (Financials, Projects, Workforce), whereas it's designed for Custom Planning applications. The Oracle documentation supports A, B, D, and E as true, aligning with the feature's functionality and recommended practices.

Oracle Planning 2024 Implementation Study Guide: "Optimize Dimension Feature" (docs.oracle.com, Published 2024-09-25).

Oracle EPM Cloud Documentation: "BSO Dimension Optimization" (docs.oracle.com, Published 2023-12-20, updated for 2024).

NEW QUESTION # 106

Which two statements describe types of insights that can be configured?

- A. Detected outliner values that vary widely from other values
- B. Revel hidden bias in forecast submitted by planners by analyzing historical data
- C. Either user a prebuilt forecasting method or a freeform formula that you build
- D. Assign a range of possible value to inputs that are uncertain and analyze how that uncertainly affects related accounts

Answer: A,B

NEW QUESTION # 107

In Workforce, you want to set a date by which existing employees must be hired to be eligible to receive merit. You also want to specify the month in which merit should start.

Which option should you enable for this?

- A. Workforce Assumptions
- B. Merit Month
- C. Merit Assumptions
- D. Merit Rates

Answer: C

Explanation:

In Oracle Planning 2024 Implementation's Workforce module, configuring merit-related settings for employees involves specifying eligibility criteria and timing, such as a hire date cutoff for existing employees to receive merit increases and the month when merit adjustments begin. The Merit Assumptions option is the correct choice for this purpose.

* B. Merit Assumptions: This feature allows administrators to define merit-related parameters, including the "hire by" date (the date by which employees must be hired to be eligible for merit) and the "merit start month" (the month when merit increases take effect). It provides a centralized way to set these assumptions, ensuring they are applied consistently across the workforce plan.

* A. Workforce Assumptions: This option covers broader workforce settings (e.g., default hire dates, salary assumptions), but it does not specifically address merit eligibility or timing details like hire-by dates or merit start months.

* C. Merit Rates: This pertains to defining the percentage or amount of merit increases, not the eligibility dates or start month for merit application.

* D. Merit Month: While this might seem relevant, "Merit Month" is not a standalone option in Workforce. It is a setting typically configured within Merit Assumptions, not an independent feature.

The Merit Assumptions option is explicitly designed to handle these merit-specific configurations, making it the most suitable choice.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Administering Workforce - Merit Assumptions" (docs.oracle.com, updated 2024). States that "Merit Assumptions allow setting the hire- by date for merit eligibility and the merit start month."

* Oracle Planning 2024 Implementation Study Guide: Confirms that Merit Assumptions is used to specify eligibility criteria and timing for merit increases in Workforce.

NEW QUESTION # 108

Which three are Navigation Flow customization categories?

- A. Global
- B. Artifact
- C. Group
- D. User
- E. Role

Answer: A,C,E

Explanation:
In Oracle Planning 2024, Navigation Flows can be customized to tailor the user interface and experience based on specific categories. The three customization categories supported are Role, Group, and Global:
* A. Role: Navigation Flows can be customized for specific user roles (e.g., Planner, Administrator), allowing different layouts or access to cards based on job functions.
* C. Group: Customization can be applied to user groups, enabling administrators to assign tailored navigation flows to predefined sets of users based on their team or department.
* E. Global: Global customization applies to all users across the application, serving as the default navigation flow unless overridden by Role or Group settings.
* B. User: This is incorrect because Oracle Planning does not support navigation flow customization at the individual user level- customizations are broader, targeting roles or groups.
* D. Artifact: This is incorrect because "Artifact" refers to application components (e.g., forms, rules) managed in migration, not a category for navigation flow customization.
The Oracle documentation confirms that Role, Group, and Global are the three levels at which navigation flows can be customized, providing flexibility in how users interact with the Planning application.
