Consistent practice with it relieves exam stress and boosts self-confidence. The web-based Workday Pro HCM Reporting Certification Exam (Workday-Pro-HCM-Reporting) practice exam does not require additional software installation. All operating systems also support this Workday Pro HCM Reporting Certification Exam (Workday-Pro-HCM-Reporting) practice test.

Workday Pro HCM Reporting Certification Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49

A report writer needs to create a report and wants to ensure they are using a data source that provides optimized performance on large volumes of data they will generate.

What type of data source should the report writer use for the required data set?

- **A. Indexed**
- B. Trended
- C. Standard
- D. Targeted

Answer: A

Explanation:

Workday provides multiple types of data sources when creating reports. Among them, Indexed Data Sources are specifically designed for performance optimization on large data volumes. They allow faster retrieval and better scalability when working with high record counts, because they are pre-optimized for reporting and queries.

From the Workday Reporting guide:

"Indexed data sources provide optimized performance for large data volumes. These data sources are indexed on commonly used fields and are specifically designed to support high-performance queries." Thus, the correct choice is A. Indexed for ensuring performance with large datasets.

NEW QUESTION # 50

You need to create a report to show the trend of worker headcount over time.

What is the most appropriate data source for this report?

- **A. Trended Workers**
- B. Workers for HCM Reporting
- C. Worker History

- D. Headcount

Answer: A

Explanation:

The Trended Workers data source is specifically designed for reports that display trends over time, such as headcount, turnover, and demographics. It captures periodic snapshots of worker data (monthly, quarterly, etc.), which allows organizations to track workforce metrics historically.

From the Workday binder: "Trended Workers captures snapshots of worker data at periodic intervals, providing historical reporting across time dimensions. This enables reporting on headcount, attrition, and demographics in a time series format." By contrast, Workers for HCM Reporting is used for current-state data, not trending. Worker History provides effective-dated transaction-level history but does not automatically generate trending snapshots. Headcount is a standard delivered report and not a reusable data source for custom trending analysis.

Therefore, the most appropriate data source for worker headcount trends over time is A. Trended Workers.

NEW QUESTION # 51

You are building a report to identify employees who have exceeded the allowed number of 10 sick days in the current year.

Using the Sick Days Taken field, what is the correct formula to create a Boolean calculated field that returns True if an employee has exceeded the allowed number of sick days?

- A. Sick Days Taken > 10
- B. Sick Days Taken = 10
- C. Sick Days Taken = False
- D. Sick Days Taken >= 10

Answer: A

Explanation:

To check whether a worker's sick days exceed the threshold of 10, you must define a Boolean condition. The expression Sick Days Taken > 10 evaluates to True when the value is greater than 10, and False otherwise.

From Workday Reporting documentation:

"True/False conditions can be created using numeric comparisons such as greater than (>), less than (<), or equal to (=). These return True or False depending on the worker's data." Thus, the correct formula is A. Sick Days Taken > 10.

NEW QUESTION # 52

How can you view the latest content housed in WDSsetup?

- A. Access your Customer Central tenant.
- B. Run the What's New report in your Workday tenant.
- C. Sign in to the Shared WDSsetup tenant through the Workday Community.
- D. Migrate the content from WDSsetup into a Sandbox tenant using Object Transporter (OX).

Answer: C

Explanation:

Workday maintains a shared WDSsetup tenant where customers can access the latest delivered content, including reports, dashboards, and calculated field templates. Customers must log in through the Workday Community portal to access this tenant. From the Workday binder: "The WDSsetup tenant provides shared configuration content maintained by Workday. Customers can access the tenant through Workday Community to review the latest delivered reports and dashboards." The other options are incorrect: Object Transporter (OX) migrates content between customer tenants, not WDSsetup. Customer Central is a separate tenant for learning, not for content review. The "What's New" report shows system updates, not the latest WDSsetup content. Therefore, the correct answer is C. Sign in to the Shared WDSsetup tenant through the Workday Community.

NEW QUESTION # 53

You are configuring a data column on a composite report. You would like to map a subreport prompt to a value in a prompt set, but the prompt is not appearing on the Map Sub Report Prompts grid in the column configuration options.

What could be causing this?

- A. The Do Not Prompt at Runtime checkbox is selected for the prompt on the subreport.
- B. You did not select Use Value From Prompt Set as the default prompt value in the subreport.
- C. You already set a default value for the prompt on the subreport.
- D. You do not have access to the domain securing the report prompt.

Answer: A

Explanation:

In Workday, when you configure composite reports, you can map subreport prompts to prompt sets for greater flexibility. However, if the Do Not Prompt at Runtime checkbox is selected on the subreport prompt, the prompt will not be exposed in the Map Sub Report Prompts grid. This is because Workday interprets the prompt as suppressed and therefore not available for mapping at runtime.

From the Workday binder: "Prompts suppressed with the Do Not Prompt at Runtime option will not appear in the Map Sub Report Prompts grid in composite report configuration. To map a subreport prompt, ensure the prompt is enabled at runtime." Other options do not directly cause this issue: default values on prompts do not suppress them, security issues would block data but not hide the prompt mapping, and prompt set configuration errors affect defaulting but not visibility.

Thus, the correct answer is B. The Do Not Prompt at Runtime checkbox is selected for the prompt on the subreport.

NEW QUESTION # 54

.....

Considering all customers' sincere requirements, Workday-Pro-HCM-Reporting test question promise to our candidates with plenty of high-quality products, considerate after-sale services. Numerous advantages of Workday-Pro-HCM-Reporting training materials are well-recognized, such as 99% pass rate in the exam, free trial before purchasing, secure privacy protection and so forth.
