Implementing and Configuring Cisco Identity Services Engine certification exam is intended for network security engineers, network administrators, and network architects who are responsible for implementing and managing Cisco ISE solutions.

## Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q171-Q176):

### NEW QUESTION # 171

Refer to the exhibit.

An organization recently implemented network device administration using Cisco ISE. Upon testing the ability to access all of the required devices, a user in the Cisco ISE group IT Admins is attempting to login to a device in their organization's finance department but is unable to. What is the problem?

- A. The finance location is not a condition in the policy set.
- B. The IT training rule is taking precedence over the IT Admins rule.
- C. The authorization policy doesn't correctly grant them access to the finance devices.
- D. The authorization conditions wrongly allow IT Admins group no access to finance devices.

**Answer: C**

### NEW QUESTION # 172

During BYOD flow, from where does a Microsoft Windows PC download the Network Setup Assistant?

- A. Microsoft App Store

- B. Cisco App Store
- **C. Cisco ISE directly**
- D. Native OTA functionality

**Answer: C**

Explanation:

<https://ciscocustomer.lookbookhq.com/iseguidedjourney/BYOD-configuration>

#### NEW QUESTION # 173

What is a valid guest portal type?

- A. Captive-Guest
- B. Sponsor
- **C. Sponsored-Guest**
- D. My Devices

**Answer: C**

Explanation:

Hotspot Guest portal: Network access is granted without requiring any credentials. Usually, an Acceptance of User Policy (AUP) must be accepted before network access is granted.

Sponsored-Guest portal: Network access is granted by a sponsor who creates accounts for guests, and provides the guest with login credentials.

Self-Registered Guest portal: Guests can create their own account credentials, and may need sponsor approval before they are granted network access.
