## 1Z0-947 Latest Test Dumps | 1Z0-947 Latest Braindumps Ppt

Learning knowledge is just like building a house, our 1Z0-947 training materials serve as making the solid foundation from the start with higher efficiency. Even if this is just the first time you are preparing for the exam, you can expect high grade. Taking full advantage of our 1Z0-947 Preparation exam and getting to know more about them means higher possibility of it. And if you have a try on our 1Z0-947 exam questions, you will love them.

## Oracle GoldenGate 19c Implementation Professional Sample Questions (Q41-Q46):

### NEW QUESTION # 41

SQLEXEC can communicate only via SQL query.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

SQLEXEC can run scripts, not just SQL queries.

### NEW QUESTION # 42

Invisible columns are columns that are part of a table but not part of the results in a select. When Data Definition Language (DDL)

replication is enabled, invisible and virtual columns created in the source environment are replicated in the target environment. What parameter in Extract will exclude invisible columns from replication when using the Integrated Extract?

- A. NOINVISIBLECOLUMNS
- B. NOHIDDENCOLUMNS
- C. EXCLUDEHIDDENCOLUMNS

**Answer: C**

Explanation:

"Oracle GoldenGate supports replication of invisible columns in Extract.

If you want to exclude them, use the EXCLUDEHIDDENCOLUMNS parameter."

#### NEW QUESTION # 43

If you were to create a target-initiated Distribution Path, which of the following must you provide?

- A. The target URI
- B. The name of the Extract
- C. The name of the database transaction logs where database data changes were recorded
- D. The name of the GoldenGate deployment

**Answer: A**

Explanation:

When creating a target-initiated Distribution Path in Oracle GoldenGate Microservices, the Receiver Service initiates the connection to the source's Distribution Service. This requires specifying the target URI, which includes details like the source host, port number, and trail name. The Extract name is not directly required in this configuration.

#### NEW QUESTION # 44

You are concerned that the process report generation in your production environment will become too large and not contain useful statistics.

- A. Use the ADD EXTTRAIL command option MEGABYTES.
- B. Use the parameter REPORT.
- C. Use the parameter REPORTROLLOVER.
- D. GoldenGate automatically generates a new report when the processes start.

**Answer: C**

Explanation:

The REPORTROLLOVER parameter lets you automatically rotate and archive GoldenGate process report files based on size, time, or process restarts, preventing them from growing too large and cluttering with old data.

#### NEW QUESTION # 45

Initial Load is a process of extracting data records from the source database and loading those records onto the target database. There are many advantages in using GoldenGate to obtain the data from the source and load the records onto the target. What describes the advantage of continuing to make data changes on the source database while loading data onto the target database?

- A. Enable the LGWR to indicate in the transaction log when initial load commenced.
- B. Enable change delivery to handle collisions with initial load.
- C. Enable Extract to indicate in the trail file when initial load commenced.
- D. Enable data changes on source tables without locking tables.

**Answer: D**

Explanation:

"Oracle GoldenGate can perform a one-time initial load while the source tables remain online and active. You do not need to lock the source tables during the load. Oracle GoldenGate tracks ongoing changes with Change Data Capture (CDC) and applies them

after the load completes."

### NEW QUESTION # 46
