Passing the 300-620 exam certification will be easy and fast, if you have the right resources at your fingertips. As the advanced and reliable website, ITEXAM Simulator will offer you the best study material and help you 100% pass. 300-620 online test engine can simulate the actual test, which will help you familiar with the environment of the 300-620 real test. The 300-620 self-assessment features can bring you some convenience. The 24/7 customer service will be waiting for you, if you have any questions.

Cisco 300-620 Certification Exam is ideal for IT professionals who are interested in pursuing a career in network engineering, network administration, or data center operations. Implementing Cisco Application Centric Infrastructure certification exam is also suitable for professionals who are already working with ACI technology and want to enhance their skills and knowledge. Implementing Cisco Application Centric Infrastructure certification helps professionals to stay updated with the latest technologies and advancements in the networking domain, making them more valuable to their organizations.

Cisco 300-620 exam is a challenging certification exam that tests the skills and knowledge of IT professionals in implementing Cisco ACI solutions. It is a valuable credential for IT professionals who work in data center environments and want to demonstrate their expertise in Cisco's latest data center networking technologies. With the growing demand for ACI solutions in the industry, the ACI Implementation certification is a great way to enhance your career prospects and stay ahead of the competition.

Vital Exam Domains: A Detailed Overview

In order to deliver result-oriented learning, the content of 300-620 test assesses the candidates' knowledge with the help of six domains. They fabricate the entire exam structure and include minute concepts that are also disclosed below.

- **ACI Management**

The second last domain talks about the detailed understanding of out-of-band along with in-band deployment. Besides, it assesses that test-takers' abilities in utilizing syslog, snmp services, handling configuration back-up, performing AAA & RBAC implementation, and setting up an upgrade.

- **Integration**

Under this exam domain, the applicants will have a chance to demonstrate their knowledge of viable ways to deploy VMware vCenter DVS setup along with a service graph. This section also validates the understanding of resolution immediacy in VMM.

- **ACI Fabric Infrastructure**

The first domain is the prime focus of the exam. Using multiple sub-topics, it tries to impart up-to-date and detailed information about the topology, policies' implementation, Object Model, hardware, and the fabric discovery description related to ACI. ACI logical constructs' implementation and its related concepts like a tenant, application profile, VRF, bridge domain, endpoint groups, and contracts are also well explained in this section.

- **ACI Anywhere**

The last exam domain carries the least weightage. Yet it manages to impart a considerable amount of understanding about multipod and multisite specifics.

- **External Network Connectivity**

This module of the syllabus is all about the implementation of Layer 2 out, which requires candidates to be familiar with the STP/MCP basics and more. Other concepts like Layer 3 out and others are covered diligently as well.

Hot Practice 300-620 Exams Free 100% Pass | High-quality 300-620: Implementing Cisco Application Centric Infrastructure 100% Pass

Our 300-620 exam questions are so popular among the candidates not only because that the quality of the 300-620 study braidumps is the best in the market. But also because that our after-sales service can be the most attractive project in our 300-620 Preparation questions. We have free online service which means that if you have any trouble, we can provide help for you remotely in the shortest time. And we will give you the best advices on the 300-620 practice engine.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q24-Q29):

NEW QUESTION # 24

Refer to the exhibit. A network engineer must configure a user tenant to raise the error shown when configuring a new EPG. Which action accomplishes this goal?

- A. From Fabric Policies, set Exceed Action to Fail Transaction Action.
- **B. From Access Policies, set Exceed Action to Fail Transaction Action.**
- C. From Fabric Policies, set Exceed Action to Raise Fault Action.
- D. From Access Policies, set Exceed Action to Raise Fault Action.

Answer: B

Explanation:

The "quota exceeded" error shown is the API/UI blocking the transaction when you go over the configured quota. To force that behavior, you configure the tenant's Resource Quota policy (under Access Policies) and set its Exceed Action to Fail Transaction, which makes any over- quota create operation immediately error out as you see above.

NEW QUESTION # 25

A Cisco ACI is integrated with a VMware vSphere environment. The port groups must be created automatically in vSphere and propagated to hypervisors when created in the ACI environment. Which action accomplishes this goal?

- A. Create the port groups on the vCenter that reflect the EPG names in the APIC.
- B. Assign the uplinks of the ESXi hosts to the vDS that the APIC created.
- C. Configure contracts for the EPGs that are required on the ESXi hosts.
- **D. Associate the VMM domain with the EPGs that must be available in vCenter.**

Answer: D

Explanation:

Associating the VMM domain with the EPGs (Endpoint Groups) that must be available in vCenter is the action that accomplishes the goal of creating port groups automatically in vSphere and propagating them to hypervisors when created in the ACI environment. This integration allows the APIC to automatically create port groups in the VMware vCenter under the VDS (vSphere Distributed Switch), which provisions the network policy in the VMware vCenter

NEW QUESTION # 26

In the context of VMM, which protocol between ACI leaf and compute hosts ensures that the policies are pushed to the leaf switches for immediate and on demand resolution immediacy?

- A. ISIS
- B. STP
- C. LLDP
- **D. VXLAN**

Answer: D

Explanation:

Section: Integrations

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/ACI_Best_Practices/b_ACI_Best_Practices/b_ACI_Best_Practices_chapter_0101.html

NEW QUESTION # 27

An ACI administrator notices a change in the behavior of the fabric. Which action must be taken to determine if a human intervention introduced the change?

- A. Inspect /var/log/audit_messages on the APIC to see a record of all user actions.
- **B. Inspect audit logs in the APIC UI to see all user events.**
- C. Inspect event records in the APIC UI to see all actions performed by users.
- D. Inspect the output of show command history in the APIC CLI.

Answer: B

Explanation:

To determine if a change in the behavior of the ACI fabric was due to human intervention, an ACI administrator should inspect the audit logs in the APIC UI. The audit logs provide a record of all user events, which includes actions performed by users, making it possible to trace any changes back to specific human activities.

NEW QUESTION # 28

Which attribute should be configured for each user to enable RADIUS for external authentication in Cisco ACI?

- A. cisco-aci-role
- B. cisco-auth-features
- **C. cisco-av-pair**
- D. cisco-security domain

Answer: C

Explanation:

https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/2-x/Security_config/b_Cisco_APIC_Security_Configuration_Guide/b_Cisco_APIC_Security_Guide_chapter_01011.html

NEW QUESTION # 29

.....

The latest 300-620 dumps pdf covers every topic of the certification exam and contains the latest test questions and answers. By practicing our 300-620 vce pdf, you can test your skills and knowledge for the test and make well preparation for the formal exam. One-year free updating will ensure you get the Latest 300-620 Study Materials first time and the accuracy of our 300-620 exam questions guarantee the high passing score.
