

# Online NIS-2-Directive-Lead-Implementer Tests & NIS-2-Directive-Lead-Implementer Reliable Study Plan

P.S. Free 2026 PECB NIS-2-Directive-Lead-Implementer dumps are available on Google Drive shared by ITPassLeader: [https://drive.google.com/open?id=1\\_g5hRxzRsTGVYP8xSpB2EEFile-6aQ0T](https://drive.google.com/open?id=1_g5hRxzRsTGVYP8xSpB2EEFile-6aQ0T)

PECB study material is designed to enhance your personal ability and professional skills to solve the actual problem. NIS-2-Directive-Lead-Implementer exam certification will be the most important one. There are many study material online for you to choose. While, the NIS-2-Directive-Lead-Implementer exam dumps provided by ITPassLeader site will be the best valid training material for you. NIS-2-Directive-Lead-Implementer study pdf contains the questions which are all from the original question pool, together with verified answers. Besides, the explanations are very detail and helpful after the NIS-2-Directive-Lead-Implementer questions where is needed. You can pass your test at first try with our NIS-2-Directive-Lead-Implementer training pdf.

ITPassLeader have a huge senior IT expert team. They use their professional IT knowledge and rich experience to develop a wide range of different training plans which can help you pass PECB certification NIS-2-Directive-Lead-Implementer exam successfully. In ITPassLeader you can always find out the most suitable training way for you to pass the exam easily. No matter you choose which kind of the training method, ITPassLeader will provide you a free one-year update service. ITPassLeader's information resources are very wide and also very accurate. When selecting ITPassLeader, passing PECB Certification NIS-2-Directive-Lead-Implementer Exam is much more simple for you.

## PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q51-Q56):

### NEW QUESTION # 51

To whom should CSIRTs provide information regarding incidents?

- A. Cyber crisis management authorities
- B. National competent authorities**
- C. CRE authorities

**Answer: B**

### NEW QUESTION # 52

During which phase of the key management life cycle can keys be manually adjusted to implement alternative algorithms?

- A. Key generation
- B. Key rotation**
- C. Key backup or recovery

**Answer: B**

### NEW QUESTION # 53

According to the NIS 2 Directive, what is the default frequency at which peer reviews occur?

- A. Every two years**
- B. Every year
- C. Every six months

**Answer: A**

### NEW QUESTION # 54

Scenario 8: FoodSafe Corporation is a well-known food manufacturing company in Vienna, Austria, which specializes in producing diverse products, from savory snacks to artisanal desserts. As the company operates in regulatory environment subject to this NIS 2

Directive, FoodSafe Corporation has employed a variety of techniques for cybersecurity testing to safeguard the integrity and security of its food production processes.

To conduct an effective vulnerability assessment process, FoodSafe Corporation utilizes a vulnerability assessment tool to discover vulnerabilities on network hosts such as servers and workstations. Additionally, FoodSafe Corporation has made a deliberate effort to define clear testing objectives and obtain top management approval during the discovery phase. This structured approach ensures that vulnerability assessments are conducted with clear objectives and that the management team is actively engaged and supports the assessment process, reinforcing the company's commitment to cybersecurity excellence.

In alignment with the NIS 2 Directive, FoodSafe Corporation has incorporated audits into its core activities, starting with an internal assessment followed by an additional audit conducted by its partners. To ensure the effectiveness of these audits, the company meticulously identified operational sectors, procedures, and policies. However, FoodSafe Corporation did not utilize an organized audit timetable as part of its internal compliance audit process. While FoodSafe's Corporation organizational chart does not clearly indicate the audit team's position, the internal audit process is well-structured. Auditors familiarize themselves with established policies and procedures to gain a comprehensive understanding of their workflow. They engage in discussions with employees further to enhance their insights, ensuring no critical details are overlooked.

Subsequently, FoodSafe Corporation's auditors generate a comprehensive report of findings, serving as the foundation for necessary changes and improvements within the company. Auditors also follow up on action plans in response to nonconformities and improvement opportunities.

The company recently expanded its offerings by adding new products and services, which had an impact on its cybersecurity program. This required the cybersecurity team to adapt and ensure that these additions were integrated securely into their existing framework. FoodSafe Corporation commitment to enhancing its monitoring and measurement processes to ensure product quality and operational efficiency. In doing so, the company carefully considers its target audience and selects suitable methods for reporting monitoring and measurement results. This includes incorporating additional graphical elements and labeling of endpoints in their reports to provide a clearer and more intuitive representation of data, ultimately facilitating better decision-making within the organization.

Based on scenario 8, did FoodSafe Corporation define the discovery phase of penetration testing according to NIST SP 800-115?

- A. No, the discovery phase is the process of identifying any possible attack by attempting to exploit vulnerabilities
- B. Yes, the discovery phase is correctly defined
- C. No, in the discovery phase the testing is initiated and a vulnerability analysis is conducted

**Answer: B**

#### **NEW QUESTION # 55**

Scenario 1:

into incidents that could result in substantial material or non-material damage. When it comes to identifying and mitigating risks, the company has employed a standardized methodology. It conducts thorough risk identification processes across all operational levels, deploys mechanisms for early risk detection, and adopts a uniform framework to ensure a consistent and effective incident response. In alignment with its incident reporting plan, SecureTech reports on the initial stages of potential incidents, as well as after the successful mitigation or resolution of the incidents.

Moreover, SecureTech has recognized the dynamic nature of cybersecurity, understanding the rapid technological evolution. In response to the ever-evolving threats and to safeguard its operations, SecureTech took a proactive approach by implementing a comprehensive set of guidelines that encompass best practices, effectively safeguarding its systems, networks, and data against threats. The company invested heavily in cutting-edge threat detection and mitigation tools, which are continuously updated to tackle emerging vulnerabilities. Regular security audits and penetration tests are conducted by third-party experts to ensure robustness against potential breaches. The company also prioritizes the security of customers' sensitive information by employing encryption protocols, conducting regular security assessments, and integrating multi-factor authentication across its platforms.

Based on the scenario above, answer the following question:

In which category SecureTech fit according to the NIS 2 Directive?

- A. Critical entities
- B. Important entities
- C. Essential entities

**Answer: C**

#### **NEW QUESTION # 56**

.....
