

AZ-305 High Passing Score - AZ-305 Exam Course

P.S. Free 2026 Microsoft AZ-305 dumps are available on Google Drive shared by Dumpcollection: <https://drive.google.com/open?id=13lPXhZpexaEHZLduwRHHqASTDxzJINyX>

Passing the AZ-305 certification can prove that you are very competent and excellent and you can also master useful knowledge and skill through passing the test. Purchasing our AZ-305 guide torrent can help you pass the exam and it costs little time and energy. The AZ-305 exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our AZ-305 Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

The Microsoft AZ-305 exam covers a wide range of topics, including designing and implementing Azure compute solutions, storage solutions, networking solutions, and security solutions. Candidates are expected to have a solid understanding of Azure services and their features, as well as the ability to design and implement solutions that meet specific business requirements.

What You Need To Know About The Microsoft AZ-305 Certification Exam?

Microsoft AZ-305 stands for Microsoft Azure Infrastructure Solutions Certification Exam. The purpose of this certification is to help you demonstrate your ability to design and administer a cloud solution that's running on Microsoft Azure. It will also help you prove your ability to create, configure, and administer virtual machines, web and mobile services, storage, network services, and access management on Microsoft Azure. **AZ-305 exam dumps** will help you pass this exam in the first attempt.

The AZ-305 Exam is a Microsoft Certification Exam that tests a candidate's knowledge and skills required to successfully design and deploy Microsoft Azure Infrastructure Solutions. Passing the AZ-305 exam certifies that a candidate can work with the products found in Azure solutions. These products are Virtual Machines, Web Apps, Storage, Cloud Services, Mobile Services, SQL Database, App Service, and Service Bus. Relational data security requirements and data protection practices must be applied when working with these products.

New AZ-305 High Passing Score Free PDF | Valid AZ-305 Exam Course: Designing Microsoft Azure Infrastructure Solutions

Without doubt, our AZ-305 practice dumps keep up with the latest information and contain the most valued key points that will show up in the real AZ-305 exam. Meanwhile, we can give you accurate and instant suggestion for our customer services know every detail of our AZ-305 Exam Questions. And they are pleased to give guide for 24 hours online. You can get assistant by them as long as you made your inquire.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q225-Q230):

NEW QUESTION # 225

You plan to deploy 10 applications to Azure. The applications will be deployed to two Azure Kubernetes Service (AKS) clusters.

Each cluster will be deployed to a separate Azure region.

The application deployment must meet the following requirements:

- * Ensure that the applications remain available if a single AKS cluster fails.
- * Ensure that the connection traffic over the internet is encrypted by using SSL without having to configure SSL on each container.

Which service should you include in the recommendation?

- A. AKS ingress controller
- B. **Azure Front Door**
- C. Azure Traffic Manager
- D. Azure Load Balancer

Answer: B

Explanation:

Explanation

"Azure Front Door, which focuses on global load-balancing and site acceleration, and Azure CDN Standard, which offers static content caching and acceleration. The new Azure Front Door brings together security with CDN technology for a cloud-based CDN with threat protection and additional capabilities. "

NEW QUESTION # 226

You plan to import data from your on-premises environment to Azure. The data is shown in the following table.

On-premises source	Azure target
A Microsoft SQL Server 2012 database	An Azure SQL database
A table in a Microsoft SQL Server 2014 database	An Azure Cosmos DB account that uses the SQL API

What should you recommend using to migrate the data? To answer, drag the appropriate tools to the correct data sources-Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools

- AzCopy
- Azure Cosmos DB Data Migration Tool
- Data Management Gateway
- Data Migration Assistant

Answer Area

From the SQL Server 2012 database:

Tool

From the table in the SQL Server 2014 database:

Tool

Answer:

Explanation:

Tools

- AzCopy
- Azure Cosmos DB Data Migration Tool
- Data Management Gateway
- Data Migration Assistant

Answer Area

From the SQL Server 2012 database:

Data Migration Assistant

From the table in the SQL Server 2014 database:

Azure Cosmos DB Data Migration Tool

Explanation:

Answer Area

From the SQL Server 2012 database:

Data Migration Assistant

From the table in the SQL Server 2014 database:

NEW QUESTION # 227

You plan to develop a new app that will store business critical data. The app must meet the following requirements:

- * Prevent new data from being modified for one year.
- * Maximize data resiliency.
- * Minimize read latency.

What storage solution should you recommend for the app? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

 Microsoft

Storage Account type:

Standard general-purpose v1
Standard general-purpose v2
Premium block blobs

These are the selections for Storage Account type.

Redundancy:

Zone-redundant storage (ZRS)
Locally-redundant storage (LRS)
Read-access geo-redundant storage (RA-GRS)

Answer:

Explanation:

Answer Area

Storage Account type:

Standard general-purpose v1
Standard general-purpose v2
Premium block blobs

These are the selections for Storage Account type.

Redundancy:

Zone-redundant storage (ZRS)
Locally-redundant storage (LRS)
Read-access geo-redundant storage (RA-GRS)

NEW QUESTION # 229

You are designing a large Azure environment that will contain many subscriptions.

You plan to use Azure Policy as part of a governance solution.

To which three scopes can you assign Azure Policy definitions? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. resource groups
- B. Azure Active Directory (Azure AD) administrative units
- C. management groups
- D. subscriptions
- E. Azure Active Directory (Azure AD) tenants
- F. compute resources

Answer: A,C,D

Explanation:

Azure Policy evaluates resources in Azure by comparing the properties of those resources to business rules. Once your business rules have been formed, the policy definition or initiative is assigned to any scope of resources that Azure supports, such as management groups, subscriptions, resource groups, or individual resources.
