CLT Practice Exam Questions

Issue Pack Optimization - Answer- Which of the following terms describes minimizing counting and manual handling of individual items by encouraging customers to order as much as possible, such as full-pallet or full-case loads?

Pick by label
Issue pack optimization
Pick task simplification
Move to a forward pick location

OSHA - Answer- Which of the following government agencies provides the Hazoom Standards or "Right to Know" laws?

EPA
USDOT
OSHA
PHMSA

A pair of headphones made in Seoul, South Korea, and sold in San Diego, California. - Answer- Which of the following is an example of a U.S. import?

A pair of headphones made in Seoul, South Korea, and sold in San Diego, California.
A leather jacket made in Nashville, Tennessee, and sold in London, England.

Air - Answer- Which mode of transportation is the fastest for long distances?

Truck
Air
Rail
Water

False - Answer- Bar codes and RFID tags may not be used to track products in transit.

TRUE
FALSE

Cyclical ordering system - Answer- Which of the following ordering systems is a time-based system where items are ordered based on anticipated usage according to a predetermined schedule?

Cyclical ordering system
Fixed-order quantity system
Material requirements planning system

Corrugated Paper Container - Answer- What type of container is a cardboard box?

Crate
Wire mesh container
Drum
Corrugated paper container

Certified Logistics Technician (CLT) 4.0 exam tests hired dedicated staffs to update the contents of the data on a daily basis. Our industry experts will always help you keep an eye on changes in the exam syllabus, and constantly supplement the contents of CLT test guide. Therefore, with our study materials, you no longer need to worry about whether the content of the exam has changed. You can calm down and concentrate on learning. At the same time, the researchers hired by CLT Test Guide is all those who passed the Certified Logistics Technician (CLT) 4.0 exam, and they all have been engaged in teaching or research in this industry for more than a decade. They have a keen sense of smell on the trend of changes in the exam questions. Therefore, with the help of these experts, the contents of CLT exam questions must be the most advanced and close to the real exam.

Real4dumps provide all candidates with CLT test torrent that is compiled by experts who have good knowledge of exam, and they are very professional in compile study materials. Not only that, our team checks the update every day, in order to keep the latest information of our CLT Test Torrent. Once we have latest version, we will send it to your mailbox as soon as possible. It must be best platform to provide you with best material for your exam. So feel relieved when you buy our CLT guide torrent.

CLT Exam Cram Questions & Latest CLT Guide Files

Undoubtedly, passing the MSSC CLT Certification Exam is one big achievement. Regardless of how tough the Certified Logistics

Technician (CLT) 4.0 (CLT) exam is, it serves an important purpose of improving your skills and knowledge of a specific field. Once you become certified by MSSC, a whole new career scope will open up to you.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q65-Q70):

NEW QUESTION # 65

When reaching above his or her shoulders to access products on the upper shelves, to avoid causing stress to his or her shoulders and back a worker should

- A. move lightweight products further away from the edge
- B. allow no more than 10 inches between the pallets when products are stocked on high shelves
- C. move lightweight products closer to the edge prior to lifting
- D. stand on a chair so that the arms are the same height as the item

Answer: C

Explanation:

Ergonomics and safe material handling are integral to CLT's "Product Storage" training. When accessing items above shoulder height, workers are instructed to minimize reach and strain by repositioning lighter products closer to the edge before lifting. This practice maintains proper posture, reduces overextension, and prevents musculoskeletal injuries. Standing on chairs is unsafe and violates warehouse safety standards; proper ladders or lifts must be used instead. Shelf spacing (e.g., 10 inches) is not relevant to ergonomic technique. Positioning light items for controlled lifting aligns with CLT principles of efficient, safe storage and retrieval in warehouse environments.

NEW QUESTION # 66

A container is 4 feet high, 5 feet wide, and 9 feet deep. What is the volume of the container?

- A. 18 cubic feet
- B. 180 cubic feet
- C. 360 cubic feet
- D. 45 cubic feet

Answer: B

Explanation:

The formula for volume in logistics is:

Length \times Width \times Height.

So, $4 \text{ ft} \times 5 \text{ ft} \times 9 \text{ ft} = 180 \text{ cubic feet}$.

According to CLT 4.0, understanding cubic measurements is essential for calculating cube utilization, storage optimization, and container or trailer load planning. Volume determines how efficiently space is used in warehouses or transport vehicles. By knowing total cubic capacity, technicians can calculate how many items fit per load, ensuring balanced weight distribution and optimal equipment use. Accurate volume computation reduces wasted space and prevents under- or over-utilization of assets, supporting lean logistics operations. This skill also helps when converting cubic feet to cubic meters for international shipments or calculating freight costs based on dimensional weight.

NEW QUESTION # 67

Order processing begins

- A. when the seller receives an order
- B. upon receipt at the warehouse
- C. when a location is authorized to fill the order
- D. when directed by the supervisor

Answer: A

Explanation:

The CLT "Order Processing" module defines the process as beginning the moment the seller receives an order from the customer. This initiation triggers multiple downstream activities including verification, credit checks, allocation of inventory, and preparation of

warehouse documentation such as pick lists or shipping orders. Waiting until warehouse authorization or supervisor direction occurs later in the process flow. Recognizing this start point is critical for understanding supply chain coordination-from order entry through fulfillment. CLT emphasizes accuracy and timeliness in this initial stage because errors made here propagate through the entire logistics cycle. Correctly identifying the start of order processing ensures synchronization between sales, warehouse operations, and transportation planning.

NEW QUESTION # 68

A list of items in a vehicle's cargo is

- A. Picking List
- B. Dock Receipt
- C. Manifest
- D. Delivery Receipt

Answer: C

Explanation:

In logistics operations, a manifest serves as the master list of all cargo items loaded onto a vehicle, container, aircraft, or vessel. According to CLT 4.0, it details shipment identifiers, consignee addresses, weights, cube measurements, and associated documentation like bills of lading or invoices. The manifest ensures accountability and traceability from origin to destination by allowing carriers and receivers to cross-check cargo content against documentation. It is used in dispatch and tracking to confirm that the correct freight has been loaded and helps prevent mis-shipments or loss. Unlike a picking list, which is used in order fulfillment within the warehouse, the manifest is used for transportation verification. The manifest also plays a regulatory role, especially for hazardous materials or international cargo, where customs and compliance verification depend on its accuracy.

NEW QUESTION # 69

Which of the following is an invoice given to a shipper or consignee by the carrier as a request for payment for services?

- A. Shipping Order
- B. Bill of Lading
- C. Carrier Freight Bill
- D. Delivery Receipt

Answer: C

Explanation:

Within CLT logistics documentation, Carrier Freight Bill is the billing document carriers present to customers (shipper or consignee) requesting payment for transport services. The Bill of Lading is a contract/document of title, Shipping Order is internal instruction to the carrier, and Delivery Receipt confirms delivery.
