

# 2026 Excellent FCP\_FSM\_AN-7.2 Practice Mock | 100% Free FCP - FortiSIEM 7.2 Analyst Valid Test Duration

P.S. Free 2026 Fortinet FCP\_FSM\_AN-7.2 dumps are available on Google Drive shared by CramPDF:  
<https://drive.google.com/open?id=1-nB16jZwtGpmfcozFyZPRkWD787UDi0q>

You must have thought about moving forward successfully in this competitive and fast-changing technological world. If you want to boost your career Fortinet FCP\_FSM\_AN-7.2 certification is the most acclaimed and honorable certificate in the tech sector. But the confusion regarding the preparation and relevant Fortinet FCP\_FSM\_AN-7.2 Practice Test questions must have emerged in your mind too.

Do you want to have FCP\_FSM\_AN-7.2 exam training materials which can save you time and effort? Then you can choose CramPDF. Our FCP\_FSM\_AN-7.2 exam training materials will provide you with free update service as long as one year. You will get the latest updated FCP\_FSM\_AN-7.2 Exam Training materials. We guarantee that after you purchase our FCP\_FSM\_AN-7.2 exam dumps, if you fail the FCP\_FSM\_AN-7.2 exam certification, we will give a full refund.

## Top FCP\_FSM\_AN-7.2 Practice Mock & Perfect FCP\_FSM\_AN-7.2 Valid Test Duration & Fantastic FCP\_FSM\_AN-7.2 Exam Discount

The third format is a web-based practice exam that is compatible with Firefox, Microsoft Edge, Safari, and Google Chrome. So the students can access it from any browser and study for Fortinet FCP\_FSM\_AN-7.2 Exam clarification. In addition, Mac, iOS, Windows, Linux, and Android support the web-based Fortinet FCP\_FSM\_AN-7.2 practice questions.

### Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q36-Q41):

**NEW QUESTION # 36**  
Refer to the exhibit.

▶ Run Mode: *Local*  
 ▶ Task: *Regression*  
 ▶ Algorithm: *DecisionTreeRegressor*  
 ▼ Fields to use for Prediction:  
 AVG(CPU Util)  
 AVG(Memory Util)  
 AVG(Sent Bytes64)  
 AVG(Received Bytes64)  
 ▼ Field to Predict:  
 AVG(CPU Util)  
 AVG(Memory Util)  
 AVG(Sent Bytes64)  
 AVG(Received Bytes64)

What will happen when a device being analyzed by the machine learning configuration shown in the exhibit has a consistently high memory utilization?

- A. FortiSIEM will update the model with a higher memory utilization average value.
- B. FortiSIEM will lower the CPU utilization trigger requirement for CPU utilization.
- C. FortiSIEM will update the regression tables for memory utilization, and average sent and received bytes.
- D. FortiSIEM will trigger an incident for high memory utilization.

**Answer: A**

Explanation:

In the configuration shown, FortiSIEM uses Memory Util, Sent Bytes, and Received Bytes as input features to predict CPU Utilization via a regression model. If a device shows consistently high memory utilization, the model will incorporate that into its training data and update itself with a higher average value for memory utilization, influencing future CPU utilization predictions.

**NEW QUESTION # 37**

Refer to the exhibit.

Source IP	Reporting Device	Reporting IP	Event Type	User	Count
15.2.3.4	FW01	10.1.1.1	Logon	Mike	4
21.3.4.5	FW01	10.1.1.1	Logon	Bob	3
14.12.3.1	FW01	10.1.1.1	Logon	Alice	2
192.168.1.5	FW01	10.1.1.1	Logon	Alice	2
10.1.1.1	FW01	10.1.1.1	Logon	Bob	6
123.123.1.1	FW01	10.1.1.1	Logon	Mike	5

If you group the events by User, Source IP, and Count attributes, how many results will FortiSIEM display?

- A. Three
- B. Four
- C. Two
- D. Five
- E. Six

**Answer: E**

Explanation:

Grouping by User, Source IP, and Count means that each unique combination of those three attributes will be treated as a separate result. In the table, all six rows have distinct combinations of User, Source IP, and Count - so FortiSIEM will display 6 results.

#### NEW QUESTION # 38

What can you use to send data to FortiSIEM for user and entity behavior analytics (UEBA)?

- A. FortiSIEM worker
- B. SSH
- C. SNMP
- D. FortiSIEM agent

**Answer: D**

Explanation:

The FortiSIEM agent can be used to send detailed endpoint data such as user activity and process behavior to FortiSIEM, which is essential for performing User and Entity Behavior Analytics (UEBA).

#### NEW QUESTION # 39

Refer to the exhibit.

**Event Attribute** **FORTINET**

Filter By:  Event Keywords  Event Attribute  CMDB Attribute Clear All Load Save

Paren	Attribute	Operator	Value	Paren	Next	Row
-	+ Raw Event Log	=	udp	-	+ AND OR	+

Time Range:  Real-time  Relative  Absolute

Last

Trend Interval:

Result Limit:  K rows

Apply & Run Apply Cancel

A FortiSIEM device is receiving syslog events from a FortiGate firewall. The FortiSIEM analyst is trying to search the raw event logs for the last two hours that contain the keyword "udp". However, they are getting no results from the search, which they know should be available. Based on the filter shown in the exhibit, why are there no search results?

- A. The analyst selected = in the Operator column. That is the wrong operator.
- B. The analyst selected AND in the Next column. This is the wrong Boolean operator.
- C. The Time Range value should be set to Real-Time.
- D. The keyword is case sensitive. Instead of typing udp in the Value field, the analyst should type UDP.

**Answer: A**

Explanation:

The operator is set to "=", which performs an exact match on the entire raw event log, not a substring search. To find logs that contain the keyword "udp", the analyst should use the CONTAIN operator instead. This will return all logs where "udp" appears anywhere in the raw log message.

#### NEW QUESTION # 40

Refer to the exhibit.

**Event Details** **FORTINET**

Raw Message

```
<190>Jan 14 08:32:45 date= time=14:19:51 devname=FG240D3913800441 devid=FG240D3913800441 logid=1059028704 type=utm subtype=app-ctrl
eventtype=app-ctrl-all level=information vd=root appid=15895 user= srcip=192.168.88.11 srcport=53866 srcintf="DMZ" dstip=121.111.236.179 dstport=443
dstintf="wan1" profiletype="applist" proto=6 service="HTTPS" policyid=2 sessionid=51943532 applist="default" appcat="Network.Service" app="SSL"
action=pass msg="Network.Service: SSL"
```

Which value would you expect the FortiSIEM parser to use to populate the Application Name field?

- A. SSL
- B. applist
- C. wan1
- D. Network.Service

**Answer: A**

Explanation:

The Application Name field in FortiSIEM is typically populated using the value of the app field in the raw log. In this event, app="SSL", so "SSL" is the expected application name parsed by FortiSIEM.

## NEW QUESTION # 41

.....

To make sure your whole experience of purchasing FCP\_FSM\_AN-7.2 exam questions more comfortable, we offer considerate whole package services. We offer not only free demos, give three versions for your option, but offer customer services 24/7. Even if you fail the FCP\_FSM\_AN-7.2 Test Guide, the customer will be reimbursed for any loss or damage after buying our FCP\_FSM\_AN-7.2 exam questions. With easy payments and considerate, trustworthy after-sales services, our FCP - FortiSIEM 7.2 Analyst study question will not let you down.
