Nutanix NCP-US-6.5 Pass Leader Dumps: Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 - Exam4PDF One of 10 Leading Planform

Exam4PDF offers a full refund guarantee according to terms and conditions if you are not satisfied with our Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) product. You can also get free Nutanix Dumps updates from Exam4PDF within up to 365 days of purchase. This is a great offer because it helps you prepare with the latest Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) dumps even in case of real Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) exam changes. Exam4PDF gives its customers an opportunity to try its NCP-US-6.5 product with a free demo.

Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 Sample Questions (Q117-Q122):

NEW QUESTION # 117
An administrator is attempting to create a share that will provide user access via SMB and NFS. However, the Enable multiprosotocol accounts for NFS clients settings is not available.
What would cause this issue?

- A. The file server instance was only configured with SMB.
- B. The connection to Active Directory has not been configured.
- C. The incorrect Files license has been applied.
- D. NFS configured to use unmanaged authentication.

Answer: B

Explanation:
The cause of this issue is that the connection to Active Directory has not been configured. Active Directory is a service that provides centralized authentication and authorization for Windows-based clients and servers. To create a share that will provide user access via SMB and NFS, the administrator must first configure the connection to Active Directory in the Files Console. This will allow the administrator to enable multiprotocol accounts for NFS clients, which are accounts that map NFS users to SMB users and groups for consistent access control across both protocols. Reference: Nutanix Files Administration Guide, page 32; Nutanix Files Solution Guide, page 6

NEW QUESTION # 118
An administrator is tasked with performing an upgrade to the latest Objects version.
What should the administrator do prior to upgrade Objects Manager?

- A. Upgrade Objects service
- B. Upgrade Lifecycle Manager
- C. Upgrade MSP
- D. Upgrade AOS

Answer: D

Explanation:
Before upgrading Objects Manager, the administrator must upgrade AOS to the latest version. AOS is the core operating system that runs on each node in a Nutanix cluster and provides the foundation for Objects Manager and Objects service. Upgrading AOS will ensure compatibility and stability for Objects components. Reference: Nutanix Objects Administration Guide, Acropolis Operating System Upgrade Guide

NEW QUESTION # 119
An administrator has been asked to confirm the ability of a physical windows Server 2019 host to boot from storage on a Nutanix AOS cluster.
Which statement is true regarding this confirmation by the administrator?

- A. Physical servers may boot from an object bucket from the data services IP and MPIO is required.
- B. Physical servers may boot from a volume group from the data services IP and MPIO is
- C. Physical servers may boot from an object bucket from the data services IP address and MPIO is not required.
- D. Physical servers may boot from a volume group from the data services IP and MPIO is not required.

Answer: B

Explanation:
Nutanix Volumes allows physical servers to boot from a volume group that is exposed as an iSCSI target from the data services IP. To ensure high availability and load balancing, multipath I/O (MPIO) is required on the physical server. Object buckets cannot be used for booting physical servers1. Reference: Nutanix Volumes Administration Guide1

NEW QUESTION # 120
An administrator needs to scale out an existing Files instance. Based on the Company's requirements, File instance has four FSVMs configured and needs to expand to six.
How many additional Client IP addresses and Storage IP addresses does the administrator require to complete this task?

- A. 2 Client IPs and 2 Storage IPs
- B. 3 Client IPs and 2 Storage IPs
- C. 2 Client IPs and 3 Storage IPs
- D. 3 Client IPs and 3 Storage IPs

Answer: A

Explanation:
To scale out an existing Files instance, the administrator needs to add one Client IP and one Storage IP for each additional FSVM.

Since the Files instance needs to expand from four FSVMs to six FSVMs, the administrator needs to add two Client IPs and two Storage IPs in total. The Client IPs are used for communication between the FSVMs and the clients, while the Storage IPs are used for communication between the FSVMs and the CVMs. Reference: Nutanix Files Administration Guide, page 28; Nutanix Files Solution Guide, page 7

NEW QUESTION # 121

Before upgrading Files or creating a file server, which component must first be upgraded to a compatible version?

- A. Prism Central
- B. File Analytics
- C. FSVM
- D. FSM

Answer: A

Explanation:
The component that must first be upgraded to a compatible version before upgrading Files or creating a file server is Prism Central. Prism Central is a web-based user interface that allows administrators to manage multiple Nutanix clusters and services, including Files. Prism Central must be upgraded to a compatible version with Files before upgrading an existing file server or creating a new file server. Otherwise, the upgrade or creation process may fail or cause unexpected errors. Reference: Nutanix Files Administration Guide, page 21; Nutanix Files Upgrade Guide

NEW QUESTION # 122

......

Our desktop Nutanix NCP-US-6.5 practice exam software is designed for all those candidates who want to learn and practice in the actual Nutanix Certified Professional - Unified Storage (NCP-US) v6.5 (NCP-US-6.5) exam environment. This desktop practice exam software completely depicts the Nutanix NCP-US-6.5 Exam scenario with proper rules and regulations so you can practice all the hurdles and difficulties.
