

Pass Guaranteed Quiz 2026 CompTIA High Pass-Rate DA0-002: Online CompTIA Data+ Exam (2025) Version

BONUS!!! Download part of Prep4sureExam DA0-002 dumps for free: <https://drive.google.com/open?id=1F0MAIMJZn0aLGdqLmBA2vHXpacfVweN>

The emerging CompTIA field creates a space for CompTIA Data+ Exam (2025) (DA0-002) certification exam holders to accelerate their careers. Many unfortunate candidates don't get the CompTIA Data+ Exam (2025) (DA0-002) certification because they prepare for its CompTIA Data+ Exam (2025) (DA0-002) exam questions from an CompTIA DA0-002 exam that dumps outdated material. It results in a waste of time and money. You can develop your skills and join the list of experts by earning this CompTIA Data+ Exam (2025) (DA0-002) certification exam.

CompTIA DA0-002 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> 5.0 Data Governance, Quality, and Controls
Topic 2	<ul style="list-style-type: none"> This section of the exam measures skills of a Data Governance Associate and introduces principles for keeping data secure, accurate, and compliant. It covers access controls, encryption, classification of sensitive data like PII and PHI, and legal requirements tied to data use. Candidates must know how to apply quality checks, validate data, and manage master data effectively. It also addresses best practices for maintaining integrity through data dictionaries, audits, and standardisation processes.
Topic 3	<ul style="list-style-type: none"> Visualization: This section of the exam measures skills of a Data Visualisation Specialist and focuses on turning raw data into clear, visual insights. It teaches how to match visual formats like bar charts, heat maps, and line graphs to specific audiences and needs. Candidates must understand how to create dashboards and reports using proper design elements such as labels, layout, branding, and colour schemes. This section also includes best practices for dashboard development and delivery through various platforms and user access levels.

Reliable DA0-002 Test Answers | Valid DA0-002 Exam Experience

Not only our DA0-002 study guide has the advantage of high-quality, but also has reasonable prices that are accessible for every one of you. So it is incumbent upon us to support you. On the other side, we know the consumers are vulnerable for many exam candidates are susceptible to ads that boost about DA0-002 skills their practice with low quality which may confuse exam candidates like you, so we are trying hard to promote our high quality DA0-002 study guide to more people.

CompTIA Data+ Exam (2025) Sample Questions (Q79-Q84):

NEW QUESTION # 79

A data analyst receives an email from the IT department about renewing the company password, and the analyst follows the password reset link as required. Later in the week, the analyst receives the following notification when running a recurring analysis that connects to the database:

Log-in failed for user '<username>'

Which of the following is most likely the reason for this issue?

- A. The analyst did not change the password used to launch the report.
- B. The password expiration process locked the account.
- C. The company is experiencing issues with password replication.
- D. The company changed its database authentication method.

Answer: A

Explanation:

This question falls under the Data Governance domain, focusing on data access and security troubleshooting.

The analyst reset their password, but the recurring analysis failed to log in, indicating a mismatch.

* The company changed its database authentication method (Option A): This would affect all users, not just the analyst, and there's no indication of a broader change.

* The password expiration process locked the account (Option B): The analyst reset the password as required, so the account isn't likely locked due to expiration.

* The analyst did not change the password used to launch the report (Option C): Recurring analyses often use stored credentials. If the analyst updated their password but didn't update the stored credentials for the analysis, the login would fail, making this the most likely reason.

* The company is experiencing issues with password replication (Option D): This is possible but less likely without evidence of broader system issues.

The DA0-002 Data Governance domain includes "data privacy concepts," and ensuring stored credentials match updated passwords is a common issue in recurring analyses.

NEW QUESTION # 80

Which of the following supports capabilities such as automatic versioning, corruption checks, KPIs, and user authentication?

- A. Pipeline
- B. Notebook
- C. Source control
- D. REST API

Answer: C

Explanation:

This question falls under the Data Governance domain, focusing on tools that support data management and quality control features.

The task is to identify a tool with capabilities like versioning, corruption checks, KPIs, and authentication.

* Notebook (Option A): Notebooks (e.g., Jupyter) are for data analysis and coding but don't inherently support versioning, corruption checks, or authentication.

* REST API (Option B): REST APIs enable data access but don't provide versioning or corruption checks as a primary function.

* Pipeline (Option C): Data pipelines automate data workflows but don't typically include versioning or authentication.

* Source control (Option D): Source control systems (e.g., Git) support automatic versioning (tracking changes), corruption checks (integrity verification), KPIs (e.g., commit frequency), and user authentication (access control), making this the best fit.

The DA0-002 Data Governance domain includes "data quality control concepts," and source control systems provide the listed capabilities to ensure data integrity and security.

NEW QUESTION # 81

A data analyst needs to get an accurate idea of how data components are automated. Which of the following types of documentation should the analyst review first?

- A. Data lineage
- B. Data dictionary

- C. Data flow diagram
- D. Data explainability report

Answer: C

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on documentation for understanding data processes. The analyst needs to understand automation of data components, which involves data movement and processes.

* Data flow diagram (Option A): A data flow diagram (DFD) visualizes how data moves through systems, including automated processes, making it the best starting point.

* Data explainability report (Option B): This is related to AI/ML model transparency, not data automation.

* Data dictionary (Option C): A data dictionary defines data elements, not how they're automated.

* Data lineage (Option D): Data lineage tracks data origin and transformations but doesn't focus on automation processes.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and a data flow diagram is key for visualizing automation.

NEW QUESTION # 82

A data analyst is following up on a recent, company-wide data audit of customer invoice data. Which of the following is the best option for the analyst to use?

- A. PII
- B. GDPR
- C. PCI DSS
- D. ISO

Answer: B

Explanation:

This question falls under the Data Governance domain of CompTIA Data+ DA0-002, which includes understanding compliance frameworks for data audits, especially for customer data. The scenario involves a data audit of customer invoice data, which likely contains personal information, making privacy regulations relevant.

* PCI DSS (Option A): PCI DSS (Payment Card Industry Data Security Standard) applies specifically to payment card data, not general customer invoice data unless credit card details are involved, which isn't specified.

* GDPR (Option B): GDPR (General Data Protection Regulation) is a comprehensive privacy regulation for handling personal data of EU citizens, including customer invoice data, which may contain PII like names and addresses. It's the most relevant for a company-wide data audit.

* ISO (Option C): ISO standards (e.g., ISO 27001) relate to information security management but are not specific to customer data privacy audits.

* PII (Option D): PII (Personally Identifiable Information) is a concept, not a framework or tool for conducting an audit.

The DA0-002 Data Governance domain emphasizes "identifying PII and data privacy concepts," and GDPR is the most appropriate framework for auditing customer data to ensure compliance with privacy laws.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

NEW QUESTION # 83

A senior manager needs a report that can be generated and accessed at any time. Which of the following delivery methods should a data analyst use?

- A. Static
- B. Self-service
- C. Ad hoc
- D. Dynamic

Answer: B

Explanation:

This question is part of the Visualization and Reporting domain, focusing on report delivery methods. The requirement for a report that can be generated and accessed at any time suggests user-driven access.

* Ad hoc (Option A): Ad hoc reports are one-time, on-demand reports, not designed for anytime access by the user.
