

Pass Guaranteed High-quality Fortinet - Exam FCP_FM_G AD-7.6 Simulator

What's more, part of that Test4Engine FCP_FM_G AD-7.6 dumps now are free: <https://drive.google.com/open?id=1kAzn7D6151CUSyOLRRpItqlj48FB0ozg>

Our products are global, and you can purchase FCP_FM_G AD-7.6 training guide is wherever you are. Believe us, our FCP_FM_G AD-7.6 exam questions will not disappoint you. Our global users can prove our strength in this career. Just look at the hot hit on the website and you can see how popular our FCP_FM_G AD-7.6 Study Materials are. And the numerous of the grateful feedbacks from our worthy customers as well as the high pass rate as 98% to 100%. What are you waiting for? Just rush to buy our FCP_FM_G AD-7.6 preparation quiz!

Fortinet FCP_FM_G AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 2	<ul style="list-style-type: none">This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 3	<ul style="list-style-type: none">Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 4	<ul style="list-style-type: none">Troubleshooting
Topic 5	<ul style="list-style-type: none">Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.
Topic 6	<ul style="list-style-type: none">Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.

Practice FCP_FM_G AD-7.6 Exams, FCP_FM_G AD-7.6 New Real Test

Our FCP_FM_G AD-7.6 study materials will be very useful for all people to improve their learning efficiency. If you do all things

with efficient, you will have a promotion easily. If you want to spend less time on preparing for your FCP_FMGMG_AD-7.6 exam, if you want to pass your exam and get the certification in a short time, our FCP_FMGMG_AD-7.6 learning braindumps will be your best choice to help you achieve your dream. Don't hesitate, you will be satisfied with our FCP_FMGMG_AD-7.6 exam questions!

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45

An administrator sees that the policy package status of HQ-NGFW-1 is Never Installed. What can you conclude from this status?

- A. The firewall policies exist only in the HQ-NGFW-1 device-level database, and no policy package has been assigned to the firewall.
- B. The firewall policies were created or changed in the ADOM, and they need to be installed on the managed HQ-NGFW-1 for the first time.
- C. The policy package was never imported to the revision history after HQ-NGFW-1 was registered on FortiManager.
- D. The policies have not yet been retrieved from the HQ-NGFW-1 device-level database of FortiManager.

Answer: B

Explanation:

In FortiManager, when a device shows the policy package status as "Never Installed," it means that a policy package has been assigned to that device, but it has never been installed on it. This typically happens when policies were created or modified in the ADOM, but no installation to the firewall has yet occurred.

NEW QUESTION # 46

Refer to the exhibit. What can you conclude from the downloaded import report?

```
Start to import config from device(Remote-FortiGate) vdom(root) to
adom(root), package(Remote-FortiGate_root)

"firewall address",SKIPPED,"(name=all, oid=2309, DUPLICATE)"

"firewall address",FAIL,"(name=REMOTE_SUBNET, oid=2311,
reason=interface(({firewall address:REMOTE_SUBNET) any<-port6} binding
fail)"

"firewall policy",FAIL,"(name=1, oid=3070, reason=interface(interface binding
contradiction. detail: (firewall address:REMOTE_SUBNET) any<-port6} binding
fail)"
```

- A. The administrator will see a new policy package named Remote-FortiGate_root in the FortiManager ADOM database.
- B. As a result of this policy import process, FortiManager will create a new firewall address called REMOTE_SUBNET in the ADOM database.
- C. FortiManager will change the configuration of REMOTE_SUBNET to match the interface mapping coming in from Remote-FortiGate.
- D. FortiManager does not support per-device mapping for firewall addresses.

Answer: A

Explanation:

The import report shows that a new policy package named Remote-FortiGate_root will be created in the FortiManager ADOM database, but some firewall addresses and policies failed to import due to interface binding conflicts.

NEW QUESTION # 47

An administrator created a new ADOM named Training for FortiGate devices only. Then, the administrator added the root FortiGate device of a Security Fabric group to the Training ADOM.

Which statement correctly describes the expected result for the downstream devices in the Security Fabric, given the actions taken by the administrator?

- A. The downstream devices are automatically authorized.
- B. The downstream devices show as unauthorized in the root ADOM.

- C. The downstream devices will appear in the Managed FortiGate section of the rootADOM.
- D. The downstream devices must be added using the Add Device wizard.

Answer: B

Explanation:

When you add the root FortiGate device of a Security Fabric group to an ADOM (in this case, Training), FortiManager:

- Automatically detects the downstream FortiGate devices in the Security Fabric.
- However, those downstream devices are not automatically added or authorized.
- They will appear as unauthorized devices under the root FortiGate in the Training ADOM, not in the root ADOM.

You must manually authorize each downstream device if you want FortiManager to manage them.

NEW QUESTION # 48

An administrator is copying a system template profile between ADOMs by running the following command:

execute fmprofile export-profile ADOM 3547 /tmp/Backup_File output dump to file: [/tmp/Backup_File] Where does this command export the system template profile from?

- A. ADOM device database
- B. FortiManager ADOM policy database
- C. FortiManager configuration backup file
- D. FortiManager /tmp/Backup_File folder

Answer: B

Explanation:

The command exports the system template profile from the FortiManager ADOM policy database, which stores the configuration templates for devices within that ADOM.

NEW QUESTION # 49

Push updates are failing on a FortiGate device located behind a network address translation (NAT) device?

Which two settings should the administrator check to correct this problem? (Choose two.)

- A. Make sure FortiGuard updates and web service are enabled on the FortiGuard service interface.
- B. Make sure the Bind to IP address option on the FortiGuard service interface is set to the virtual IP address from the NAT device.
- C. Make sure the NAT device IP address and the correct ports are configured on FortiManager.
- D. Make sure the virtual IP address and the correct ports are configured on the NAT device.

Answer: C,D

Explanation:

FortiManager must have the NAT device's IP address and correct ports configured to communicate properly with the FortiGate behind NAT.

The NAT device must have the correct virtual IP address and ports configured to allow push updates to reach the FortiGate device.

NEW QUESTION # 50

.....

With our Fortinet FCP_FMGMG_AD-7.6 exam questions material, we promise your success in Fortinet certification. We guarantee that if you study completely from our practice Fortinet FCP_FMGMG_AD-7.6 exams, you will pass your Fortinet FCP_FMGMG_AD-7.6 exam with flying colors on the first try. If you are pressed for time when studying for the FCP - FortiManager 7.6 Administrator PDF Questions and working several jobs, PDF format is the ideal option. Because the Test4Engine follows every bit of the official FCP - FortiManager 7.6 Administrator exam syllabus to compile the most relevant Fortinet Exam Questions and answers with a 100% chance of appearing in the actual FCP - FortiManager 7.6 Administrator exam. The Fortinet FCP_FMGMG_AD-7.6 PDF file does not require any installation and is equally suitable for PCs, mobile devices, and tablets. Using a smartphone, you may go through the Fortinet FCP_FMGMG_AD-7.6 exam questions whenever and wherever you desire. The FCP_FMGMG_AD-7.6 PDF files are also printable for making handy notes.
