PMI Agile Certified Practitioner Sample Questions (Q362-Q367):

NEW QUESTION # 362
Which is a report of all the work that is "done"?

- A. Kanban chart
- B. Completion chart
- C. Burndown
- D. Sashimi

Answer: C

NEW QUESTION # 363
An agile team is unable to complete all its planned sprint user stories, which results in a decrease of its planned sprint velocity. What should the team do?

- A. Increase the duration of the next sprint to accommodate the incomplete user stories and maintain velocity.
- B. Work with the product owner to create a spike with another agile team.
- C. Re-estimate the incomplete stories for the next sprint because its relative size has changed.
- D. Re-estimate the sprint's completed stories to increase and adjust the sprint's velocity.

Answer: D

NEW QUESTION # 364
A scrum team is working on an important project with a short deadline. To save time and reduce overhead, the product owner proposes that the regular sprint reviews should be cancelled and replaced with a review of each release according to the release plan.
What should the scrum master do?

- A. Explain to the product owner why the sprint reviews are now replaced by release reviews as inspect and adapt is a key principle in Scrum.
- B. Review the release plan with the product owner and invite the stakeholders to a series of release reviews.
- C. Review the metrics and the process to determine where the overhead could be further reduced to speed up delivery.
- D. Explain to the product owner that getting feedback early and often from stakeholders is important so necessary changes can be made quickly.

Answer: D

Explanation:
Sprint reviews are a crucial Scrum event for obtaining early feedback from stakeholders, which allows the team to inspect the progress and adapt the product accordingly. By skipping sprint reviews in favor of only release reviews, the team loses the opportunity to make adjustments and improvements throughout the project.
The scrum master should emphasize the importance of regular feedback and ensure the team stays aligned with Scrum principles for continuous improvement and value delivery.

NEW QUESTION # 365
Which chart shows the total number of story points completed through the end of each iteration?

- A. Daily Burndown chart
- B. Cumulative story point Burndown chart
- C. Iteration Burndown chart
- D. Burnup chart

Answer: B

NEW QUESTION # 366

Which of the following statements is an accurate value statement of the Agile Manifesto?

- A. Managing change over managing a plan
- B. Working software over complete specifications
- C. Customer collaboration over contract negotiation
- D. People and places over processes and guidelines

Answer: C
