Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q116-Q121):

NEW QUESTION # 116
Universal Containers is delivering many changes to its Salesforce system. Adoption reports are discovering that many features are unused. The steering committee wants this to change and is looking to the architect for advice.
What should an architect recommend to overcome this?

- A. Sending weekly communication emails reporting on least engaged users
- B. Using Lightning Web Components for every user interface.
- C. Stop development until current features start being used.
- D. Adopting user centered design to understand user needs before building the solution.

Answer: D

NEW QUESTION # 117

Universal Containers is reviewing its environment strategy. They have identified a need for a new hotfix environment to resolve any urgent production issues.

Which two sandbox types would be appropriate to use as the hotfix environment?

Choose 2 answers

- A. Developer Pro sandbox
- B. Developer sandbox
- C. Partial Copy sandbox
- D. Full sandbox

Answer: A,D

NEW QUESTION # 118

Universal Containers (UC) has two subsidiaries which operate independently. UC has made the decision to operate two of separate Salesforce orgs, one for each subsidiary. However, certain functions and processes between the two orgs must be standardized. Which two approaches should UC take to develop customizations once, and make them available in both orgs? Choose 2 answers

- A. Set up Salesforce-to-Salesforce to deploy the functionality from one org to the other
- B. Create a package in a Developer Edition org and deploy it to both production orgs
- C. Create a managed package in a sandbox and deploy it to both production orgs
- D. Develop the functionality in a sandbox and deploy it to both production orgs

Answer: B

NEW QUESTION # 119

Universal Containers (UC) is using Salesforce for their sales organization. The sales users have created several dashboards using multiple running users. The admins have also added a few workflow rues that send email notifications to some sales users. What should an Architect consider while planning the deployment of such components? Choose 2 answers

- A. User Fields are preserved during metadata deployments and Salesforce attempts to locate a matching user in the target org during deployment.
- B. If the username in the source org doesn't exist in the target org, the deployment will continue and Salesforce will automatically create the username in the target org.
- C. User fields are ignored during metadata deployments and all such users need to be manually created in the target org before starting the deployment.
- D. If the username in the source org doesn't exist in the target org, the deployment will stop until the usernames are resolved or removed.

Answer: A,D

NEW QUESTION # 120

Universal Containers (UC) has been following the Waterfall methodology to deliver customer apps in Salesforce. As the business is growing at scale and with demand to incorporate features and functionality at faster pace, UC is finding the Waterfall approach is not an optimal process, and intends to transition towards an agile development methodology. Which are the two strengths of using an agile development methodology? Choose 2

- A. All elements of the build are fully understood before work begins, reducing risk of unpleasant surprises.
- B. There are many small releases of functional code, allowing stakeholders to see and touch the work in progress.
- C. Careful documentation is done at each step of the process so a target body of knowledge is available for inspection.
- D. The project requirements in later phases are expected and accommodated by the process, by design.

Answer: B,D

NEW QUESTION # 121

......
