

High-Quality Exam Cram 300-540 Pdf & Fast Download

Test 300-540 Prep: Designing and Implementing Cisco Service Provider Cloud Network Infrastructure

P.S. Free 2026 Cisco 300-540 dumps are available on Google Drive shared by Exam4Tests: <https://drive.google.com/open?id=1DXwCaZEGvrUHB65Q4v07FS39yQ9Lgrjm>

The cost for the registration of the certification is considerably expensive, it varies from 100\$ to 1000\$. That is why Exam4Tests has created budget-friendly and updated prep material compared to other websites that do not assure the passing of the exam. We also assure you that the sum won't be wasted, and you won't have to pay for the certification a second time. For customer satisfaction, we also offer you a demo version of the actual 300-540 Dumps so that you may check their validity before even buying them.

Cisco 300-540 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Virtualized Architecture	25%	- IaaS constraints, VLAN scale, segmentation - Virtual machine and container orchestration - Cloud service models: IaaS, PaaS, SaaS, FaaS - NFVI design, resource allocation, multi-tenancy
Topic 2: Cloud Interconnect	25%	- Connectivity options: direct connect, MPLS, segment routing - WAN optimization, overlay networks, peering strategies - Latency, redundancy, traffic engineering for hybrid environments - Interconnection with public cloud, on-prem, carrier-neutral facilities

Topic 3: Security	15%	- BGP Flowspec, TACACS+, MACsec, zero-trust principles - Infrastructure protection: ACL, uRPF, RTBH, router hardening - Control/management plane security, API protection - Segmentation, encryption, TLS/mTLS, threat mitigation
Topic 4: Service Assurance and Optimization	15%	- Monitoring, telemetry, performance metrics, troubleshooting - Fault management, SLA compliance, analytics - QoS design, traffic optimization, capacity planning
Topic 5: High Availability	20%	- ECMP, BGP multi-path, failure detection and failover - Redundancy models for VNFs and distributed infrastructure - Recovery procedures, graceful degradation, business continuity

Test Cisco 300-540 Prep & 300-540 Test Guide Online

Our 300-540 training guide always promise the best to service the clients. We are committing in this field for many years and have a good command of the requirements of various candidates. Carefully testing and producing to match the certified quality standards of 300-540 Exam Materials, we have made specific statistic researches on the 300-540 practice materials. And our pass rate of the 300-540 study engine is high as 98% to 100%.

Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q105-Q110):

NEW QUESTION # 105

Carrier-neutral facilities offer connectivity options to cloud providers through which of the following?
(Choose two)

- A. Public internet gateways
- B. Dial-up connections
- C. Direct connect services
- D. Dedicated leased lines

Answer: C,D

NEW QUESTION # 106

NetFlow and IPFIX are protocols used for:

- A. Physical layer diagnostics
- B. Network configuration
- C. Data encryption
- D. Traffic analysis and monitoring

Answer: D

NEW QUESTION # 107

Which of the following is used to restrict access to network resources through policies?

- A. BGP flowspec
- B. TACACS
- C. MACSEC
- D. ACL

Answer: D

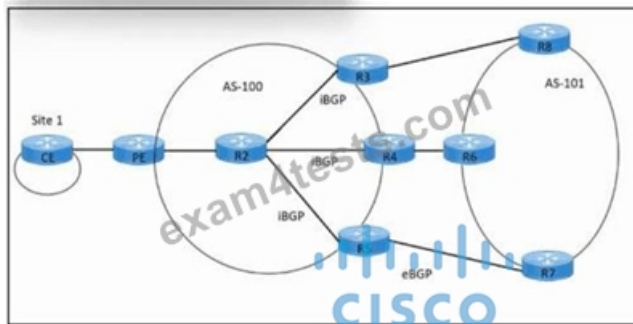

NEW QUESTION # 108

Logging with syslog is important for:

- A. Direct packet routing
- B. Enhancing user experience
- C. Collecting and analyzing system events
- D. Network performance tuning

Answer: C

NEW QUESTION # 109

Refer to the exhibit. An engineer working for a private service provider with an employee ID 5207:22:409 must configure iBGP multipath load sharing across the three paths. Which two commands must be run on the PE router? (Choose two.)

- A. ip load-sharing ibgp 3
- B. maximum-paths ibgp 3
- C. ip load-sharing per-destination
- D. router bgp 101
- E. router bgp 100

Answer: B,E

Explanation:

In the diagram, the PE and R2, R3, R4, R5 belong to AS 100. The PE router runs BGP process AS 100, so its BGP configuration must start with:

router bgp 100

To perform iBGP multipath load sharing across three equal-cost internal BGP paths, BGP must be instructed to keep and use multiple iBGP paths in the routing table. This is done with:

router bgp 100

maximum-paths ibgp 3

* maximum-paths ibgp 3 tells BGP to install up to three iBGP paths to the same prefix, enabling CEF to load-share across those paths.

* router bgp 100 is required because the PE is in AS 100, not 101.

Other options:

* ip load-sharing per-destination affects CEF behavior but does not enable BGP iBGP multipath by itself and is not specific to three iBGP paths.

* ip load-sharing ibgp 3 is not a valid IOS BGP command.

* router bgp 101 would configure the wrong AS and break the iBGP relationships shown in AS-100.

Thus, the correct commands on the PE to achieve iBGP multipath load sharing over the three internal paths are maximum-paths ibgp 3 and router bgp 100, corresponding to A and E.

NEW QUESTION # 110

.....

We understand you not only consider the quality of our Designing and Implementing Cisco Service Provider Cloud Network Infrastructure prepare torrents, but price and after-sales services and support, and other factors as well. So our Designing and Implementing Cisco Service Provider Cloud Network Infrastructure prepare torrents contain not only the high quality and high accuracy 300-540 Test Braindumps but comprehensive services as well. By the free trial services you can get close realization with
