

Certification CCDAK Sample Questions & Exam CCDAK Review

DOWNLOAD the newest iPassleader CCDAK PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1ORQygsJhpSSq1yurCUKHvko2XEXewG>

Our CCDAK exam braindumps provide you with a reliable, rewarding and easy way to know and grasp what your actual exam really requires. Our professionals regard them as the top CCDAK preparation questions for their accuracy, precision and superbly informative content. If you choose our CCDAK Practice Engine, you will find it is the best tool ever for you to clear the exam and get the certification.

The CCDAK certification exam is designed to test the knowledge and skills of developers in building Kafka-based applications. CCDAK exam covers topics such as Kafka architecture, configuration, security, performance tuning, and application development using Kafka APIs. Confluent Certified Developer for Apache Kafka Certification Examination certification is vendor-neutral, meaning it is not tied to any particular distribution of Kafka, and is based on the most up-to-date version of Kafka available at the time of the exam.

The CCDAK certification exam is a hands-on exam, where developers are required to complete a series of tasks in a Kafka cluster. The tasks include creating topics, producing and consuming messages, configuring Kafka brokers, and writing Kafka applications. CCDAK Exam is designed to test developers' ability to apply their knowledge of Kafka concepts in real-world scenarios and to ensure that they have the necessary skills to build and manage Kafka applications.

Confluent CCDAK Certification Exam covers a range of topics, including Kafka core concepts, producers and consumers, Kafka Streams, Kafka Connect, and security. CCDAK exam is designed to test a developer's understanding of Kafka architecture and best practices for building scalable and reliable Kafka applications. CCDAK exam is conducted online and consists of 60 multiple-choice questions that need to be answered in 90 minutes.

Exam CCDAK Review - CCDAK Passleader Review

At iPassleader, we are aware that every applicant of the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) examination is different. We know that everyone has a distinct learning style, situations, and set of goals, therefore we

offer Confluent CCDAK updated exam preparation material in three easy-to-use formats to accommodate every exam applicant's needs. This article will go over the three formats of the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) practice material that we offer.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q120-Q125):

NEW QUESTION # 120

Which of these joins does not require input topics to be sharing the same number of partitions?

- A. KTable-KTable join
- B. KStream-KTable join
- C. KStream-KStream join
- **D. KStream-GlobalKTable**

Answer: D

Explanation:

GlobalKTables have their datasets replicated on each Kafka Streams instance and therefore no repartitioning is required

NEW QUESTION # 121

In Avro, removing a field that does not have a default is a __ schema evolution

- **A. backward**
- B. forward
- C. breaking
- D. full

Answer: A

Explanation:

Clients with new schema will be able to read records saved with old schema.

NEW QUESTION # 122

A consumer is configured with `enable.auto.commit=false`. What happens when `close()` is called on the consumer object?

- A. The uncommitted offsets are committed
- B. The group coordinator will discover that the consumer stopped sending heartbeats. It will cause a rebalance after `session.timeout.ms`
- **C. A rebalance in the consumer group will happen immediately**

Answer: C

Explanation:

Calling `close()` on consumer immediately triggers a partition rebalance as the consumer will not be available anymore.

NEW QUESTION # 123

What will happen if a producer tries to send messages to a topic that does not exist in the Kafka cluster?

- A. The Producer "send()" call will block indefinitely.
- B. The brokers will hold the messages until a user creates a topic for the messages.
- C. The messages will be sent to a topic called `unnamed_topic_1`.
- **D. Messages will only be sent if auto topic creation is enabled.**

Answer: D

NEW QUESTION # 124

A stream processing application is consuming from a topic with five partitions. You run three instances of the application. Each instance has `num.stream.threads=5`.

You need to identify the number of stream tasks that will be created and how many will actively consume messages from the input topic.

- A. 5 created, 5 actively consuming
- **B. 15 created, 15 actively consuming**
- C. 15 created, 5 actively consuming
- D. 5 created, 1 actively consuming

Answer: B

Explanation:

In Kafka Streams, the number of stream tasks = number of input partitions × num.stream.threads × number of instances, but only as many as the number of partitions can actively consume at once.

However, in this case, Kafka Streams assigns one task per partition, and because there are 5 partitions and 15 threads (3 instances × 5 threads), 15 tasks are created, and all 15 can be active depending on processing topology.

From Kafka Streams Developer Guide:

"Kafka Streams creates one task per input partition. If you increase the number of stream threads, it runs multiple tasks in parallel within a single instance." So, 15 stream tasks will be created and 15 will be actively consuming.

Reference: Apache Kafka Streams Documentation > Concepts > Tasks and Threads

NEW QUESTION # 125

.....

Our website platform has no viruses and you can download CCDAK test guide at ease. If you encounter difficulties in installation or use of CCDAK exam torrent, we will provide you with remote assistance from a dedicated expert to help you and provide 365 days of free updates that you do not have to worry about what you missed. Whether you are a worker or student, you will save much time to do something whatever you want. It only needs 5-10 minutes after you pay for our CCDAK learn torrent that you can learn it to prepare for your exam. Actually, if you can guarantee that your effective learning time with CCDAK test preps are up to 20-30 hours, you can pass the exam.
