

# Oracle 1z0-1104-25 PDF Format for Easy Access

P.S. Free & New 1z0-1104-25 dumps are available on Google Drive shared by ExamsReviews: <https://drive.google.com/open?id=13XSpN4fGcS0kcv8DpPMvBkj1tqrciGQz>

Users of this format don't need to install excessive plugins or software to attempt the 1z0-1104-25 web-based practice exams. Another format of the 1z0-1104-25 practice test is the desktop-based software. This 1z0-1104-25 Exam simulation software needs installation only on Windows computers to operate. The third format of the ExamsReviews Oracle 1z0-1104-25 exam dumps is the 1z0-1104-25 Dumps PDF.

## Oracle 1z0-1104-25 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>Protecting Data: This section of the exam measures the skills of Cloud Security Professionals and highlights data security practices in OCI. It tests knowledge of using the Key Management Service for encryption keys, managing secrets in the OCI Vault, and applying features of OCI Data Safe to ensure sensitive data remains protected.</li></ul>   |
| Topic 2 | <ul style="list-style-type: none"><li>Detecting, Remediating, and Monitoring OCI Resources: This section of the exam measures the skills of OCI Administrators and emphasizes monitoring and maintaining security posture across cloud resources. It focuses on the use of Cloud Guard, security zones, and the Security Advisor. Candidates also need to understand how to identify rogue users with threat intelligence, as well as use monitoring, logging, and event services for continuous visibility into performance and security.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>OCI Security Introduction: This section of the exam measures the skills of Cloud Security Professionals and covers the basics of security in Oracle Cloud Infrastructure. It introduces the shared security responsibility model, the core principles of security design, and the use of foundational security services to secure deployments on OCI.</li></ul>  |

## 1z0-1104-25 Test Voucher, 1z0-1104-25 Reliable Real Test

But with proper planning, firm commitment, and complete 1z0-1104-25 exam preparation will enable you to make this Oracle 1z0-1104-25 easiest. Are you ready to accept this challenge? Looking for a simple, smart, and quick way of completing Oracle 1z0-1104-25 Exam Preparation? If your answer is yes then you must try ExamsReviews 1z0-1104-25 Questions.

### Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q18-Q23):

#### NEW QUESTION # 18

Within OCI IAM identity domains, the AD Bridge component serves a critical role. How does the AD Bridge functionality specifically enhance Identity and Access Management (IAM) practices?

- A. It strengthens access security by providing an additional layer of authentication through AD integration.
- B. It simplifies user provisioning by enabling automated synchronization of user accounts and group memberships from an existing Microsoft Active Directory (AD) environment.
- C. It facilitates delegated administration, allowing authorized AD users to manage specific resources within the OCI identity domain.
- D. It directly integrates with OCI MFA providers, allowing for seamless enforcement of MFA for users authenticated through AD credentials.

Answer: B

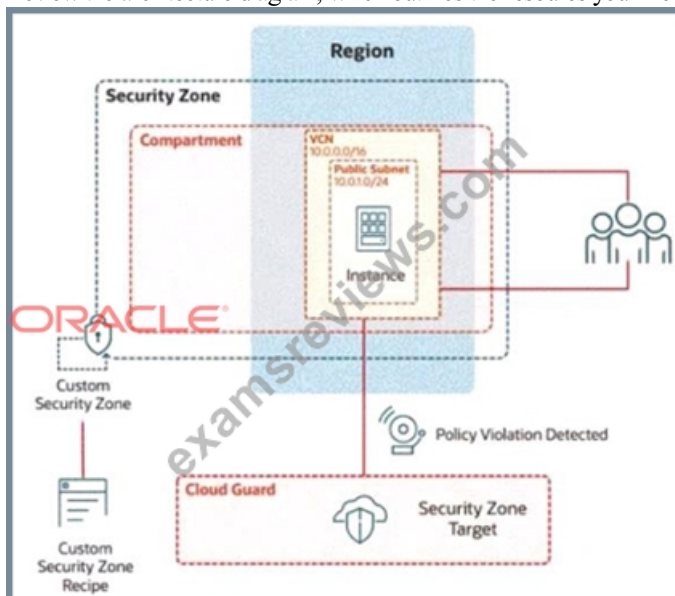

#### NEW QUESTION # 19

##### Challenge 2 - Task 1

In deploying a new application, a cloud customer needs to reflect different security postures. If a security zone is enabled with the Maximum Security Zone recipe, the customer will be unable to create or update a resource in the security zone if the action violates the attached Maximum Security Zone policy.

As an application requirement, the customer requires a compute instance in the public subnet. You therefore, need to configure Custom Security Zones that allow the creation of compute instances in the public subnet.

Review the architecture diagram, which outlines the resources you'll need to address the requirement:

Preconfigured

To complete this requirement, you are provided with the following:  
Access to an OCI tenancy, an assigned compartment, and OCI credentials

Required IAM policies

Task 2: Create a Security Zone

Create a security Zone named IAD\_SAP-PBT-CSZ-01 in your assigned compartment and associate it with the Custom Security Zone Recipe (IAD-SAP-PBT-CSP-01) created in the previous task.

Enter the OCID of the created Security zone in the box below.

**Answer:**

Explanation:

See the solution below in Explanation.

Explanation:

To create a Security Zone named IAD\_SAP-PBT-CSZ-01 in your assigned compartment and associate it with the Custom Security Zone Recipe IAD-SP-PBT-CSP-01 created in the previous task, follow these steps based on the Oracle Cloud Infrastructure (OCI) Security Zones documentation.

Step-by-Step Solution for Task 2: Create a Security Zone

\* Log in to the OCI Console:

\* Use your OCI credentials to log in to the OCI Console (<https://console.us-ashburn-1.oraclecloud.com>).

\* Ensure you have access to the assigned compartment.

\* Navigate to Security Zones:

\* From the OCI Console, click the navigation menu (hamburger icon) on the top left.

\* Under Governance and Administration, select Security Zones.

\* Create a New Security Zone:

\* In the Security Zones dashboard, click the Create Security Zone button.

\* Configure the Security Zone Details:

\* Name: Enter IAD\_SAP-PBT-CSZ-01.

\* Compartment: Select the assigned compartment provided.

\* Description: (Optional) Add a description, e.g., "Security Zone for public subnet compute instances."

\* Associate the Custom Security Zone Recipe:

\* In the Recipe section, select the custom recipe IAD-SP-PBT-CSP-01 created in Task 1 from the dropdown list.

\* Ensure the recipe is correctly associated to enforce the policy allowing compute instances in the public subnet.

\* Define the Security Zone Scope:

\* Under Resources to Protect, select the compartment or specific resources (e.g., the VCN with CIDR 10.0.0.0/16 and public subnet 10.0.10.0/24) to apply the security zone.

\* Check the box to include all resources in the selected compartment if applicable.

\* Create the Security Zone:

\* Click Create to finalize the security zone creation.

\* Once created, note the OCID of the security zone from the security zone details page. The OCID will be a unique identifier starting with ocid1.securityzone.

\* Verify the Security Zone:

\* Go to the Security Zones tab and locate IAD\_SAP-PBT-CSZ-01.

\* Confirm the associated recipe (IAD-SP-PBT-CSP-01) and the applied policies.

OCID of the Created Security Zone

\* The exact OCID will be generated upon creation (e.g., ocid1.securityzone.oc1..<unique\_string>).

Please enter the OCID displayed in the OCI Console after completing Step 7.

**NEW QUESTION # 20**

You are a security architect at your organization and have noticed an increase in cyberattacks on your applications, including Cross-Site Scripting (XSS) and SQL Injection. To mitigate these threats, you decide to use OCI Web Application Firewall (WAF).

Which type of OCI WAF rule should you configure to protect against these attacks?

- A. Access control rule
- B. Rate Limiting rule
- C. Protection rule
- D. Encryption rule

**Answer: C**

**NEW QUESTION # 21**

A company is securing its compute instances (VMs and Bare Metal Machines) in Oracle Cloud infrastructure (OCI) using a network firewall. As shown in the diagram, traffic flows from the internet Gateway (IGW) to the firewall in the Public DMZ Subnet, and then

to the compute instances in the Public Subnet.

When configuring security lists and network security groups (NSGs) in this setup, what should they consider?

- A. Ensure that any security list or NSG rules allow the traffic to enter the firewall for appropriate evaluation.
- B. Add stateful rules to the security list attached to the firewall subnet or include the firewall in an NSG containing stateful rules for better performance.
- C. If the policy used with the firewall has no rules specified, the firewall allows all traffic.
- D. Security list and NSG rules associated with the firewall subnet and VNICs are evaluated after the firewall.

Answer: A

#### NEW QUESTION # 22

Your organization needs to implement strong password policies for users in OCI.

Which of the following statements is TRUE about password policies in OCI IAM?

- A. The default password policy cannot be modified.
- B. Custom password policies allow for granular control over password complexity.
- C. Only one password policy can be applied to all users in a domain.
- D. Simple password policies are suitable for production environments.

Answer: B

#### NEW QUESTION # 23

.....

In order to pass Oracle certification 1z0-1104-25 exam, selecting the appropriate training tools is very necessary. And professional study materials about Oracle certification 1z0-1104-25 exam is a very important part. Our ExamsReviews can have a good and quick provide of professional study materials about Oracle Certification 1z0-1104-25 Exam. Our ExamsReviews IT experts are very experienced and their study materials are very close to the actual exam questions, almost the same. ExamsReviews is a convenient website specifically for people who want to take the certification exams, which can effectively help the candidates to pass the exam.
