If you choose to use Prep4sureGuide's products, Prep4sureGuide can help you 100% pass your first time to attend Cisco Certification 200-901 Exam. If you fail the exam, we will give a full refund to you.

## Prerequisites

The Cisco 200-901 test has no official prerequisites. However, it is pretty important to have extensive knowledge of its subject areas. First of all, the students should possess the competence in developing and maintaining applications built on top of Cisco platforms. Additionally, it is essential to have the basic skills in PC operating system navigation and practical experience in working with Python.

## Difficulty in Attempting Cisco DevNet Associate Exam v1.0 (200-901) Exam

The Cisco DevNet Associate Exam v1.0 (200-901) Exam is an exam of moderate level. When you attempt this Cisco certification exam, understand the importance of experience and knowledge. Knowledge is one of the keys to pass the DevNet Associate Exam v1.0 (200-901) exam on first attempt. Experience is also equally important as it helps in solving many questions on first attempt.

The content of this exam is relatively less. However, you do need to clear the objectives mentioned earlier. **Cisco 200-901 exam dumps** is one of the most important references to prepare for DevNet Associate Exam v1.0 (200-901) Exam. All the questions and answers given in Cisco 200-901 exam dumps are selected after a thorough review. This makes it easier for you to prepare for your DevNet Associate Exam v1.0 (200-901) exam with less effort and more confidence. Achieve your goals with less effort and more confidence. Assessment Test for DevNet Associate Exam v1.0 (200-901) Exam assesses your level of preparation and helps you choose the right study plan to organize your time efficiently while preparing for your DevNet Associate Exam v1.0 (200-901) exam.

## Cisco 200-901 Exam: Details and Features

The Cisco 200-901 test lasts for 2 hours and can be taken either in English or Japanese. You will receive access to scheduling your exam after paying the enrollment fee of \$300. The exact number of questions in this certification test and their formats are unknown before the date of the real exam. Cisco also doesn't reveal the passing scores for its tests as they are subject to change without notice.

Since very little is known about the 200-901 exam pattern, it is crucially important that you prepare for it thoroughly and cover all the topics beforehand. The best way to fulfill that task is to enroll for the official course "Developing Applications and Automating Workflows using Cisco Platforms (DEVASC)" available on the certification webpage.

Once you obtain your certificate, it will be valid for 3 years. After this period, you must recertify to maintain your status. You can do that by taking the latest release of your certification exam, completing various education activities offered by Cisco, or a combination of both.

### Cisco DevNet Associate Exam Sample Questions (Q137-Q142):

#### NEW QUESTION # 137

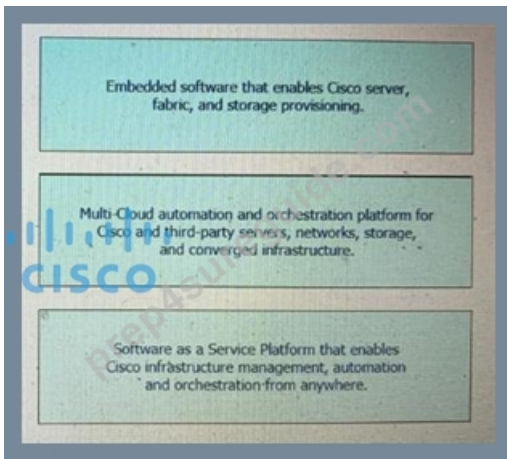

Drag and drop the capability on the left onto the Cisco compute management platform that supports the capability on the right.

Multi-Cloud automation and orchestration platform for Cisco and third-party servers, networks, storage, and converged infrastructure.	UCS Manager
Software as a Service Platform that enables Cisco infrastructure management, automation and orchestration from anywhere.	UCS Director
Embedded software that enables Cisco server, fabric, and storage provisioning.	Intersight

**Answer:**

Explanation:

Multi-Cloud automation and orchestration platform for Cisco and third-party servers, networks, storage, and converged infrastructure.	UCS Director
Software as a Service Platform that enables Cisco infrastructure management, automation and orchestration from anywhere.	UCS Manager
Embedded software that enables Cisco server, fabric, and storage provisioning.	Intersight

### NEW QUESTION # 138

Refer to the exhibit.

```
def process_devices(dnac, token):  
    url = "https://{}/api/v1/network-device".format(dnac['host'])  
    headers["x-auth-token"] = token  
    response = requests.get(url, headers=headers, verify=False)  
    data = response.json()  
    for item in data['response']:  
        print(item["hostname"], " ", item["managementIpAddress"])
```

What is the function of the python script?

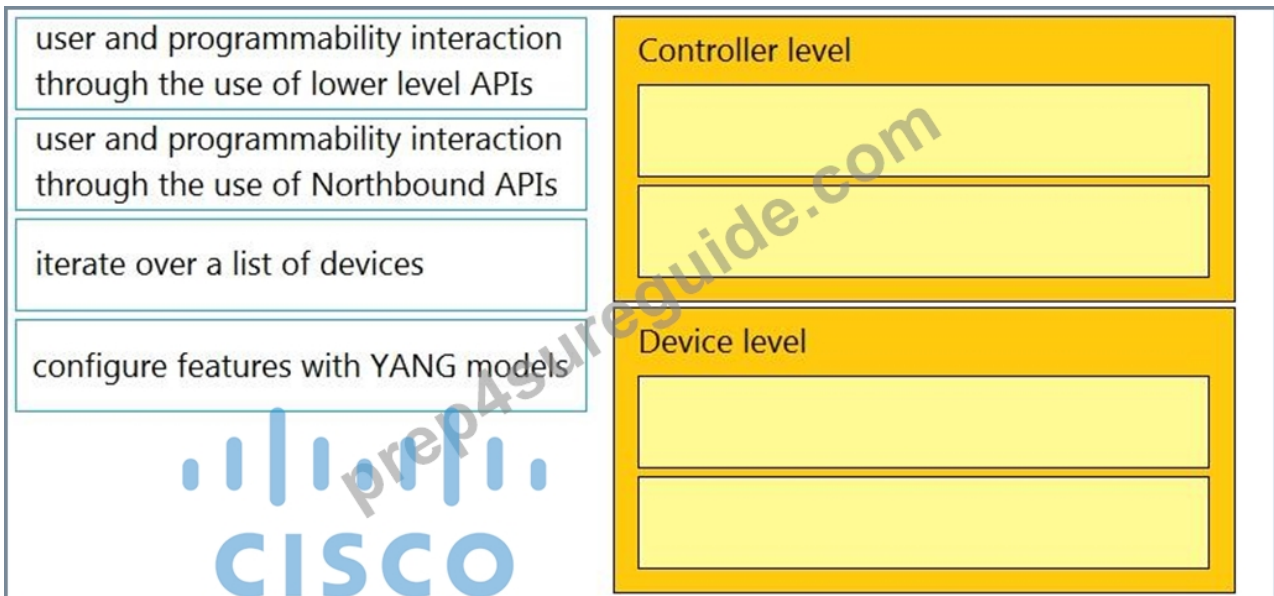

- A. Iterate over a list of network devices and write all device type and associated management IP address.
- B. For each device that is returned, display the device and, for each device, print the device name and management IP address.
- C. Count and print the total number of available devices.
- **D. Loop through the returned list of network devices and, for each device, print the device name management IP address.**
- E. Iterate over a list of network devices and write all device names and management IP addresses to an output file.

**Answer: D**

### NEW QUESTION # 139

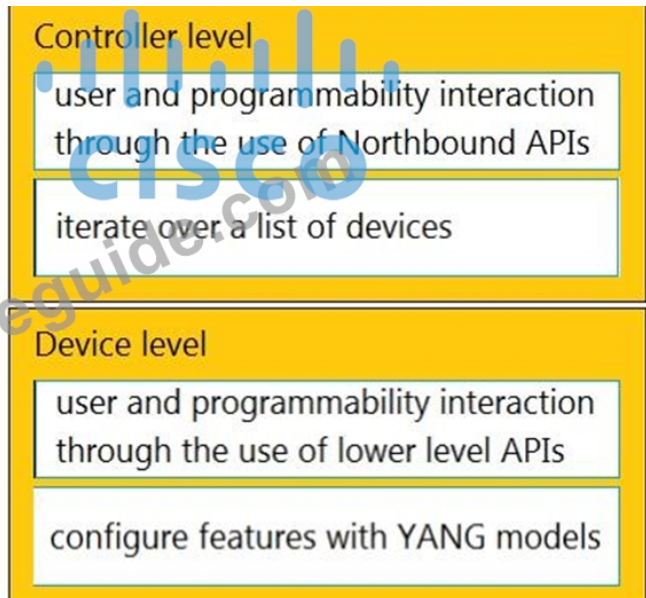

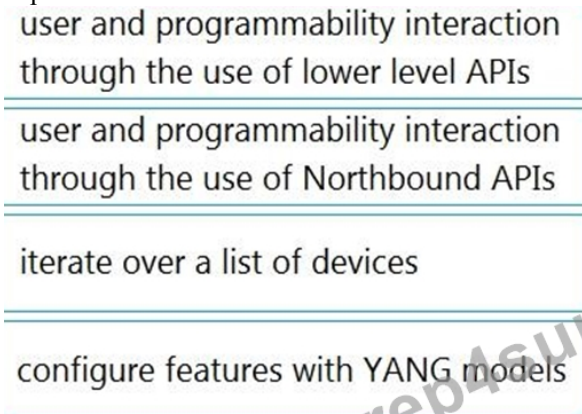

Drag and Drop Question

Drag and drop the types of management from the left onto the levels at which they are performed on the right.

**Answer:**

Explanation:

**NEW QUESTION # 140**

What are two properties of private IP addresses? (Choose two.)

- A. They are controlled globally by an IP address registry.
- **B. They can be repeated within the same local network.**
- C. They can be used to access the Internet directly.
- **D. They are not globally unique.**
- E. They are more secure than public IP addresses.

**Answer: B,D**

Explanation:

Private IP addresses are used within private networks and are not unique globally. They can be reused in different private networks without conflict.

\* Non-unique Addresses: Private IP addresses do not have to be unique globally, allowing them to be reused in different networks.

\* Repetition in Local Networks: They can be repeated within different local networks as they are not routable on the public Internet.

Options C and D correctly describe properties of private IP addresses.

Reference:

**NEW QUESTION # 141**

Refer to the exhibit.

```
#!/bin/bash
<item 1>='date +%b-%d-%y'
<item 2>=/home/usr/path/backup- $\$$ BACKUPTIME.tar.gz
<item 3>=/home/usr/path/data_folder
tar -cpzf  $\$$ DESTINATION  $\$$ SOURCEFOLDER
```

Drag and drop the variables from the left onto the item numbers on the right that match the missing assignments in the exhibit.

The interface shows three source boxes on the left: BACKUPTIME, SOURCEFOLDER, and DESTINATION. On the right, there are three target boxes: <item 1>, <item 2>, and <item 3>. The boxes are arranged in a grid for a drag-and-drop activity.

**Answer:**

Explanation:

The diagram shows three source boxes on the left: BACKUPTIME, SOURCEFOLDER, and DESTINATION. On the right, there are three target boxes: <item 1>, <item 2>, and <item 3>. Dashed lines indicate the connections: BACKUPTIME connects to <item 1>, SOURCEFOLDER connects to <item 3>, and DESTINATION connects to <item 2>.

Explanation

1 - A, 2 - C, 3 - B

The diagram shows three source boxes on the left: BACKUPTIME, DESTINATION, and SOURCEFOLDER. These are the variables available for assignment to the item numbers.

**NEW QUESTION # 142**
