HPE Aruba Networking Switching Associate Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

A Solutions Architect wants to proactively monitor and troubleshoot intermittent network issues using on-box analytics. The goal is to create a script that runs directly on an HPE Aruba Networking CX switch to monitor the state of OSPF neighbors and automatically collect diagnostic logs if a neighbor relationship flaps.

Which specific software feature, unique to AOS-CX, is designed for this type of intelligent, on-box monitoring and event-driven automation?

- A. The industry-standard SNMP agent
- B. The built-in packet capture utility (tcpdump)
- C. The out-of-band management (OOBM) port
- **D. The Aruba Network Analytics Engine (NAE)**

Answer: D

NEW QUESTION # 34

What is the primary purpose of Spanning Tree Protocol (STP) in Ethernet networks?

- A. Loop prevention
- B. Quality of Service (QoS) management
- C. Network segmentation
- D. Load balancing

Answer: A

NEW QUESTION # 35

A Security Analyst is explaining to a colleague why a standard switch cannot, by itself, stop the spread of a virus between two computers that are in the same VLAN. Which statements accurately describe the function of a standard Layer 2 switch within the OSI model? (Select all that apply.)

- A. It breaks up broadcast domains but not collision domains.
- B. It forwards traffic based on the destination MAC address in the frame.
- C. It is unaware of the IP addresses or TCP ports being used in the traffic it forwards.
- D. It operates primarily at the Network Layer (Layer 3).
- E. It creates a single, large broadcast domain for all connected ports.
- F. It operates primarily at the Data Link Layer (Layer 2).

Answer: B,C,F

NEW QUESTION # 36

Which network category applies to a SOHO internal network?

- A. Internet
- B. WAN
- C. SD-WAN
- D. LAN

Answer: D

Explanation:

LAN is a group of computer devices that are geographically in the same place. For example, a group of devices within a building can be considered a LAN.

LANs are used in several settings:

- Small Office/Home Office (SOHO)
- Office LANS
- Building LANs
- Campus LANs

NEW QUESTION # 37

A Junior Network Engineer is troubleshooting a user's connectivity issue. The user is on the 10.10.10.0/24 network and is trying to reach a server on the 10.10.20.0/24 network. The user's traffic must pass through a router. What information must the user's computer have in its IP configuration to send traffic to a different subnet?

- A. A default gateway address.
- B. The MAC address of the server.
- C. A WINS server address.
- D. The IP address of a DNS server.

Answer: A

NEW QUESTION # 38
