問題 #28

Major business transformation change initiatives require focus on

- A. Leadership executive support and change management.
- B. Process owners and a good communication plan.
- C. Process owners and customer engagement.

- D. Leadership development and cultural change.

答案： A

解題說明：

For successful transformation, organizations must secure executive sponsorship, ensure leadership commitment, and implement structured change management to handle resistance and align stakeholders.

"Executive leadership and robust change management are critical enablers for transformation initiatives.

These provide authority, direction, and ensure adoption of new ways of working."

問題 #29

What is one difference between primary processes and support processes?

- A. Support processes do not provide value directly to customers.
- B. Support processes tend to be more complex.
- C. Primary processes are integrated with support processes.
- D. Primary processes have more tasks.

答案： A

解題說明：

Primary processes directly add value for the customer and represent the main value stream of the business.

Support processes, in contrast, enable or facilitate the execution of primary processes but do not directly deliver value to the customer. This distinction is central to process classification in BPM.

問題 #30

What are the commonly known industry reference models?

- A. PCF, SCOR
- B. FEAF, TOGAF
- C. DoDAF, MODAF
- D. APQC, RACI

答案： A

解題說明：

The most commonly known industry reference models are:

* PCF (Process Classification Framework) by APQC - categorizes and standardizes processes across industries.

* SCOR (Supply Chain Operations Reference Model) - provides standardized descriptions for supply chain processes.

These models offer best practices and benchmarking standards, facilitating consistent process design, assessment, and comparison.

"Industry reference models like PCF and SCOR provide frameworks for classifying and assessing processes across organizations.

They support benchmarking and the development of best-in-class process architectures."

問題 #31

What do support processes provide?

- A. The information technology management of the primary processes
- B. The management procedures needed to execute primary processes
- C. The rules and guidelines used to measure, monitor, and control business activities
- D. Required resources and infrastructure needed to support primary processes

答案： D

Support processes are essential for enabling the operation of primary processes. They do not directly deliver value to customers, but they provide critical resources, infrastructure, services, and support that allow primary processes to function effectively. "Support processes include IT services, HR, finance, and other internal services which provide resources and capabilities for primary process execution."
