The sources and content of our 350-501 practice dumps are all based on the real 350-501 exam. And they are the masterpieces of professional expertise in this area with reasonable prices. Besides, they are highly efficient for passing rate is between 98 to 100 percent, so they can help you save time and cut down additional time to focus on the 350-501 Actual Exam review only. We understand your drive for the certificate, so you have a focus already and that is a good start.

Cisco 350-501 exam is an essential certification for professionals looking to demonstrate their expertise in service provider networking and advance their careers in this field. Implementing and Operating Cisco Service Provider Network Core Technologies certification is recognized worldwide and is highly valued by employers in the networking industry. Implementing and Operating Cisco Service Provider Network Core Technologies certification also provides a pathway to higher-level certifications, such as the CCIE Service Provider certification.

Cisco 350-501 certification exam is ideal for professionals looking to advance their careers in the service provider industry. Implementing and Operating Cisco Service Provider Network Core Technologies certification validates the skills required to implement and operate complex service provider networks, making candidates highly sought after by employers. Implementing and Operating Cisco Service Provider Network Core Technologies certification is also an excellent way for candidates to showcase their expertise and differentiate themselves in the highly competitive job market. Passing the Cisco 350-501 Certification Exam is a significant achievement that demonstrates a candidate's commitment to professional development and growth in the field of service provider network technologies.

Cisco 350-501 Exam Fees & 350-501 Exam Pattern

The Cisco 350-501 desktop practice exam software simulates a real test environment and familiarizes you with the actual test format. This Cisco 350-501 practice exam software tracks your progress and performance, allowing you to see how much you've improved over time. We frequently update the Cisco 350-501 Practice Exam software with the latest Cisco 350-501 DUMPS PDF.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q498-Q503):

NEW QUESTION # 498

Which configuration modifies Local Packet Transport Services hardware policies?

- A)
- B)
- C)
- D)

- A. Option D
- B. Option B
- C. Option C
- D. Option A

Answer: C

NEW QUESTION # 499

Refer to the exhibit.

R101 is peering with R102 and R103, and R201 is peering with R202 and R203 using iBGP Labeled Unicast address families. The OSPF area 0 border routers are in a full iBGP Labeled Unicast mesh, and VPNv4 routes are exchanged directly between PE routers R101 and R201 through iBGP. Which address family-level configuration must be applied on ABR R102 on ABR R102 to support a Unified MPLS routing architecture with partitioned IGP domains?

- A.
- B.
- C.
- D.

Answer: B

Explanation:

In a Unified MPLS routing architecture with partitioned IGP domains, it is essential to ensure that the iBGP Labeled Unicast address families are correctly configured to facilitate the exchange of VPNv4 routes directly between PE routers. In this case, ABR R102 should be configured with the address family-level configuration depicted in Option A to support this architecture. This configuration ensures that R101 can peer with both R102 and R103, and similarly, R201 can peer with R202 and R203 using iBGP Labeled Unicast address families. Reference = Implementing and Operating Cisco Service Provider Network Core Technologies

NEW QUESTION # 500

Refer to the exhibit.

An engineer is implementing BGP selective prefix suppression. The router must advertise only 10.16.4.0/24, 10.16.5.0/24, and summarized route 10.16.0.0/21, and suppress 10.16.6.0/24. Which configuration must the engineer apply to the router?

- A)
- B)
- C)
-

- A. Option D
- B. Option C
- C. Option A
- D. Option B

Answer: D

NEW QUESTION # 501

Refer to the exhibit.

ASN 64501 currently reaches the networks under the 10.0.0.0/8 prefix via the North_B router, which is a slow backup link. The administrator of ASN 64502 wants traffic from ASN 64501 to 10.0.0.0/8 to travel via the primary link North_A. Which change to the network configuration accomplishes this task?

- A. Set a Lower Weight value for incoming traffic on North_A
- B. Set a higher local preference between North_A and South_A
- **C. Set a lower MED between North_B and South_B**
- D. Advertise the 10.0.0.0/8 prefix through North_B and specific subnets through North_A

Answer: C

NEW QUESTION # 502

Refer to the exhibit.

Refer to the exhibit. In the service provider network, routers PE1, PE2, and PE4 have access to the internet and provide access to customer networks. Router PE3 is used for access to other customer systems. In accordance with a new SLA, an engineer is updating settings on this network so that router CE1 accesses the internet via PE1 instead of PE2. Which two tasks must the engineer perform to complete the process? (Choose two.)

- **A. On PE2, configure the CE1 VRF with import route target 101:101.**
- **B. On PE1, configure the internet VRF with import route target 102:102.**
- C. On PE1 and PE4, configure the internet VRF with import route targets 102:102 and 104:104.
- D. On PE2 and PE3, configure the internet VRF with import route target 101:101.
- E. On PE2, configure the internet VRF with import route target 102:102.

Answer: A,B
