Free PDF Juniper - JN0-105 - Perfect Latest Junos, Associate (JNCIA-Junos) Exam Cram

Our JN0-105 prep torrent boosts the highest standards of technical accuracy and only use certificated subject matter and experts. We provide the latest and accurate JN0-105 exam torrent to the client and the questions and the answers we provide are based on the real exam. We can promise to you the passing rate is high and about 98%-100%. Our JN0-105 Test Brindumps also boosts high hit rate and can stimulate the exam to let you have a good preparation for the JN0-105 exam. Your success is bound with our JN0-105 exam questions.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q61-Q66):

NEW QUESTION # 61

How many rescue configuration files are supported on a Junos device?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Junos OS supports only 1 rescue configuration file on a device. This rescue configuration is a safeguard feature that allows network administrators to revert to a known good configuration in case of a configuration error or issue, ensuring network stability.

In Junos OS, each device supports only one rescue configuration file. The rescue configuration is a specific configuration that can be saved and later retrieved if needed. This is used as a fallback configuration that you know works and can be applied in case of an emergency or if the current configuration has issues.

NEW QUESTION # 62

You want to redeploy a Junos device by clearing the existing configuration and resetting it to factory defaults. In this scenario, which command would help to accomplish this task?

- A. request systemstorage cleanup dry-run
- **B. request systemzeroize media**
- C. request systemstorage cleanup
- D. show system storage

Answer: B

Explanation:

The `request system zeroize media` command on a Junos device securely erases all data, including configuration and log files, and resets the device to its factory default settings. This command is used when redeploying a device to ensure no residual data remains from its previous deployment. It's a comprehensive and secure way to clear all configurations and data, making the device as if it were new.

The other commands listed do not perform a full reset to factory defaults; for example, `show system storage` displays storage information, and `request system storage cleanup` offers to delete unnecessary files without resetting the device to factory settings.

NEW QUESTION # 63

What are two examples of exception traffic? (Choose two.)

- A. transit packets
- B. ping to the local device
- **C. log messages**
- **D. routing updates**

Answer: C,D

Explanation:

Exception traffic includes traffic that is not simply forwarded by the router but requires special handling, such as routing updates (B) and log messages (C). These types of traffic are processed by the router's control plane rather than just being forwarded through the data plane.

NEW QUESTION # 64

Which advantage is provided by multiple software processes running in the Junos OS?

- A. Each process is started manually to ensure system stability.
- **B. Each process runs in a protected memory space.**
- C. Each process dependency can be mapped independently.
- D. Each process allocates a fixed amount of CPU resources.

Answer: B

Explanation:

In the Junos OS, multiple software processes run independently in their own protected memory spaces. This design ensures that if one process crashes or encounters an issue, it does not affect the other processes running on the system. This architecture enhances the stability and reliability of the network device, as each process operates independently and securely.

NEW QUESTION # 65

You are asked to configure your device running Junos OS to automatically archive your configuration upon commit. In this scenario, which two methods are supported by the Junos OS? (Choose two)

- A. SCP
- B. FTP
- C. RCP
- D. HTTP

Answer: A,C

Explanation:

Junos OS supports multiple methods for automatically archiving configurations upon commit. Two of the supported methods are SCP (Secure Copy Protocol) and RCP (Remote Copy Protocol). These methods can be configured to save the configuration files to a remote server automatically whenever a commit is made.

Reference:

"You can configure Junos OS to automatically archive the configuration using protocols such as SCP and RCP upon commit."

NEW QUESTION # 66

.....

We are now in an era of technological development. JN0-105 had a deeper impact on our work. Passing the JN0-105 exam is like the vehicle's engine. Only when we pass the exam can we find the source of life and enthusiasm, become active and lasting, and we can have better jobs in today's highly competitive times. To pass the JN0-105 Exam, careful planning and preparation are crucial to its realization. Of course, the path from where you are to where you want to get is not always smooth and direct. Therefore, this is the point of our JN0-105 exam materials, designed to allow you to spend less time and money to easily pass the exam.
