100% Pass 2026 CompTIA Valid XK0-006 Exam Certification Cost

There are many advantages of our XK0-006 pdf torrent: latest real questions, accurate answers, instantly download and high passing rate. You can totally trust our XK0-006 practice test because all questions are created based on the requirements of the certification center. Latest XK0-006 Test Questions are verified and tested several times by our colleagues to ensure the high pass rate of our XK0-006 study guide.

CompTIA Linux+ Certification Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which of the following best describes JSON?

- A. An open-source platform that facilitates the creation and administration of isolated environments
- B. A file format for exchanging information or data between systems
- C. A programming language that developers use to build dynamic websites
- D. A software-based technique that allows a computer to simulate one or more machines so they appear to be real

Answer: B

Explanation:
JSON (JavaScript Object Notation) is a lightweight data-interchange format that is easy for humans to read and write, and easy for machines to parse and generate. JSON is commonly used to transmit data between a server and a client, as it is language-independent and can be used in many environments.

NEW QUESTION # 27
Which of the following passwords is the most complex?

- A. HeSaidShetold
- B. H3sa1dt01d
- C. he$@ID$heTold
- D. H3s@1dSh3t0|d

Answer: D

Explanation:
This password is the most complex because it uses uppercase and lowercase letters, numbers, and multiple special characters, making it significantly harder to guess or brute-force compared to the others.

NEW QUESTION # 28
A Linux administrator needs to create and then connect to the app-01-imagecontainer. Which of the following commands accomplishes this task?

- A. docker exec -dc app-01-image
- B. docker build -ic app-01-image
- C. docker run -it app-01-image
- D. docker start -td app-01-image

Answer: C

Explanation:
The docker run -it command both creates a new container from the specified image and attaches to it interactively, which is exactly what the administrator needs.

NEW QUESTION # 29
A systems administrator wants to check if the ntpd service is configured to start on startup. Which of the following commands will show that information when run?

- A. systemctl start ntpd.service
- B. systemctl is-active ntpd.service
- C. systemctl stop ntpd.service
- D. systemctl is-enabled ntpd.service

Answer: D

NEW QUESTION # 30
A Linux server is not starting up because files in the /boot/partition are corrupt. After the initial GRUB screen, the following message is displayed:
Probing EDD (edd=off to disable)... ok
uncompression error
--system halted
Which of the following steps should the Linux administrator take to recover the system without destroying the existing installation? (Choose two.)

- A. Start up in single-user mode.
- B. Reinstall the kernel packages.
- C. Increase the amount of swap memory.
- D. Replace the hard drive.
- E. Start up the system using rescue boot media.
- F. Reinstall the OS.

Answer: B,E

Explanation:
Using rescue boot media lets you boot the machine, mount the existing partitions, and access the corrupted /boot files without reinstalling the OS.
Reinstalling the kernel packages restores the missing or corrupt files in /boot (e.g., vmlinuz and initramfs), allowing GRUB to load and uncompress the kernel properly.

NEW QUESTION # 31

......
