You will fail and waste time and money if you do not prepare with real and updated JN0-460 Questions.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which action would site-level network administrators be able to perform?

- A. create a config template
- **B. reboot an access point**
- C. modify an RF template

- D. assign access points to the site

Answer: B

Explanation:

In Juniper Mist role-based access control (RBAC), site-level administrators have limited privileges to manage devices within their assigned sites.

They cannot modify organization-level templates or global settings but can perform operational tasks, including rebooting APs or switches and monitoring their status.

This ensures proper delegation of duties while maintaining centralized configuration control.
