A key skill measured here is "validating master schedules."</li> </ul>   |

## APICS Certified in Planning and Inventory Management (CPIM 8.0) Sample Questions (Q327-Q332):

### NEW QUESTION # 327

Which of the following statements best characterizes enterprise resources planning (ERP) systems?

- A. They are expensive but easy to implement.
- B. They track activity from customer order through payment.
- C. They provide real-time planning and scheduling, decision support, available-to-promise (ATP), and capable-to-promise (CTP) capabilities.
- D. They are used for strategic reporting requirements.

### Answer: C

Explanation:

Enterprise resource planning (ERP) systems are software platforms that help organizations manage and integrate the essential parts of their businesses, such as finance, supply chain, operations, human resources, and more. ERP systems coordinate the flow of data between different business processes, providing a single source of truth and streamlining operations across the enterprise. ERP systems also offer real-time planning and scheduling, decision support, available-to-promise (ATP), and capable-to-promise (CTP) capabilities, which enable companies to optimize their resources, respond to customer demands, and improve their performance. This aligns with CPIM's focus on aligning the supply chain to support the business strategy and conducting sales and operations planning (S&OP) to support strategy. Reference: The concepts are covered in detail in Module 1: Business Planning and Strategy (1) and Module 2: Demand Management (2). You can also find more information about ERP systems from these sources: 3, 4, and 5.

### NEW QUESTION # 328

When implementing solutions for information security continuous monitoring, which method provides the MOST interoperability between security tools?

- A. Continuous Integration and Continuous Delivery (CI/CD)
