You can take easy to use the GH-900 Test Dumps, since we have the first-hand information, we will ensure that you will get the latest information.

Microsoft GitHub Foundations Sample Questions (Q30-Q35):

NEW QUESTION # 30

What are some scenarios that can automatically subscribe you to conversations on GitHub?
(Each answer presents a complete solution. Choose three.)

- A. Pushing a commit to the default branch
- B. Being assigned to an issue or pull request
- C. Opening a pull request or issue
- D. Commenting on a thread
- E. Being added as a repo admin

Answer: B,C,D

Explanation:

On GitHub, certain actions automatically subscribe you to conversations so that you receive notifications about further activity in that thread.

Opening a Pull Request or Issue:

Option C is correct because when you open a pull request or issue, you are automatically subscribed to the conversation and will receive notifications for any updates.

Commenting on a Thread:

Option D is correct because commenting on an issue or pull request automatically subscribes you to that thread, ensuring you are notified of further comments or changes.

Being Assigned to an Issue or Pull Request:

Option E is correct because when you are assigned to an issue or pull request, you are automatically subscribed to notifications related to it.

Incorrect Options:

Option A is incorrect because pushing a commit to the default branch does not automatically subscribe you to conversations.

Option B is incorrect because being added as a repo admin does not automatically subscribe you to specific conversations unless you engage with them.

NEW QUESTION # 31

Workflows can reference actions in:

(Each correct answer presents a complete solution. Choose three.)

- A. An enterprise marketplace.
- B. The same repository as your workflow file.
- C. GitHub Packages.
- D. Any public repository.
- E. A published Docker container image on Docker Hub.

Answer: B,D,E

Explanation:

As mentioned in the answer to Question no. 66, GitHub Actions workflows can reference actions from a variety of sources:

Any Public Repository:

Option A is correct. Actions can be sourced from any public GitHub repository.

The Same Repository as Your Workflow File:

Option B is correct. Actions within the same repository as the workflow file can be referenced directly.

A Published Docker Container Image on Docker Hub:

Option E is correct. Workflows can also use actions provided as Docker container images from Docker Hub.

Incorrect Options:

Option C and D are not relevant for directly referencing actions in workflows.

NEW QUESTION # 32

New open source contributors can receive funding from GitHub sponsors:

- A. By including GitHub matching funds.
- B. Using PayPal as a payment processor.
- C. Equal to 95% of the contribution value.
- D. After setting up a sponsored developer profile.

Answer: D

Explanation:

GitHub Sponsors allows developers and organizations to financially support open-source contributors directly on the GitHub platform.

Setting Up a Sponsored Developer Profile:

Option D is correct because before a contributor can receive funding through GitHub Sponsors, they need

NEW QUESTION # 33

An employee needs to find all issues within organization "Avocado" containing text "404 error" and a "guacamole" label. Which of the following steps would be best to search for these results?

- A. Go to "Avocado" organization. Select Issues under a repository. Filter issues with a "guacamole" label.
- B. Enter query org:Avocado label:guacamole "404 error" in the search bar. Select "Issues" in the Filter by section.
- C. Go to the Avocado organization settings. Select Repository defaults under Repository. Scroll to Repository labels and select the 'guacamole' label.
- D. Enter query org:Avocado is:issue label:guacamole "404 error" in the search bar.

Answer: D

Explanation:

GitHub provides a powerful search syntax to filter and find specific issues across repositories in an organization.

Search Query Syntax:

Option A is correct because the query org:Avocado is:issue label:guacamole "404 error" is the best way to search for all issues within the "Avocado" organization that contain the text "404 error" and are labeled with "guacamole". This query is precise and leverages GitHub's advanced search capabilities.

NEW QUESTION # 34

Which of the following statements most accurately describes who can access a private repository Wiki?

- A. Wikis are only viewable by repository admins.
- B. Wikis will not be visible until shared with a specific user.
- C. Wikis are public regardless of whether you have access to the repository.
- D. Wikis can be viewed by the same people who have Read access to the repository.

Answer: D

Explanation:

For private repositories on GitHub, the Wiki is accessible to anyone who has Read access to the repository. This means that if you can view the code and files in the repository, you can also view its Wiki. This makes Wikis a useful tool for documenting projects in a way that is available to all collaborators without requiring special permissions beyond those needed to access the repository itself.

NEW QUESTION # 35

.....
