1Y0-205學習筆記，1Y0-205考古題分享

Fast2test網站在通過1Y0-205資格認證考試的考生中有著良好的口碑。這是大家都能看得到的事實。Fast2test以它強大的考古題得到人們的認可，只要你選擇它作為你的考前復習工具，就會在1Y0-205資格考試中有非常滿意的收穫，這也是大家有目共睹的。現在馬上去網站下載免費試用版本，你就會相信自己的選擇不會錯。

最新的 Citrix Virtual Apps 1Y0-205 免費考試真題 (Q50-Q55):

問題 #50

Scenario: A Citrix Administrator previously configured a Citrix Virtual Desktops Site to use evaluation licenses. The administrator then installed valid advanced licenses on the Citrix License Server and confirmed that licenses show correctly in the licensing console. However, a user reports an issue about logging on to the published desktop. The user receives an error message stating that the evaluation license is about to expire. What should the administrator do to fix this issue?

- A. Remove the evaluation license.
- **B. Change the product edition in Citrix Studio.**
- C. Verify the host name entry in the license file.
- D. Restart the License service.

答案: B

解題說明:

After installing valid licenses on the License Server, the Site must be configured in Citrix Studio to use the correct product edition (for example, Advanced, Enterprise, or Premium). If it remains set to "evaluation," users will continue to see the expiration warning. Updating the product edition in Studio resolves the issue.

問題 #51

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with local storage that contains several logical disk space locations. The administrator would like to reduce the total number of writes on the storage. What can the administrator implement with minimal administrative effort to address these needs?

- A. Machine Creation Services input/output optimization
- **B. Citrix Provisioning**
- C. Personal vDisk
- D. Storage Area Network (SAN)

答案: B

問題 #52

Scenario: A Citrix Administrator needs to gather historical reporting statistics from the Virtual Delivery Agent (VDA) machines, as users are reporting latency and overall performance issues within their sessions. The administrator believes these issues are related to high CPU and memory usage. What can the administrator enable to gather this monitoring data from the VDA machines?

- A. Trends > Sessions within Citrix Director
- B. Trends > Machine Usage within Citrix Director
- C. Process Monitoring HDX policy in Citrix Studio
- **D. Resource Monitoring HDX policy in Citrix Studio**

答案: D

解題說明:

Enabling the Resource Monitoring HDX policy allows collection of CPU and memory utilization data from VDA machines. This data is then sent to Citrix Director for historical reporting, helping administrators analyze performance issues such as latency caused by high resource usage.

問題 #53

Scenario: A Citrix Administrator is investigating an issue in which a user's session does NOT successfully end after closing the last published application. The administrator used Task Manager to inspect the hanging session but could NOT find any relevant information. Which tool could the administrator use to get further details on orphaned processes in the session?

- A. Handle
- **B. Process Explorer**
- C. Regmon
- D. Procmon

答案： B

解題說明：

Process Explorer provides detailed insight into running processes, their parent-child relationships, and resource usage. It is the best tool to identify orphaned processes that prevent a Citrix session from ending after the last application is closed.

問題 #54

After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog.

Which two conditions can cause this to happen? (Choose two.)

- A. The version of Windows installed is Windows Server 2012 R2.
- B. The version of Windows installed uses Multiple Activation Key (MAK) licensing.
- C. The base image rearm count has been exceeded.
- D. The Microsoft License Server is unreachable.

答案： B,C

解題說明：

Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.

MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

問題 #55

.....

1Y0-205 認證題庫讓你順利高分甚至滿分通過 1Y0-205 考試，短時間取得應該取得 Citrix 證照。Fast2test 题库网承诺，只要使用本网站的题库去参加 1Y0-205 认证考试，我们确保你能一次通过 Citrix 的 1Y0-205 考试，否则退还购买题库的所有费用。同时，网站会根据考试认证厂商的动态变化而及时更新，确保 1Y0-205 题库始终是最新最全的。
