HCL-DOM-AADM-12 Latest Test Experience - 100% Excellent Questions Pool

Under the guidance of our HCL-DOM-AADM-12 preparation materials, you are able to be more productive and efficient, because we can provide tailor-made exam focus for different students, simplify the long and boring reference books by adding examples and diagrams and our experts will update HCL-DOM-AADM-12 Guide dumps on a daily basis to avoid the unchangeable matters. You can finish your daily task with our HCL-DOM-AADM-12 study materials more quickly and efficiently.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q23-Q28):

NEW QUESTION # 23

What is the purpose of the Server > Status tab in the Domino Administrator Client?

- A. To configure server security settings

- B. To display real-time server activity and task status
- C. To register new Domino servers
- D. To reset user passwords

Answer: B

Explanation:

The Server > Status tab is the primary interface for active server monitoring. It allows administrators to display real-time server activity, view the current list of running tasks (such as AdminP or Router), and observe the server console to verify that the environment is running correctly and efficiently.

NEW QUESTION # 24

What is the role of the Domino Domain Monitoring (DDM) feature?

- A. To replicate directory entries across domains
- B. To encrypt all SMTP mail messages
- C. To centralize event collection and monitoring across servers

Answer: C

Explanation:

Domino Domain Monitoring (DDM) is designed to give administrators a high-level view of the health of their entire infrastructure. Its primary role is to centralize event collection and monitoring across servers within a domain. By using specialized probes, DDM gathers status information from various servers and aggregates the data into a single database (ddm.nsf), allowing administrators to identify and resolve issues from one central location.

Here is the next batch of questions (51-60) from your provided list, strictly following the requested formatting and verified for the HCL-DOM-AADM-12 exam.

NEW QUESTION # 25

DAOS uses a catalog database named ____ to track attachment references across NSF files.

- A. daosrep.nsf
- B. daoslog.nsf
- C. daoscat.nsf
- D. daos.nsf

Answer: C

Explanation:

The Domino Attachment and Object Service (DAOS) relies on a specialized database called daoscat.nsf (the DAOS Catalog) to maintain its infrastructure. This catalog tracks every file attachment that has been moved out of an NSF file and into the central DAOS repository. It records the "reference count" for each attachment, ensuring that the system knows exactly which databases are using a specific attachment and preventing the deletion of files that are still in use by one or more users.

NEW QUESTION # 26

The AdminP task processes its queue from the ____ database.

- A. names.nsf
- B. admin4.nsf
- C. mail.box
- D. certlog.nsf

Answer: B

Explanation:

The Administration Process (AdminP) is an automated system for updating the Domino Directory and managing various server and database tasks throughout a domain. All administrative requests-such as user renames, deletions, or moves-are submitted as

"request notes" to the Administration Requests database (admin4.nsf) . The AdminP task on each server monitors this database, identifies tasks it needs to perform, and records the results of those actions back into the same database for the administrator to review.

NEW QUESTION # 27

What is the role of Domino Domain Monitoring (DDM)?

- A. Enforcing directory ACL policies
- B. Viewing cluster analysis
- C. Centralized collection and display of server events
- D. Archiving mail messages from all servers

Answer: C

Explanation:

Domino Domain Monitoring (DDM) provides a centralized collection and display of server events across an entire domain. It uses "probes" to check various subsystems (like Mail, Security, or Replication). When a probe finds an issue, it generates a report in the ddm.nsf database, allowing administrators to monitor the health of multiple servers from a single interface.

NEW QUESTION # 28

.....

The HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our HCL-DOM-AADM-12 exam torrent and then you can attend the exam. Among the people who prepare for the exam, many are office workers or the students. For the office worker, they are both busy in the job or their family; for the students, they possibly have to learn or do other things. But if they use our HCL-DOM-AADM-12 Test Prep, they won't need so much time to prepare the exam and master exam content in a short time. What they need to do is just to spare 1-2 hours to learn and practice every day and then pass the exam with HCL-DOM-AADM-12 test prep easily. It costs them little time and energy.
