Confluent Exam CCDAK Preview Reliable IT Certifications | CCDAK: Confluent Certified Developer for Apache Kafka Certification Examination

P.S. Free 2026 Confluent CCDAK dumps are available on Google Drive shared by Exam4Free: https://drive.google.com/open?id=1iKlYq9Eyth8UiHjRiLQFKAxc-vNWiXsF

Propulsion occurs when using our CCDAK preparation quiz. They can even broaden amplitude of your horizon in this line. Of course, knowledge will accrue to you from our CCDAK training guide. There is no inextricably problem within our CCDAK Learning Materials. Motivated by them downloaded from our website, more than 98 percent of clients conquered the difficulties. So can you as long as you buy our CCDAK exam braindumps.

The CCDAK Certification Exam is designed to test the skills and knowledge of developers who work with Apache Kafka to build scalable, real-time data processing applications. CCDAK exam covers a range of topics, including Kafka fundamentals, Kafka architecture, Kafka API, and Kafka streams. CCDAK exam is intended to help developers demonstrate their proficiency in working with Kafka and differentiate themselves in the job market.

Confluent CCDAK (Confluent Certified Developer for Apache Kafka Certification Examination) is a certification exam that validates a developer's knowledge and skills in building applications and solutions using Apache Kafka. CCDAK Exam is designed for developers who have experience in developing Kafka-based applications and want to demonstrate their proficiency in this technology. Confluent Certified Developer for Apache Kafka Certification Examination certification helps developers prove their expertise in Apache Kafka, which is a popular, open-source distributed streaming platform that is widely used in real-time data processing.

Quiz CCDAK - Confluent Certified Developer for Apache Kafka Certification Examination Useful Exam Preview

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, CCDAK study materials have been designed to serve most of the office workers who aim at getting an exam certification. With the popularization of wireless network, those who are about to take part in the CCDAK exam guide to use APP on the mobile devices as their learning tool, because as long as entering into an online environment, they can instantly open the learning material from their appliances. Our CCDAK Study Materials provide such version for you. The online test engine is a kind of online learning, you can enjoy the advantages of APP version of our CCDAK exam guide freely. Moreover, you actually only need to download the APP online for the first time and then you can have free access to our CCDAK exam questions in the offline condition if you don't clear cache.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q27-Q32):

NEW QUESTION # 27
You have a Kafka Connect cluster with multiple connectors.
One connector is not working as expected.
How can you find logs related to that specific connector?

- A. Make no change, there is no way to find logs other than by stopping all the other connectors.
- B. Modify the log4j.properties file to enable connector context.
- C. Modify the log4j.properties file to add a dedicated log appender for the connector.
- D. Change the log level to DEBUG to have connector context information in logs.

Answer: C

Explanation:
To isolate logs for a specific connector, you can configure a separate logger and appender in the Connect worker's
log4j.properties file, using the connector's name as the logging context.
From Kafka Connect Logging Docs:
"Kafka Connect loggers use hierarchical logger names. You can configure per-connector log levels and output files by extending
log4j.properties."
* A and C change verbosity but don't separate logs.
* D is false; targeted logging is possible.
Reference: Kafka Connect > Logging and Debugging

NEW QUESTION # 28
A consumer sends a request to commit offset 2000. There is a temporary communication problem, so the broker never gets the
request and therefore never responds. Meanwhile, the consumer processed another batch and successfully committed offset 3000.
What should you do?

- A. Use the kafka-consumer-group command to manually commit the offsets 2000 for the consumer group
- B. Restart the consumer
- C. Nothing
- D. Add a new consumer to the group

Answer: C

Explanation:
In this case, because the offset 3000 has been committed and all the messages between 0 and 3000 have all been processed, it is
okay not to have committed offset 2000. The right answer is to do "nothing", this behaviour is acceptable

NEW QUESTION # 29
Your Kafka cluster has five brokers. The topic t1 on the cluster has two partitions, and it has replication.factor
= 4, min.insync.replicas = 3.
You want to have strong durability guarantees for messages written to topic t1.
If you configure a producer 'acks=all', how many brokers need to acknowledge a message before it is considered committed?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

NEW QUESTION # 30
Which tool can you use to modify the replication factor of an existing topic?

- A. kafka-reassign-topics.sh
- B. kafka-recreate-topic.sh
- C. kafka-reassign-partitions.sh
- D. kafka-topics.sh

Answer: C

Explanation:
To change the replication factor of an existing topic, you must perform a partition reassignment, because the replication factor is not directly modifiable via kafka-topics.sh. The kafka-reassign-partitions.sh tool is the official command-line utility to handle partition reassignments, including changing the replication factor.
This tool allows you to generate a reassignment JSON specifying new replica assignments per partition and then apply it.
From official documentation:
"To change the replication factor, use the kafka-reassign-partitions tool to assign the partitions to more or fewer brokers." Neither kafka-topics.sh nor kafka-reassign-topics.sh exists for this purpose, and kafka-recreate-topic.sh is not an official Kafka tool.
Reference: Apache Kafka documentation > Operations > Changing Replication Factor

NEW QUESTION # 31
Which of the following is true regarding thread safety in the Java Kafka Clients?

- A. One Producer can be safely used in multiple threads
- B. One Consumer needs to run in one thread
- C. One Consumer can be safely used in multiple threads
- D. One Producer needs to be run in one thread

Answer: A,B

Explanation:
KafkaConsumer is not thread-safe, KafkaProducer is thread safe.

NEW QUESTION # 32
......

Exam4Free has created budget-friendly CCDAK study guides because the registration price for the Confluent certification exam is already high. You won't ever need to look up information in various books because our Confluent CCDAK Real Questions are created with that in mind. Additionally, in the event that the curriculum of Confluent changes, we provide free upgrades for up to three months.
