

# Up-To-Date And Verified Snowflake DAA-C01 Exam Questions For Preparation

P.S. Free 2026 Snowflake DAA-C01 dumps are available on Google Drive shared by PrepAwayTest:  
<https://drive.google.com/open?id=1MjbrY8hKnbzc85tkG7ip2GNG-ojjYgzo>

We are aimed to develop a long-lasting and reliable relationship with our customers who are willing to purchase our DAA-C01 study materials. To enhance the cooperation built on mutual-trust, we will renovate and update our system for free so that our customers can keep on practicing our DAA-C01 study materials without any extra fee. Meanwhile, to ensure that our customers have greater chance to pass the exam, we will make our DAA-C01 test training keeps pace with the digitized world that change with each passing day. In this way, our endeavor will facilitate your learning as you can gain the newest information on a daily basis and keep being informed of any changes in DAA-C01 test. Therefore, our customers can save their limited time and energy to stay focused on their study as we are in charge of the updating of our DAA-C01 test training. It is our privilege and responsibility to render a good service to our honorable customers.

Have similar features to the desktop-based exam simulator Contains actual Snowflake DAA-C01 practice test that will help you grasp every topic Compatible with every operating system. Does not require any special plugins to operate. Creates a DAA-C01 Exam atmosphere making candidates more confident. Keeps track of your progress with self-analysis and Points out mistakes at the end of every attempt.

## Exam DAA-C01 Cram Review | DAA-C01 Latest Exam Cram

Do you have registered for the Snowflake DAA-C01 exam and are worried about Snowflake DAA-C01 exam preparation? Try Snowflake DAA-C01 PDF Questions and practice tests which help you prepare the whole course in less duration. The Snowflake DAA-C01 practice test material gives you a clear idea to prepare for the Snowflake DAA-C01 Exam and saves you preparation time. An DAA-C01 exam is a time-based exam, and the candidate must be fast enough to solve the problems in a limited time.

## **Snowflake SnowPro Advanced: Data Analyst Certification Exam Sample Questions (Q16-Q21):**

### NEW QUESTION # 16

You are tasked with ingesting data from a variety of external sources (JSON, CSV, Parquet) into Snowflake to build a unified customer profile. The sources contain inconsistencies in data types, null handling, and naming conventions. Your goal is to create a robust ingestion pipeline that identifies data quality issues and prepares the data for analysis. Which combination of Snowflake features and approaches would be most effective for achieving this?

- A. Employ a third-party ETL tool integrated with Snowflake, configure data cleansing and transformation rules within the ETL tool, and load the transformed data into Snowflake using its optimized connectors.
- B. Use Snowpipe with schema evolution enabled and rely solely on Snowflake's automatic data type conversion. Implement data quality checks in downstream views.
- C. Leverage Snowflake's data governance features with data profiling, implement data quality rules in a data catalog, and use a combination of Snowpipe and COPY INTO with data transformations within the COPY INTO statement.
- D. Utilize Dynamic Tables with appropriate transformation logic defined to handle inconsistencies and maintain data quality during ingestion. Leverage Snowflake's data governance features in conjunction with Dynamic Tables for comprehensive data management
- E. Build a custom data ingestion application using the Snowflake Connector for Python, implementing complex data transformations and quality checks within the application before loading the data into Snowflake. Store raw data as is for future use.

**Answer: A,C,D,E**

Explanation:

Options B, C, D, and E represent robust approaches. B combines data governance and built-in transformations. C allows for custom logic using the Python connector. D uses a specialized ETL tool. E leverages Dynamic Tables for automated transformations and data quality maintenance. A is insufficient as it relies too heavily on automatic conversion and delays quality checks. The best approach would involve data profiling to understand the data, implementing data quality rules at the point of ingestion or through dynamic tables, and leveraging a transformation approach suited to the complexity of the transformations.

### NEW QUESTION # 17

What types of Snowflake functions are available for data analysis and manipulation? (Select all that apply)

- A. System functions
- B. Aggregate functions
- C. Complex functions
- D. Scalar functions

**Answer: A,B,D**

Explanation:

Snowflake functions include scalar, aggregate, and system functions for data analysis and manipulation.

### NEW QUESTION # 18

A Data Analyst executes a complex query. Which query will allow the Analyst to access the results a second time?

- A. `SELECT * FROM TABLE(INFORMATION_SCHEMA.QUERY_HISTORY());`
- B. `SELECT LAST_QUERY_ID(-1);`
- C. `SELECT * FROM TABLE(RESULT_SCAN(LAST_QUERY_ID()));`
- D. `DESC RESULT LAST_QUERY_ID();`

**Answer: C**

Explanation:

Snowflake provides a powerful feature called Result Caching. When a query is executed, the results are persisted for 24 hours. To access the result set of a previously executed query without re-running the heavy computation (and thus saving credits), a Data Analyst can use the RESULT\_SCAN table function.

The function RESULT\_SCAN requires a Query ID as its input. The most common way to programmatically retrieve the ID of the most recently executed statement in the current session is by using the LAST\_QUERY\_ID() function. By wrapping this in the TABLE() operator, Snowflake treats the cached results as a virtual table that can be queried, filtered, or even joined with other tables.

Evaluating the Options:

- \* Option B is incorrect because QUERY\_HISTORY returns metadata about queries (like start time, user, and status) but does not return the actual data records produced by those queries.
- \* Option C is incorrect as DESC (Describe) is used to see the columns and data types of an object, not to fetch its row data.
- \* Option D is incorrect; while LAST\_QUERY\_ID(-1) might successfully retrieve a string representing a previous ID in some contexts, it does not actually "access the results" or display the data.
- \* Option A is the 100% correct syntax. It is the standard method used by Data Analysts to perform post-processing on a large result set or to recover a result set if the worksheet was accidentally cleared. This is a key part of the Data Analysis domain, specifically regarding performance optimization and the utilization of Snowflake's unique caching layers.

#### NEW QUESTION # 19

When loading data into Snowflake using Snowsight, what functionalities does this method offer?  
(Select all that apply)

- A. Support for only structured data formats
- B. Streamlined data import from external/internal stages
- C. Batch data loading
- D. Real-time data loading

**Answer: B,C**

Explanation:

Snowsight supports batch data loading and streamlined data import from both external and internal stages.

#### NEW QUESTION # 20

How does incorporating visualizations in reports and dashboards aid in data comprehension for business use analyses?

- A. It limits data presentation to text, hindering analysis.
- B. Visualizations only impact data comprehension negatively.
- C. Visualizations enhance data comprehension for effective analysis.
- D. Presenting data visually doesn't impact business use analyses.

**Answer: C**

Explanation:

Visualizations enhance data comprehension, aiding effective analysis in business use scenarios.

#### NEW QUESTION # 21

.....

You may have gone through a lot of exams. Now if you go to the exam again, will you feel anxious? DAA-C01 study guide can help you solve this problem. When you are sure that you really need to obtain an internationally certified DAA-C01 certificate, please select our DAA-C01 exam questions. You must also realize that you really need to improve your strength. Our company has been developing in this field for many years.
