Microsoft Practice Exam are also available so the students can test their preparation with unlimited tries and pass Microsoft Power Platform Developer (PL-400) certification exam on the first try.

Microsoft Power Platform Developer Sample Questions (Q162-Q167):

NEW QUESTION # 162

A manufacturing company takes online orders.

The company requires automatic validation of order changes. Requirements are as follows:

- * If validation is successful, the order is submitted.
- * If exceptions are encountered, a message must be shown to the customer.

You need to set up and deploy a plug-in that encapsulates the rules.

Which options should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: PreValidation

PreValidation: For the initial operation, this stage will occur before the main system operation.

This provides an opportunity to include logic to cancel the operation before the database transaction.

Box 2: Synchronous

Ideally, you should only cancel operations using synchronous plug-ins registered in the PreValidation stage.

Box 3: Pre Image

Box 4: throw ..

When you throw an `InvalidPluginExecutionException` exception within a synchronous plug-in an error dialog with your message will be displayed to the user.

NEW QUESTION # 163

A client requires that the system send an email from a button on their customer contact form.

You need to call the action from JavaScript.

Which two functions achieve this result? Each correct presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. `Xrm.WebApi.online.execute()`
- B. `Xrm.WebApi.online.executeMultiple()`
- C. `Xrm.WebApi.online.createRecord()`
- D. `Xrm.WebApi.online.updateRecord()`

Answer: B,C

Explanation:

`Xrm.WebApi.online.executeMultiple` executes a collection of action, function, or CRUD operations.

`Xrm.WebApi.online.execute` executes a single action, function, or CRUD operation.

NEW QUESTION # 164

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company requires custom validation when users save form records that use a synchronous plug-in.

If validation fails, a message that explains how to resolve the issue must be displayed on the form to the user.

You need to implement the custom validation.

Solution: Throw a custom exception with the message.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION # 165

A company has a development environment and a production environment. The production environment has several third-party managed and unmanaged solutions that made changes to the Contact main form.

You create a new solution in the development environment. You add the Contact entity and the Contact main form to the solution.

You create a custom field on the Contact entity.

What happens when you perform these actions and import the solution into the production environment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:
