## Exam Pass Certify | Certification CCFA-200b Test Answers

CrowdStrike certification CCFA-200b exam is a test of IT professional knowledge. FreePdfDump is a website which can help you quickly pass CrowdStrike certification CCFA-200b exams. In order to pass CrowdStrike certification CCFA-200b exam, many people who attend CrowdStrike certification CCFA-200b exam have spent a lot of time and effort, or spend a lot of money to participate in the cram school. FreePdfDump is able to let you need to spend less time, money and effort to prepare for CrowdStrike Certification CCFA-200b Exam, which will offer you a targeted training. You only need about 20 hours training to pass the exam successfully.

### CrowdStrike CCFA-200b Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Host Management and Setup: This domain addresses filtering and organizing hosts, disabling detections and understanding their effects, managing Reduced Functionality Mode situations, locating inactive sensors and their retention, and utilizing relevant management reports.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Dashboards and Reports: This domain covers understanding different sensor report types and their use cases, and interpreting various audit logs for tracking platform activities.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Sensor Deployment: This domain focuses on verifying installation prerequisites, applying default policies and best practices, uninstalling sensors, and troubleshooting sensor issues across supported operating systems.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Workflows: This domain focuses on configuring automated workflows that execute predefined actions when specific triggers or conditions are met.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Policy Application: This domain encompasses configuring prevention policies for security posture, sensor update policies, RTR audit policies, containment policies with IP exclusions, and managing quarantined files.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Group Creation: This domain covers assigning endpoints to appropriate groups for policy application and following best practices for managing host group structures.</li></ul>

## Certification CCFA-200b Test Answers, CCFA-200b Reliable Test Vce

If you are nervous on your CCFA-200b exam for you always have the problem on the time-schedule or feeling lack of confidence on the condition that you go to the real exam room. Our Software version of CCFA-200b study materials will be your best assistant. With the advantage of simulating the real exam environment, you can get a wonderful study experience with our CCFA-200b Exam Prep as well as gain the best pass percentage.

### CrowdStrike Falcon Administrator Sample Questions (Q15-Q20):

#### NEW QUESTION # 15

What best describes the effect of disabling detections for a host?

- A. You cannot disable detections for a single host and are only able to prevent detections via allowlisting
- **B. Detections for the host are removed from the console immediately and no new detections display in the console going forward until re-enabled**
- C. Existing detections for the host remain, but no new detections will be presented in the console going forward until re-enabled
- D. Detections for the host are removed from the console immediately and cannot be restored unless the sensor is reinstalled

**Answer: B**

#### NEW QUESTION # 16

One of your development teams is working on code for a new enterprise application but Falcon continually flags the execution as a detection during testing. All development work is required to be stored on a file share in a folder called "devcode." What setting can you use to reduce false positives on this file path?

- **A. Machine Learning Exclusions**
- B. Firewall Rule Group
- C. USB Device Policy
- D. Containment Policy

**Answer: A**

Explanation:

Containment Policy, is a allowlist of IPs and CIDR networks allowed in the moment of a host containment. The Machine Learning Exclusions are the way to avoid the detections done it by Machine Learning based on files, so it is possible to exclude the detections for the requested folder with a GLOB expression.

#### NEW QUESTION # 17

What is the goal of a Network Containment Policy?

- A. Increase the aggressiveness of the assigned prevention policy
- **B. Limit the impact of a compromised host on the network**
- C. Partition a network for privacy
- D. Gain more visibility into network activities

**Answer: B**

Explanation:

The goal of a Network Containment Policy is to limit the impact of a compromised host on the network. This policy allows users to isolate a host from the network, while still allowing it to communicate with the Falcon Cloud and other essential services. This can help prevent further damage or data exfiltration from a compromised host. The other options are either incorrect or not related to the policy.

### NEW QUESTION # 18

Why would you assign hosts to a static group instead of a dynamic group?

- A. You are managing more than 1000 hosts
- B. You want the group to contain hosts from multiple operating systems
- **C. You do not want the group membership to change automatically**
- D. You need hosts to be automatically assigned to a group

**Answer: C**

Explanation:

The reason why you would assign hosts to a static group instead of a dynamic group is that you do not want the group membership to change automatically. A Static Group is a group that requires manual assignment or removal of hosts. A Static Group will not update its membership based on any criteria or filters. This way, you can have more control over which hosts belong to the group and prevent any unwanted changes.

### NEW QUESTION # 19

When performing targeted filtering for a host on the Host Management Page, which filter bar attribute is NOT case-sensitive?

- A. Username
- **B. Hostname**
- C. Domain
- D. Model

**Answer: B**

Explanation:

When performing targeted filtering for a host on the Host Management Page, the filter bar attribute that is not case-sensitive is Hostname. The Hostname attribute allows you to filter hosts by their computer name or DNS name. The Hostname filter is not case-sensitive, meaning that it will match hosts regardless of the capitalization of their names. For example, filtering by hostname=DESKTOP- 1234 will match hosts with names such as DESKTOP-1234, desktop-1234, or Desktop-12342.

### NEW QUESTION # 20

.....

Time is very important for everyone. As the saying goes, time is life so spend it wisely. We believe that you also don't want to spend much time on preparing for your CrowdStrike Falcon Administrator exam. How can you pass your exam and get your certificate in a short time? Our CCFA-200b exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our CrowdStrike Falcon Administrator exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our CCFA-200b Test Quiz, you will find it is very easy for you to pass your exam in a short time. You just need to spend 20-30 hours on studying; you will have more free time to do other things.
