No Chance of Failure with Cisco 350-601 Actual Exam Questions

People are very busy nowadays, so they want to make good use of their lunch time for preparing for their 350-601 exam. If you choose our 350-601 exam question as your study tool, you will not meet the problem. Because the app of our 350-601 exam prep supports practice offline in anytime. If you buy our products, you can also continue your study when you are in an offline state. You will not be affected by the unable state of the whole network. You can choose to use our 350-601 Exam Prep in anytime and anywhere

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q190-Q195):

NEW QUESTION # 190

A customer data center is configured for distribution of user roles, call home, and NTP. The data center was split into two geographically separate locations called DC1 and DC2. The requirement is for the user role configurations to be distributed in DC1 and for NTP and call home features to be constrained to DC2. Which two configuration sets must be used to meet these requirements? (Choose two.)

```

A. ! On Data Center 1
   configure terminal
   cfs 1
   roles
   aaa

B. ! On Data Center 1
   configure terminal
   cfs region 1
   ntp
   callhome

C. ! On Data Center 1
   configure terminal
   cfs 1
   ntp
   callhome

D. ! On Data Center 2
   configure terminal
   cfs region 2
   roles

E. ! On Data Center 2
   configure terminal
   cfs 2
   roles
   aaa

```

- A. Option B
- B. Option A
- C. Option C
- D. Option D
- E. Option E

Answer: C,D

Explanation:

This example shows how to move the Call Home application to CFS region 2:

```

switch# config t

switch(config)# cfs region 2

switch(config-cfs-region)# callhome

switch(config-cfs-region)# show cfs region name callhome

```

NEW QUESTION # 191

A UCS B- Series server located in B5108 chassis 1 slot 1 is currently unavailable. The server needs to be associated with a specific service profile when it becomes available. Which associate service profile option should be selected to accomplish this goal?

- A. server
- B. server pool
- C. restrict migration

- D. custom server

Answer: D

Explanation:

Explanation

https://www.cisco.com/en/US/docs/unified_computing/ucs/sw/gui/config/guide/141/UCSM_GUI_Configuration

Associating a Service Profile with a Server or Server Pool

Follow this procedure if you did not associate the service profile with a blade server or server pool when you created it, or to change the blade server or server pool with which a service profile is associated.

Procedure

Step 1 In the Navigation pane, click the Servers tab.

Step 2 On the Servers tab, expand Servers > Service Profiles.

Step 3 Expand the node for the organization that contains the service profile that you want to associate with a new server or server pool.

If the system does not include multi-tenancy, expand the root node.

Step 4 Right-click the service profile you want to associate with a server and select Change Service Profile Association.

Step 5 In the Associate Service Profile dialog box, select one of the following options:

Option	Description
Server Pool	Select a server pool from the drop-down list. Cisco UCS Manager assigns a server from this pool to the service profile. Continue with Step 7.
Server	Navigate to the desired available server in the navigation tree and select the server which will be assigned to the service profile. Continue with Step 7.
Custom Server	Specifies the chassis and slot that contains the server that will be assigned to the service profile. If the server is not in the slot or is otherwise unavailable, the service profile will be associated with the server when it becomes available. Continue with Step 6.

Step 6 If you chose Custom Server, do the following:

- In the Chassis Id field, enter the number of the chassis where the selected server is located.
- In the Server Id field, enter the number of the slot where the selected server is located.

NEW QUESTION # 192

The Cisco Nexus switch Generic Online Diagnostics policy for a PortLoopback test requires 10 consecutive failures to error disable the port. The customer wants to change it to 5 consecutive failures. Which configuration applies the changes for module 1 only?

```

● Nexus(config)# event manager applet custom-PortLoopback override __PortLoopback
Nexus(config-applet)# event gold mod all test PortLoopback testing-type bootup consecutive-failure 5
Nexus(config-applet)# action 1 publish-event

● Nexus(config)# event manager applet custom-PortLoopback override __PortLoopback
Nexus(config-applet)# event gold mod 1 test PortLoopback testing-type bootup consecutive-failure 5
Nexus(config-applet)# action 1 publish-event

● Nexus(config)# event manager applet custom-PortLoopback override __PortLoopback
Nexus(config-applet)# event gold mod all test PortLoopback testing-type monitoring consecutive-failure 5
Nexus(config-applet)# action 1 policy-default

● Nexus(config)# event manager applet custom-PortLoopback override __PortLoopback
Nexus(config-applet)# event gold mod 1 test PortLoopback testing-type monitoring consecutive-failure 5
Nexus(config-applet)# action 1 policy-default

```

- A. Option B
- B. Option A
- C. Option C
- D. Option D

Answer: D

Explanation:

Explanation

"mod all" is incorrect. "mod 1test" is incorrect. "publish event" is incorrect.

"mod 1 test" is correct. It is with "policy-default".

NEW QUESTION # 193

```
switch(config)# interface ethernet 1/1
switch(config-if)# switchport monitor
switch(config-if)# exit
switch(config)# monitor session 1
switch(config-monitor)# no shut
```

Refer to the exhibit. A network engineer must monitor the traffic from the server on VLAN 80.

All source traffic from the server must be captured on the monitoring device. Which configuration set meets these requirements?

```
switch(config-monitor)# destination interface ethernet 1/2
switch(config-monitor)# source vlan 80 rx

switch(config-monitor)# destination interface ethernet 1/2
switch(config-monitor)# filter vlan 80 rx tx

switch(config-monitor)# destination interface ethernet 1/1
switch(config-monitor)# filter vlan 80

switch(config-monitor)# destination interface ethernet 1/1
switch(config-monitor)# source vlan 80
```

- A. Option A
- B. Option C
- C. Option B
- D. Option D

Answer: C

NEW QUESTION # 194

Several production and development database servers exist in the same EPG and IP subnet. The IT security policy is to prevent connections between production and development. Which attribute must be used to assign the servers to different microsegments?

- A. Data center

- B. VM name
- C. VMM domain
- D. IP address

Answer: B

Explanation:

https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/3-x/virtualization/b_ACI_Virtualization_Guide_3_0_1/b_ACI_Virtualization_Guide_3_0_1_chapter_0100.html

Example: Microsegmentation with Cisco ACI Within a Single EPG or Multiple EPGs in the Same Tenant
 You might assign web servers to an EPG so that you can apply the similar policies. By default, all endpoints within an EPG can freely communicate with each other. However, if this web EPG contains a mix of production and development web servers, you might not want to allow communication between these different types of web servers. Microsegmentation with Cisco ACI allows you to create a new EPG and autoassign endpoints based on their VM name attribute, such as "Prod-xxxx" or "Dev-xxx".

NEW QUESTION # 195

.....

The moment you choose to go with our 350-601 study materials, your dream will be more clearly presented to you. Next, through my introduction, I hope you can have a deeper understanding of our 350-601 learning quiz. We really hope that our 350-601 Practice Engine will give you some help. In fact, our 350-601 exam questions have helped tens of thousands of our customers successfully achieve their certification.

Clear 350-601 Exam: <https://www.edudump.com/exams/Cisco/350-601/>

With 350-601 exam materials to pass the damn examination and get the great certification nothing can tie down you, heading towards success by 350-601 practice materials, Cisco Valid Test 350-601 Tips We stick to "credibility foundation, service innovation", Cisco Valid Test 350-601 Tips This is especially useful for intensive preparation and revision, Pass the Clear 350-601 Exam - Implementing Cisco Data Center Core Technologies (350-601 DCCOR) exam to establish your expertise in your field and receive certification.

Now my troubles are going To have troubles with me, Although it is 350-601 not difficult to notice that a stockbroker is churning if the frequency of trades is egregious, sometimes it is difficult to tell.
