**Answer: D**

#### NEW QUESTION # 171

A Network Operator is managing a campus network with multiple HPE Aruba Networking CX switches. To ensure the ability to roll back to a known-good state before making significant changes, a checkpoint of the running configuration is created using the command `copy running- config checkpoint pre-change-01`. After making several configuration changes related to VLANs and routing, the operator discovers that the changes have caused network instability. They need to revert the switch to the exact state it was in before the changes were made.

Which command should the operator use to immediately restore the switch's active configuration from the checkpoint?

- A. `copy startup-config running-config`
- B. **‘checkpoint rollback pre-change-01’**
- C. `erase startup-config` followed by a reboot
- D. `copy checkpoint pre-change-01 startup-config` followed by a reboot

**Answer: B**

#### NEW QUESTION # 172
