One of the most important functions of our 300-715 preparation questions are that can support almost all electronic equipment. If you want to prepare for your exam by the computer, you can buy our 300-715 training quiz. Of course, if you prefer to study by your mobile phone, our study materials also can meet your demand. You just need to download the online version of our 300-715 Preparation questions. We can promise that the online version will not let you down. We believe that you will benefit a lot from it if you buy our 300-715 study materials and pass the 300-715 exam easily.

Cisco 300-715 certification exam is a valuable credential for network security professionals who want to demonstrate their expertise in implementing and configuring Cisco ISE solutions. 300-715 exam covers a range of topics related to Cisco ISE deployment, network access policies, authentication, and device profiling. Passing the exam provides candidates with two certifications, CCNP Security and Cisco Certified Specialist - Identity Management Implementation, which are recognized globally and demonstrate proficiency in network security.

Cisco Identity Services Engine (ISE) is a comprehensive security policy management platform that provides secure access to network resources. The 300-715 Exam is designed to test the candidate's knowledge and understanding of the Cisco ISE platform, including features such as network access devices, endpoint compliance, guest access, and identity management. 300-715 exam also tests the candidate's ability to configure and deploy key ISE components such as Authentication and Authorization, Policy Sets, and Endpoint Identity Management.

300-715 Download Pdf - Latest 300-715 Exam Duration

The modern Cisco world is changing its dynamics at a fast pace. With the Cisco 300-715 certification, you can learn these changes and stay updated all the time. There are other countless Implementing and Configuring Cisco Identity Services Engine (300-715) certification exam benefits that you can gain after passing the exam. The prominent Implementing and Configuring Cisco Identity Services Engine (300-715) certification exam benefits are validation of skills, more career opportunity, salary increment, and the opportunity to become a member of the Cisco community.

Cisco Identity Services Engine (ISE) is a powerful network access control solution that enables IT professionals to enforce security policies across their organization's network infrastructure. The ISE solution provides authentication, authorization, and accounting (AAA) services for network devices, users, and applications. It also allows administrators to create and enforce policies based on user roles, device types, and network locations. The Cisco 300-715 Certification Exam is designed to test the skills and knowledge of IT professionals in implementing and configuring ISE solutions.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q213-Q218):

NEW QUESTION # 213

An engineer is configuring a posture policy for Windows 10 endpoints and wants to ensure that users in each AD group have different conditions to meet to be compliant.

What must be done to accomplish this task?

- A. Use the authorization policy within the policy set to group each AD group with their respective posture policy
- B. identify The users groups needed for different policies and create service conditions to map each one to its posture requirement
- C. Configure a simple condition for each AD group and use it in the posture policy for each use case
- D. Change the posture requirements to use an AD group for each use case then use those requirements in the posture policy

Answer: A

NEW QUESTION # 214

When creating a policy within Cisco ISE for network access control, the administrator wants to allow different access restrictions based upon the wireless SSID to which the device is connecting. Which policy condition must be used in order to accomplish this?

- A. Airespace Airespace-Wlan-Id CONTAINS <SSID Name>
- B. DEVICE Device Type CONTAINS <SSID Name>
- C. Radius Called-Station-ID CONTAINS <SSID Name>
- D. Network Access NetworkDeviceName CONTAINS <SSID Name>

Answer: D

NEW QUESTION # 215

A network security engineer needs to configure 802.1X port authentication to allow a single host to be authenticated for data and another single host to be authenticated for voice. Which command should the engineer run on the interface to accomplish this goal?

- A. authentication host-mode multi-host
- B. authentication host-mode multi-auth
- C. authentication host-mode multi-domain
- D. authentication host-mode single-host

Answer: C

NEW QUESTION # 216

Refer to the exhibit. An engineer is configuring the remote access VPN to use Cisco ISE for AAA and needs to conduct posture checks on the connecting endpoints. After the endpoint connects, it receives its initial authorization result and continues onto the compliance scan.

What must be done for this AAA configuration to allow compliant access to the network?

- A. Fix the CoA port number

- B. Ensure that authorization only mode is not enabled
- **C. Enable dynamic authorization within the AAA server group**
- D. Configure the posture authorization so it defaults to unknown status

Answer: C

Explanation:

RFC 3576 and its successor RFC 5176 defined a new enhancement to RADIUS known as Dynamic Authorization Extensions to RADIUS, more commonly called Change of Authorization (CoA).

NEW QUESTION # 217

Which two fields are available when creating an endpoint on the context visibility page of Cisco IS? (Choose two)

- **A. Policy Assignment**
- B. Security Group Tag
- C. Endpoint Family
- **D. Identity Group Assignment**
- E. IP Address

Answer: A,D

NEW QUESTION # 218
