## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Exam Training Torrent & C\_S4EWM\_2023 Online Test Engine & SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Free Pdf Study

Clients always wish that they can get immediate use after they buy our C\_S4EWM\_2023 test questions because their time to get prepared for the C\_S4EWM\_2023 exam is limited. Our C\_S4EWM\_2023 test torrent won't let the client wait for too much time and the client will receive the mails in 5-10 minutes sent by our system. Then the client can log in and use our software to learn immediately. It saves the client's time. And only studying with our C\_S4EWM\_2023 Exam Questions for 20 to 30 hours, you can confidently pass the C\_S4EWM\_2023 exam for sure.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q74-Q79):

### NEW QUESTION # 74

What is defined with the preparation time in the warehouse order creation rule?

- A. The time required by the wave for the creation process
- B. The time required by the resource until it reaches the storage type
- C. The time required by an employee to prepare the processing of the warehouse order
- D. The time required by the system for the picking strategy

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The preparation time in a warehouse order creation rule (WOCR) represents the time an employee needs to prepare for processing a warehouse order, such as gathering tools or reviewing instructions. Option D ("The time required by an employee to prepare the processing of the warehouse order") is correct, as defined in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Order > Define Creation Rules. Options A, B, and C are incorrect because preparation time doesn't relate to resource travel (A), system picking logic (B), or wave creation (C); those are handled by other settings like travel time or wave templates.

#### NEW QUESTION # 75

Which of the following are storage type roles? Note: There are 3 correct answers to this question.

- A. Identification Point
- B. Conveyor System
- C. Work Center in Staging Area Group
- D. Production Supply
- E. Deconsolidation

**Answer: A,C,D**

#### NEW QUESTION # 76

How do you control the physical inventory procedures which can be done in a specific part of the warehouse?

- A. You assign bins directly to the physical inventory area
- B. You define an activity area and assign this to the physical inventory area
- C. You define a queue and assign this to the physical inventory area
- D. You define a storage section and assign this to the physical inventory area.

**Answer: B**

Explanation:

To control physical inventory procedures for a specific part of the warehouse:

- \* C. Define an Activity Area and Assign It to the Physical Inventory Area:
- \* Activity areas group bins or storage sections for specific warehouse activities, such as physical inventory.
- \* Assigning the activity area to the physical inventory area restricts procedures to that section.

Incorrect Options:

- \* A: Queues manage task execution but are not used for physical inventory.
- \* B: Bins can be grouped, but assignment alone is insufficient.
- \* D: Storage sections define physical locations but are not directly linked to inventory areas.

References:

- \* SAP Help Portal: Physical Inventory Configuration
- \* SAP EWM Documentation: Activity Areas for Physical Inventory

#### NEW QUESTION # 77

What scenario can be controlled with the storage locations Received on Dock (ROD) and Available for Sale (AFS).

- A. Distinguish material that is in quality inspection from material that is unrestricted
- B. Distinguish material that is still in inbound processing from material that has reached the final bins
- C. Distinguish material quantities that are assigned to a sales order
- D. Distinguish material that belongs to the vendor from own stock

**Answer: B**

Explanation:

The Received on Dock (ROD) and Available for Sale (AFS) storage locations are used to manage stock in different stages of inbound processing. Specifically:

- \* D. Distinguish material that is still in inbound processing from material that has reached the final bins:
- \* ROD is used for materials that have been received but are still undergoing inbound processing (e.g., inspection, staging).
- \* AFS represents materials that have completed processing and are available for customer sales or allocation.

Incorrect Options:

- \* A: Quality inspection is controlled via stock types, not ROD and AFS.
- \* B: Vendor-owned stock is managed through special stock indicators.
- \* C: Sales order assignment is managed through specific stock categorizations, not ROD and AFS.

References:

- \* SAP Help Portal: Stock Segmentation Using ROD and AFS

### NEW QUESTION # 78

How can you configure the storage of products with a high risk of theft in a secured area of a warehouse? Note: There are 3 correct answers to this question.

- A. Configure a material staging area.
- B. Create a new putaway control indicator.
- C. Configure a storage type search sequence.
- D. Create a new storage type.
- E. Create a new storage bin type.

**Answer: C,D,E**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

To secure high-risk products, EWM allows configuration of restricted storage areas. Option A ("Create a new storage type") is correct because a dedicated storage type (e.g., "SECURE") can be defined with restricted access in SPRO: SCM Extended Warehouse Management > Master Data > Storage Types. Option D ("Configure a storage type search sequence") is correct as it ensures the system prioritizes the secure storage type for putaway, configured under SPRO: SCM Extended Warehouse Management > Goods Receipt Process > Storage Type Search Sequence. Option E ("Create a new storage bin type") is correct to define bins within the secure storage type, ensuring compatibility with product dimensions and security needs. Option B (putaway control indicator) influences putaway logic but isn't specific to security, and option C (material staging area) is unrelated to theft prevention.

### NEW QUESTION # 79

.....

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C\_S4EWM\_2023) prep material there is. The 3 kinds of SAP C\_S4EWM\_2023 preparation formats ensure that there are no lacking points in a student when he attempts the actual C\_S4EWM\_2023 exam. The SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C\_S4EWM\_2023) exam registration fee varies between 100\$ and 1000\$, and a candidate cannot risk wasting his time and money, thus we ensure your success if you study from the updated SAP C\_S4EWM\_2023 practice material. We offer the demo version of the actual SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C\_S4EWM\_2023) questions so that you may confirm the validity of the product before actually buying it, preventing any sort of regret.
