最新的 Amazon Foundational AWS-Certified-Cloud-Practitioner 免費考試真題 (Q463-Q468):

問題 #463

How can a company reduce its Total Cost of Ownership (TCO) using AWS?

- A. By having no operational expenditures
- **B. By having AWS manage applications**
- C. By minimizing large capital expenditures
- D. By having no responsibility for third-party license costs

答案: B

問題 #464

Which services can be used to deploy applications on AWS? (Select TWO.)

- A. AWS Config
- B. AWS Elastic Beanstalk
- C. Amazon Kinesis
- D. AWS OpsWorks
- Q D. AWS Application Discovery Service

答案: B,D

解題說明:

The services that can be used to deploy applications on AWS are:

AWS Elastic Beanstalk. This is a service that simplifies the deployment and management of web applications on AWS. Users can upload their application code and Elastic Beanstalk automatically handles the provisioning, scaling, load balancing, monitoring, and health checking of the resources needed to run the application. Users can also retain full control and access to the underlying resources and customize their configuration settings. Elastic Beanstalk supports multiple platforms, such as Java, .NET, PHP, Node.js, Python, Ruby, Go, and Docker. [AWS Elastic Beanstalk Overview] AWS Certified Cloud Practitioner - aws.amazon.com AWS OpsWorks. This is a service that provides configuration management and automation for AWS resources. Users can define the application architecture and the configuration of each resource using Chef or Puppet, which are popular open-source automation platforms. OpsWorks then automatically creates and configures the resources according to the user's specifications. OpsWorks also provides features such as auto scaling, monitoring, and integration with other AWS services. OpsWorks has two offerings: OpsWorks for Chef Automate and OpsWorks for Puppet Enterprise.
