PassTIP의 인지도는 고객님의께서 상상하는것보다 훨씬 높습니다. 많은 분들이PassTIP의 덤프공부가이드로 IT자격증 취득의 꿈을 이루었습니다. PassTIP에서 출시한 Microsoft인증 MD-102덤프는 IT인사들이 자격증 취득의 험난한 길에서 없어서는 안될중요한 존재입니다. PassTIP의 Microsoft인증 MD-102덤프를 한번 믿고 가보세요. 시험불합격시 덤프비용은 환불해드리니 밀져봐야 본전 아니겠습니까?

최신 Microsoft 365 Certified MD-102 무료 샘플문제 (Q318-Q323):

질문 # 318

Hotspot Question

You have 100 Windows 10 devices that are managed by using Microsoft Endpoint Manager.

You plan to sideload an app to the devices.

You need to configure Microsoft Endpoint Manager to enable sideloading.

Which device profile type and setting should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

정답:

설명:

Explanation:

Box 1: Device restrictions

In a Windows 10/11 device restrictions profile, most configurable settings are deployed at the device level using device groups.

Policies deployed to user groups apply to targeted users. The policies also apply to users who have an Intune license, and users that sign in to that device.

Box 2: Trusted app installation

Trusted app installation: Choose if non-Microsoft Store apps can be installed, also known as sideloading. Sideloading is installing, and then running or testing an app that isn't certified by the Microsoft Store. For example, an app that is internal to your company only.

질문 # 319

You have a Microsoft 365 E5 subscription that contains the devices shown in the following table.

All devices have Microsoft Edge installed.

From the Microsoft Intune admin center, you create a Microsoft Edge Baseline profile named Edge1.

You need to apply Edge1 to all the supported devices.

To which devices should you apply Edge1?

- A. Device1, Device2, and Device4 only
- **B. Device1 and Device2 only**
- C. Device1, Device2, Device3, and Device4
- D. Device1, Device2, and Device3 only
- E. Device1 only

정답: B

질문 # 320

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

You create a Conditional Access policy named CAPolicy1 that will block access to Microsoft Exchange Online from iOS devices.
You assign CAPolicy1 to Group1.
You discover that User1 can still connect to Exchange Online from an iOS device.
You need to ensure that CAPolicy1 is enforced.
What should you do?

- A. Add a condition in CAPolicy1 to filter for devices.
- **B. Assign CAPolicy1 to Group2.**
- C. Configure a new terms of use (TOU).
- D. Enable CAPolicy1

정답: B

설명:

Explanation

Common signals that Conditional Access can take in to account when making a policy decision include the following signals:

* User or group membership

Policies can be targeted to specific users and groups giving administrators fine-grained control over access.

* Device

Users with devices of specific platforms or marked with a specific state can be used when enforcing Conditional Access policies.

Use filters for devices to target policies to specific devices like privileged access workstations.

* Etc.

질문 # 321

You have a Microsoft 365 E5 subscription that contains two devices named Device1 and Device2.

You manage the devices by using Microsoft Intune.

You need to use Device query to meet the following requirements:

* Identify the Windows build on a device.

* Validate whether a folder exists on the C drive of a device.

Which table should you target for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

정답:

설명:

Explanation:

질문 # 322

You have computers that run Windows 10 and are managed by using Microsoft Intune.

Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1.

What should you configure in the device configuration profile?

- A. Microsoft Defender Application Guard
- B. Microsoft Defender Application Control
- **C. Microsoft Defender Exploit Guard**
- D. Microsoft Defender SmartScreen

정답: C

설명:

This is an ASR rule which is part of Exploit Guard
