To get success in the USGBC LEED-Green-Associate exam is not an easy task, it is quite difficult to pass it. But with proper planning, firm commitment, and It-Tests LEED-Green-Associate Questions, you can pass this milestone easily. It-Tests is a leading platform that offers real, valid, and updated USGBC LEED-Green-Associate Exam Dumps. With the It-Tests LEED Green Associate Exam (LEED-Green-Associate) Questions you can easily prepare well for the final USGBC LEED-Green-Associate exam and crack it easily.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.
Topic 2	<ul style="list-style-type: none">LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.
Topic 3	<ul style="list-style-type: none">Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.

Topic 4	<ul style="list-style-type: none"> Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.
Topic 5	<ul style="list-style-type: none"> Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
Topic 6	<ul style="list-style-type: none"> Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.

Quiz 2026 Authoritative LEED-Green-Associate: Discount LEED Green Associate Exam Code

There are quite a few candidates of LEED-Green-Associate certification exam have already started his career, and there are many examinees facing other challenges in life, so we provide candidates with the most efficient review method of LEED-Green-Associate exam. In order to let you be rest assured to purchase our products, we offer a variety of versions of the samples of LEED-Green-Associate Study Materials for your trial. We've helped countless examinees pass LEED-Green-Associate exam, so we hope you can realize the benefits of our software that bring to you.

USGBC LEED Green Associate Exam Sample Questions (Q289-Q294):

NEW QUESTION # 289

Which of the following demonstrates life-cycle approach to development or design?

- A. Renovating an existing building using recycled and salvaged building materials
- B. Designing a building envelope with the most advanced technology to maximize insulation values, regardless of what materials are used
- C. Purchasing and demolishing a 100-year-old apartment building to build a new, energy-efficient building
- D. Locating a new building in a dense district with a diversity of uses and plentiful transit routes

Answer: A

Explanation:

Explanation

Renovating an existing building using recycled and salvaged building materials is an example of a life-cycle approach to development or design. A life-cycle approach is an approach that considers the environmental impacts of a product or a project from cradle to grave, or from extraction of raw materials to disposal or reuse.

Renovating an existing building using recycled and salvaged building materials reduces the environmental impacts associated with new construction, such as land use change, resource depletion, energy consumption, waste generation, and greenhouse gas emissions.

The LEED Green Associate Candidate Handbook states that one of the intents of the Materials and Resources category is to "promote life-cycle assessment as a means of evaluating environmental impacts" [1, p. 15]. References: LEED Green Associate Candidate Handbook, [Life Cycle Assessment | U.S. Department of Energy]

NEW QUESTION # 290

Which of the following terms encourages team members to collaborate throughout the process of design and construction to create synergistic solutions?

- A. Integrative design
- B. Life-cycle analysis
- C. Charrette
- D. Triple bottom line

Answer: A

Explanation:

Integrative design is the term that encourages team members to collaborate throughout the process of design and construction to create synergistic solutions. Integrative design is an approach that considers the interrelationships among various building systems, environmental factors, and occupant needs, and seeks to optimize the performance, cost, and environmental benefits of the project. The LEED Green Associate Candidate Handbook states that one of the intents of the Integrative Process category is to "support high- performance, cost-effective project outcomes through an early analysis of the interrelationships among systems" [1, p. 12]. References: LEED Green Associate Candidate Handbook, [Integrative Design Process | Whole Building Design Guide]

NEW QUESTION # 291

What is the primary purpose of using low-emitting partitions in office buildings?

- A. To reduce CO₂ levels
- B. To reduce volatile organic compounds (VOCs) levels
- C. To increase spread of daylight
- D. To increase thermal comfort

Answer: B

Explanation:

Low-emitting materials, including partitions, are intended to:

"...reduce concentrations of chemical contaminants that can damage air quality, human health, productivity, and the environment." VOCs are a major indoor air contaminant addressed under the Indoor Environmental Quality category.

NEW QUESTION # 292

What occurs when light from a parking area spreads and surplus lighting spills beyond the project boundary?

- A. Provision of adequate lighting for the project
- B. Light trespass
- C. Decrease in stress to nocturnal animals
- D. Light division

Answer: B

Explanation:

Light trespass refers to surplus lighting that spills outside the project boundary, negatively impacting adjacent areas and wildlife.

LEED addresses this issue under Sustainable Sites credits for light pollution reduction.

NEW QUESTION # 293

Which impact category is weighted the most in the LEED rating systems?

- A. Human Health
- B. Biodiversity
- C. Climate Change
- D. Water Resources

Answer: C

Explanation:

Explanation

Climate change is weighted the most in the LEED rating systems because it is considered the most urgent and significant environmental challenge facing humanity. Climate change is caused by the accumulation of greenhouse gases in the atmosphere, which trap heat and alter the global climate patterns. Climate change can have severe consequences for human health, biodiversity, water resources, food security, and social equity.

LEED projects can help mitigate climate change by reducing greenhouse gas emissions from building operations and materials, as well as enhancing resilience and adaptation to climate impacts. The LEED impact categories and point allocation process assigns 35% of the total points to climate change. References: LEED v4 Impact Category and Point Allocation Process Overview2; LEED

NEW QUESTION # 294

.....

Although our company has designed the best and most suitable LEED-Green-Associate learn prep, we also do not stop our step to do research about the study materials. All experts and professors of our company have been trying their best to persist in innovate and developing the LEED-Green-Associate test training materials all the time in order to provide the best products for all people and keep competitive in the global market. We believe that the study materials will keep the top selling products. We sincerely hope that you can pay more attention to our LEED-Green-Associate study questions.
