Cybersecurity-Practitioner Free Brain Dumps - Latest Cybersecurity-Practitioner Exam Objectives

Now there are many IT training institutions which can provide you with Palo Alto Networks certification Cybersecurity-Practitioner exam related training material, but usually through these website examinees do not gain detailed material. Because the materials they provide are specialized for Palo Alto Networks Certification Cybersecurity-Practitioner Exam, so they didn't attract the examinee's attention.

Palo Alto Networks Cybersecurity Practitioner Sample Questions (Q139-Q144):

NEW QUESTION # 139

Which activity is a technique in the MITRE ATT&CK framework?

- A. Credential access
- B. Resource development
- C. Account discovery
- D. Lateral movement

Answer: C

Explanation:

Account discovery is a technique in the MITRE ATT&CK framework under the Discovery tactic. It involves adversaries attempting to identify user accounts on a system or network.

Credential access, lateral movement, and resource development are tactics - high-level objectives an attacker is trying to achieve.

NEW QUESTION # 140

Which type of Software as a Service (SaaS) application provides business benefits, is fast to deploy, requires minimal cost and is infinitely scalable?

- A. Secure
- B. Tolerated
- C. Benign
- **D. Sanctioned**

Answer: D

Explanation:

Sanctioned SaaS applications are those that are approved and supported by the organization's IT department. They provide business benefits such as increased productivity, collaboration, and efficiency. They are fast to deploy because they do not require installation or maintenance on the user's device. They require minimal cost because they are usually paid on a subscription or usage basis, and they do not incur hardware or software expenses. They are infinitely scalable because they can adjust to the changing needs and demands of the organization without affecting performance or availability¹². Reference: 8 Types of SaaS Solutions You Must Know About in 2024, What is SaaS (Software as a Service)? | SaaS Types | CDW, Palo Alto Networks Certified Cybersecurity Entry-level Technician

NEW QUESTION # 141

Which statement describes a host-based intrusion prevention system (HIPS)?

- A. It analyzes network traffic to detect unusual traffic flows and new malware.
- B. It scans a Wi-Fi network for unauthorized access and removes unauthorized devices.
- C. It is placed as a sensor to monitor all network traffic and scan for threats.
- **D. It is installed on an endpoint and inspects the device.**

Answer: D

Explanation:

A Host-Based Intrusion Prevention System (HIPS) is installed directly on an endpoint device (such as a server or workstation) and monitors local system activity, including processes, file access, and system calls, to detect and prevent malicious behavior.

NEW QUESTION # 142

Which two descriptions apply to an XDR solution? (Choose two.)

- A. It is designed for reporting on key metrics for cloud environments.
- B. It is focused on single-vector attacks on specific layers of defense.
- **C. It employs machine learning (ML) to identify threats.**
- **D. It ingests data from a wide spectrum of sources.**

Answer: C,D

Explanation:

XDR (Extended Detection and Response) uses machine learning (ML) to detect threats by identifying patterns and anomalies. XDR ingests data from multiple sources - including endpoints, networks, servers, and cloud workloads - to provide a unified and correlated view of threats across the environment.

NEW QUESTION # 143

Which term describes data packets that move in and out of the virtualized environment from the host network or a corresponding traditional data center?

- A. East-West traffic
- **B. North-South traffic**
- C. Intrazone traffic
- D. Interzone traffic

Answer: B

Explanation:

North-South traffic refers to the data packets that move between the virtualized environment and the external network, such as the internet or a traditional data center. This traffic typically involves requests from clients to access applications or services hosted on virtual machines (VMs) or containers, or responses from those VMs or containers to the clients. North-South traffic can also include management or monitoring traffic from external devices to the virtualized environment. Reference: Fundamentals of Cloud Security, East-West and North-South Traffic Security, What is the meaning / origin of the terms north-south and east-west traffic?

NEW QUESTION # 144

.....

We hope that you can use your time as much as possible for learning on the Cybersecurity-Practitioner practice questions.
