All the contents in CCOA training materials have three versions of APP, PC, and PDF. Buying CCOA exam torrent is equivalent to purchasing three books at the same time. That is other materials on the market that cannot satisfy you. If you buy a paper version of the material, it is difficult for you to create a test environment that is the same as the real test when you take a mock test, but CCOA exam questions provide you with a mock test system with timing and scoring functions, so that you will have the same feeling with that when you are sitting in the examination room. And if you buy the electronic version of the materials, it is difficult to draw marks on them, but CCOA Exam Questions provide you with a PDF version, so that you can print out the information, not only conducive to your mark, but also conducive to your memory of important knowledge. At the same time, any version of CCOA training materials will not limit the number of downloads simultaneous online users. NEW QUESTION # 88
Which ofthe following is a type of middleware used to manage distributed transactions?

- A. Message-oriented middleware
- B. Remote procedure call
- C. Object request broker
- D. Transaction processing monitor

Answer: D

Explanation:
ATransaction Processing Monitor (TPM)is a type of middleware that manages and coordinates distributed transactions across multiple systems.
* Core Functionality:Ensures data consistency and integrity during complex transactions that span various databases or applications.
* Transactional Integrity:Provides rollback and commit capabilities in case of errors or failures.
* Common Use Cases:Banking systems, online booking platforms, and financial applications.
Incorrect Options:
* A. Message-oriented middleware:Primarily used for asynchronous message processing, not transaction management.
* C. Remote procedure call (RPC):Facilitates communication between systems but does not manage transactions.

* D. Object request broker:Manages object communication but lacks transaction processing capabilities.
Exact Extract from CCOA Official Review Manual, 1st Edition:
Refer to Chapter 7, Section "Middleware Components," Subsection "Transaction Processing Middleware" - TPMs handle distributed transactions to ensure consistency across various systems.

NEW QUESTION # 89
Which of the following Is a control message associated with the Internet Control Message Protocol (ICMP)?

- A. Webserver Is available.
- B. 404 is not found.
- C. Destination is unreachable.
- D. Transport Layer Security (TLS) protocol version Is unsupported.

Answer: C

Explanation:
TheInternet Control Message Protocol (ICMP)is used forerror reporting and diagnosticsin IP networks.
* Control Messages:ICMP messages inform the sender about network issues, such as:
* Destination Unreachable:Indicates that the packet could not reach the intended destination.
* Echo Request/Reply:Used inpingto test connectivity.
* Time Exceeded:Indicates that a packet'sTTL (Time to Live)has expired.
* Common Usage:Troubleshooting network issues (e.g.,pingandtraceroute).
Other options analysis:
* A. TLS protocol version unsupported:Related to SSL/TLS, not ICMP.
* C. 404 not found:An HTTP status code, unrelated to ICMP.
* D. Webserver is available:A general statement, not an ICMP message.
CCOA Official Review Manual, 1st Edition References:
* Chapter 4: Network Protocols and ICMP:Discusses ICMP control messages.
* Chapter 7: Network Troubleshooting Techniques:Explains ICMP's role in diagnostics.

NEW QUESTION # 90
A small organization has identified a potential risk associated with its outdated backup system and has decided to implement a new cloud-based real-time backup system to reduce the likelihood of data loss. Which of the following risk responses has the organization chosen?

- A. Risk transfer
- B. Risk avoidance
- C. Risk acceptance
- D. Risk mitigation

Answer: D

Explanation:
The organization is implementing anew cloud-based real-time backup systemto reduce the likelihood of data loss, which is an example ofrisk mitigationbecause:
* Reducing Risk Impact:By upgrading from an outdated system, the organization minimizes the potential consequences of data loss.
* Implementing Controls:The new backup system is aproactive control measuredesigned to decrease the risk.
* Enhancing Recovery Capabilities:Real-time backups ensure that data remains intact and recoverable even in case of a failure.
Other options analysis:
* B. Risk avoidance:Involves eliminating the risk entirely, not just reducing it.
* C. Risk transfer:Typically involves shifting the risk to a third party (like insurance), not implementing technical controls.
* D. Risk acceptance:Involves acknowledging the risk without implementing changes.
CCOA Official Review Manual, 1st Edition References:
* Chapter 5: Risk Management:Clearly differentiates between mitigation, avoidance, transfer, and acceptance.
* Chapter 7: Backup and Recovery Planning:Discusses modern data protection strategies and their risk implications.

NEW QUESTION # 91

Most of the operational responsibility remains with the customerin which of the following cloudservice models?

- A. Software as a Service (SaaS)
- B. Data Platform as a Service (DPaaS)
- C. Infrastructure as a Service (IaaS)
- D. Platform as a Service (PaaS)

Answer: C

Explanation:
In theIaaS (Infrastructure as a Service)model, the majority of operational responsibilities remain with the customer.
* Customer Responsibilities:OS management, application updates, security configuration, data protection, and network controls.
* Provider Responsibilities:Hardware maintenance, virtualization, and network infrastructure.
* Flexibility:Customers have significant control over the operating environment, making them responsible for most security measures.
Incorrect Options:
* A. Data Platform as a Service (DPaaS):Managed data services where the provider handles database infrastructure.
* B. Software as a Service (SaaS):Provider manages almost all operational aspects.
* C. Platform as a Service (PaaS):Provider manages the platform; customers focus on application management.
Exact Extract from CCOA Official Review Manual, 1st Edition:
Refer to Chapter 3, Section "Cloud Service Models," Subsection "IaaS Responsibilities" - IaaS requires customers to manage most operational aspects, unlike PaaS or SaaS.
