So, you will understand how much you have improved or how much you need improvement for passing exam. The Salesforce Certified B2C Commerce Architect (B2C-Commerce-Architect) practice exam will also boost your time management skills.

Salesforce Certified B2C Commerce Architect Sample Questions (Q24-Q29):

NEW QUESTION # 24

A developer is checking for Cross Site Scripting (XSS) and found that the quick search is not escaped (allows inclusion of Javascript) in the following script:

How would the developer resolve this issue?

- A. Use `<isprint value="{searchPhrase} encoding-'jsblock' />`
- B. Use `<toprint value="{searchPhrase}" />`
- C. Replace ' with double Quote*
- D. Use `<isprint value="{searchPhrase} * encoding-'jshtrr' />`

Answer: D

Explanation:

To resolve the issue of Cross Site Scripting (XSS) where the quick search is not escaped, the developer should use the `<isprint>` tag with the `'jshtrr'` encoding option (Answer B). This method ensures that any JavaScript included in the search phrase is properly

escaped, preventing the execution of potentially malicious scripts.

The 'jshtml' encoding is specifically designed to encode text for HTML contexts where JavaScript is embedded, providing a secure way to handle user input in Salesforce B2C Commerce.

NEW QUESTION # 25

The Client wants to have a flash sale on a few products every day. These products are sold through B2C Commerce as well as an in-store Point of Sale system that is tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed will continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product's inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers

- A. The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.
- B. Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods
- C. If the external hosted web-service is unreliable. It could be a point of failure in the site's order placement flow.
- D. If the product inventory threshold that triggers the web service calls is reached too often. It will have a negative impact on site performance.

Answer: A,C

Explanation:

The risks associated with the proposed real-time inventory update solution during flash sales are:

Option A (The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic): This is a critical risk because high traffic during flash sales could exceed the rate limits set for the web-service, leading to exceptions and potentially failing to update inventory in real-time.

Option B (If the external hosted web-service is unreliable, it could be a point of failure in the site's order placement flow): Reliance on an external web-service for crucial operations like inventory updates introduces a risk of downtime or performance issues if the service is unreliable, directly impacting the ability to complete orders during peak sales periods.

Both risks could severely disrupt operations during critical sales events, suggesting a need for robust contingency plans and potentially reevaluating the solution architecture to ensure reliability.

NEW QUESTION # 26

Northern Trail Outfitters (NTO) wants to upgrade its customer service by providing the opportunity for customers to engage using social messaging channels such as Facebook, WhatsApp, and SMS to resolve issues and ask questions. They already use Marketing Cloud Mobile Connect and Social Studio. Alongside these, the Solution Architect also recommends implementing Digital Engagement features in Service Cloud.

Which two reasons should a Solution Architect use to justify those recommendations?

Choose 2 answers

- A. Mobile Connect only supports outbound messaging in selected countries
- B. Mobile Connect lacks integration with the service agent console without Digital Engagement
- C. Social Studio does not support 1:1 messaging on the apps listed in the scenario
- D. Social Studio is limited to listening to social channel and not responding

Answer: A,C

NEW QUESTION # 27

A company wants to integrate B2C Commerce and Marketing Cloud so that customers shopping online can be segmented for marketing campaigns like Abandoned Cart and Post Purchase Journeys.

Which two actions are needed to enable an Abandoned Cart Journey?

Choose 2 answers

- A. Implement the Marketing Cloud collect.js through the storefront by using the Connector's reference implementation
- B. Use Mulesoft to bring order and customer data feeds from B2C Commerce to Marketing Cloud
- C. Integrate product, order, and customer data feeds into Marketing Cloud Data Extensions

- D. Integrate product, order, and customer data feeds into Service Cloud objects

Answer: A,B

NEW QUESTION # 28

Given a website launched to production, the Architect can rely on several SFCC Business Manager tools that provide an automatic notification feature.

Which three tools have such a feature and do not require to be monitored manually?

Choose 3 answers

- A. Analytics Conversion Reports
- B. Quota Status
- C. Custom Log Settings
- D. Pipeline Profiler
- E. Job Schedules

Answer: A,B,E

NEW QUESTION # 29
