Free PDF Quiz 2026 VMware Authoritative 2V0-16.25: VMware vSphere Foundation 9.0 Administrator Reliable Learning Materials

Once the clients order our 2V0-16.25 cram training materials we will send the 2V0-16.25 exam questions quickly by mails. The clients abroad only need to fill in correct mails and then they get our 2V0-16.25 training guide conveniently. Our 2V0-16.25 cram training materials provide the version with the language domestically and the version with the foreign countries' language so that the clients at home and abroad can use our 2V0-16.25 Study Tool conveniently. And after study for 20 to 30 hours, you can pass the 2V0-16.25 exam with ease.

Free demo for 2V0-16.25 exam bootcamp is available, and you can have a try before buying, so that you can have a deeper understanding of what you are going to buy. In addition, 2V0-16.25 exam materials are high-quality and accuracy, and therefore you can use the exam materials with ease. In order to build up your confidence for 2V0-16.25 Exam Dumps, we are pass guarantee and money back guarantee, and if you fail to pass the exam, we will give you full refund. We have online and offline service for 2V0-16.25 exam brainudmps, and if you have any questions, you can consult us, and we will give you reply as quickly as we can.

2V0-16.25 practice braindumps & 2V0-16.25 test prep cram

You shall prepare yourself for the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam, take the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) practice exams well, and then attempt the final 2V0-16.25 test. So, start your journey by today, get the ITExamSimulator VMware vSphere Foundation 9.0 Administrator (2V0-16.25) study material, and study well. No one can keep you from rising as a star in the sky.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q50-Q55):

NEW QUESTION # 50
How does an administrator configure VMware Cloud Foundation (VCF) Operations for logs to send Notifications and Metrics to VCF Operations?

- A. Configure the Integration through VCF Operations for Logs.
- B. Launch the wizard from VCF Operations.
- C. Configure the Integrations through VCF Operations.
- D. Launch the wizard from VCF Operations for Logs.

Answer: C

Explanation:
To configureVMware Cloud Foundation (VCF) Operations for logsso that it can send notifications and metrics, administrators must use theIntegrations workflow inside VCF Operations.

* You configure integrations centrally from theAdministration > Integrationspage in VCF Operations.
* Here you add theVCF Operations for Logs data source, configure credentials, and set up Webhooks for alerts.
* Once integration is completed, VCF Operations for Logs data can be consumed in VCF Operations dashboards and used for notifications and metrics.
This process is not launched directly from "VCF Operations for Logs," but rather fromVCF Operations itself, where all integrations (vCenter, vSAN, NSX, and Logs) are centrally managed.

VMware Cloud Foundation 9.0.2 -Integrating Data Sources with VCF Operations VMware Cloud Foundation 9.0.3 -Configure VCF Operations for logs integration

NEW QUESTION # 51
The operations team is tasked with the preparation of a weekly health status overview of a VMware vSphere Foundation (VVF) environment to senior management with the following requirements:
* It should be sent every Monday morning.
* It must include KPIs related to cluster health, storage usage, and virtual machine (VM) growth trends.
* Operational overhead should be minimized.
Which two actions must the administrator perform to satisfy these requirements? (Choose two.)

- A. Create a custom View with the KPIs and add it to a new Report Template.
- B. Configure the scheduler to send the report via e-mail weekly.
- C. Create a custom dashboard with the required KPIs.
- D. Export the built-in Cluster Summary report via FTP.
- E. Export the desired metrics from the Metrics Explorer to CSV.

Answer: A,B

Explanation:
VMware vSphere Foundation (VVF) integrates VMware Aria Operations (vRealize Operations) for intelligent operations management, enabling automated reporting to minimize operational overhead. To meet the requirements for a weekly health status overview including cluster health, storage usage, and VM growth trends, an administrator must first create a custom View in Aria Operations to define the specific KPIs (e.g., cluster availability, datastore capacity, and VM count trends over time). This View is then added to a new Report Template, which compiles the data into a structured report format like PDF or CSV. Next, the scheduler in Aria Operations is configured to generate and email the report every Monday morning, ensuring delivery without manual intervention. This approach leverages built-in automation for recurring tasks, reducing effort compared to ad-hoc exports or manual configurations.
Other options do not fully satisfy the requirements: Option A creates a dashboard for interactive visualization but not a scheduled report; Option C uses a built-in report with limited customization and no direct FTP export or scheduling; Option E involves manual CSV exports from Metrics Explorer, increasing overhead and lacking automation.

NEW QUESTION # 52
An administrator is following the concept of least privilege and must configure permissions in a vSphere environment granting members of the group corp\VM-Managers the following abilities:
* Power on/off virtual machines
* Open consoles
* Create snapshots
Which out-of-the-box role satisfies these access control requirements?

- A. Virtual Machine Console User
- B. Virtual Machine User
- C. Administrator
- D. Virtual Machine Power User

Answer: D

Explanation:
The requirement is to followleast privilegewhile granting specific VM operations:
* Power on/off virtual machines
* Open consoles
* Create snapshots

TheVirtual Machine Power Userrole is the correct out-of-the-box role, as it includes all these privileges without granting unnecessary administrative access.
Other roles:
* Administrator (A):Grants full environment control # too broad.
* Virtual Machine Console User (B):Limited to console access, cannot power on/off or snapshot.
* Virtual Machine User (C):Can interact with VMs but lacks snapshot privileges.

NEW QUESTION # 53
An administrator is tasked to configure shared storage for a VMware vSphere Foundation (VVF) cluster at a remote location.
The following is available at the remote location:
* Two ESX servers.
* Two 1GbE network cards per ESX.
* One sixteen port 1GbE Switch.
* One NVMe per ESX for the Operating System.
* One storage system supporting network and fiber channel capabilities.
What storage protocol must the administrator use at the remote location?

- A. vSAN
- B. NFS
- C. Local Storage
- D. Fiber Channel

Answer: B

Explanation:
The scenario:
* Remote sitewith 2 ESXi servers, 1GbE networking only.
* Storage system supports both network (NAS/iSCSI/NFS) and Fiber Channel.
* Fiber Channel is not feasible (no FC switches/HBAs).
* vSAN requires more than 2 nodes (minimum 3 for standard vSAN, 2+Witness for 2-node), not mentioned here.
The most suitable solution:
* UseNFS storage over 1GbE. (D)
* Provides shared storage accessible to both ESXi hosts.
Other options:
* A. vSAN# Needs 3+ nodes or a witness, not supported in this config.
* B. Local storage# Not shared, fails HA/DRS requirements.
* C. Fiber Channel# Requires HBAs and FC switch, not available.

NEW QUESTION # 54
An administrator is tasked to optimize storage utilization in an existing VMware vSAN Original Storage Architecture (OSA) cluster.
The cluster has the following configuration:
* Eight-node cluster with 1 disk group per node.
* Virtual machines (VMs) are configured with 1 failure - RAID-1 storage policy.
* Storage utilization is at 70%.
Which action can the administrator take to reduce the existing storage utilization with the minimum impact to the cluster?

- A. Change the storage policy to 3 failure - RAID-1.
- B. Enable Compression only on the cluster.
- C. Enable Deduplication and Compression on the cluster.
- D. Change the storage policy to 2 failure - RAID-6.

Answer: D

Explanation:
In avSAN Original Storage Architecture (OSA)cluster, the choice of storage policy directly impacts storage efficiency and resilience:
* Current Setup:
* Eight-node cluster, 1 disk group per node.
* VMs are usingFTT=1 RAID-1 (mirroring)policy.
* Storage utilization is already at70%.
* RAID-1 (Mirroring):
* Each piece of data is mirrored, requiring2x storage capacity.
* Space efficiency ~50%.
* RAID-6 (Erasure Coding, FTT=2):
* Requires a minimum of6 hosts, satisfied here with 8.
* Uses erasure coding instead of full mirroring, giving ~67% space efficiency.
* Provides resilience against2 host failureswhile using less space than RAID-1.
Thus, switching fromRAID-1 FTT=1toRAID-6 FTT=2reduces overall storage utilization while still improving resilience.
Why not the other options?
* A. Enable Deduplication and Compression##In OSA, enabling this requires acluster-wide disk group reformat, which is disruptive and not the minimal impact choice.
* B. Change policy to 3 failure - RAID-1##Increases redundancy but consumesmuch more capacity, worsening utilization.
* C. Enable Compression only##Not available in OSA (only in ESA). OSA supportsdeduplication + compression together, not compression-only.
* D. Change to 2 failure - RAID-6##Meets resilience requirements,reduces storage usage, and is supported on 8-node OSA clusters.

VMware vSAN 9.0 Documentation -RAID-5/6 Erasure Coding requires 6+ hosts and improves space efficiency VMware vSAN Design Guide -RAID-1 vs RAID-5/6 efficiency and requirements VMware Cloud Foundation 9.0 Documentation -Changing storage policies triggers online reconfiguration without cluster-wide reformat

NEW QUESTION # 55
.....

The whole world of 2V0-16.25 preparation materials has changed so fast in the recent years because of the development of internet technology. We have benefited a lot from those changes. In order to keep pace with the development of the society, we also need to widen our knowledge. If you are a diligent person, we strongly advise you to try our 2V0-16.25 real test. You will be attracted greatly by our 2V0-16.25 practice engine. .

Valid 2V0-16.25 Test Practice: https://www.itexamsimulator.com/2V0-16.25-brain-dumps.html

ITExamSimulator provides 2V0-16.25 VCP-VVF Admin exam dumps to make you successful pass your test, VMware 2V0-16.25 Reliable Learning Materials To customers around the world, we share the totally common belief that is buying valuable products of great quality with less money, VMware 2V0-16.25 Reliable Learning Materials Our company makes much account of the protection for the privacy of our customers, since we will complete the transaction in the Internet, You may be surprised the diversity of our 2V0-16.25 actual prep dumps.

This closes the calendar pop-up, The submenu bar is explicit, telling you exactly which view and display type you are editing, ITExamSimulator provides 2V0-16.25 VCP-VVF Admin exam dumps to make you successful pass your test.

Quiz 2026 Marvelous VMware 2V0-16.25: VMware vSphere Foundation 9.0 Administrator Reliable Learning Materials

To customers around the world, we share the totally Valid 2V0-16.25 Test Practice common belief that is buying valuable products of great quality with less money, Our company makes much account of the protection 2V0-16.25 for the privacy of our customers, since we will complete the transaction in the Internet.

You may be surprised the diversity of our 2V0-16.25 actual prep dumps, We have engaged in this career for more than ten years and with our 2V0-16.25 exam questions, you will not only get aid 2V0-16.25 Exam Cram to gain your dreaming certification, but also you can enjoy the first-class service online.
