BONUS!!! Jpshiken NCP-MCAダンプの一部を無料でダウンロード: [https://drive.google.com/open?id=1iLQ6T5\\_cT9VzRIF-EYQ35cyyngfv9BGU](https://drive.google.com/open?id=1iLQ6T5_cT9VzRIF-EYQ35cyyngfv9BGU)

21世紀には、{Examcode}認定は受験者の特定の能力を表すため、社会でますます認知されるようになりました。ただし、{Examcode}認定を取得するには、NCP-MCA試験の準備に多くの時間を費やす必要があります。多くの人々は試験前のあらゆる種類の困難のためあきらめ、最終的に自己価値を高める機会を失いました。繁栄する多国籍企業として、私たちは常にこの問題の解決に取り組んでいます。たとえば、当社が開発したNCP-MCA学習エンジンはNCP-MCA試験を簡単かつ簡単にすることができ、自信を持ってこれを行ったと言えます。

## Nutanix NCP-MCA 認定試験の出題範囲:

| トピック   | 出題範囲                                                                                                                                                                                                                       |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| トピック 1 | <ul style="list-style-type: none"><li>• Create a blueprint to deploy infrastructure and applications using Calm</li><li>• Demonstrate an understanding of how to retire a managed application</li></ul>                    |
| トピック 2 | <ul style="list-style-type: none"><li>• Understand the typical causes of issues associated with automation</li><li>• Given an issue with Playbooks, locate troubleshooting data and collect the logs</li></ul>             |
| トピック 3 | <ul style="list-style-type: none"><li>• Demonstrate an understanding of how to create a Playbook by setting a trigger and defining actions</li><li>• Demonstrate an understanding of how to create Categories</li></ul>    |
| トピック 4 | <ul style="list-style-type: none"><li>• Given a Category and a blueprint, infer is a policy will be applied to a VM</li><li>• Describe and Differentiate Automation Concepts and Principles</li></ul>                      |
| トピック 5 | <ul style="list-style-type: none"><li>• Recall the requirements for setting up environments within Calm to deploy to various supported Clouds</li><li>• Demonstrate an understanding of event-driven Playbooks</li></ul>   |
| トピック 6 | <ul style="list-style-type: none"><li>• Demonstrate an understanding of how to correctly arrange Playbook steps using X-Plan</li><li>• Determine and apply the steps required to automate a given manual process</li></ul> |
| トピック 7 | <ul style="list-style-type: none"><li>• Demonstrate an understanding of Calm managed infrastructure and applications</li><li>• Demonstrate an understanding of how to create a Calm blueprint</li></ul>                    |
| トピック 8 | <ul style="list-style-type: none"><li>• Demonstrate an understanding of how to utilize Calm built-in macros within blueprints</li><li>• Determine how to use Calm to complete pre-provisioning step</li></ul>              |
| トピック 9 | <ul style="list-style-type: none"><li>• Demonstrate an understanding of prerequisites for Calm deployment</li><li>• Identify blueprint features to include authentication credentials in a cloudinit and sysprep</li></ul> |

Nutanix NCP-MCA認定試験は、候補者がマルチクラウドオートメーションとNutanixテクノロジーを深く理解する必要がある包括的な試験です。この試験は、90分以内に完了する必要がある60の複数選択質問で構成されています。試験に合格した候補者には、Nutanix NCP-MCA認定が授与されます。これは、Multicloud AutomationおよびNutanix Technologiesの専門知識の証です。

### 試験の準備方法-完璧なNCP-MCA資格認定試験-100%合格率のNCP-MCA最新対策問題

お客様に最高のサービスを提供するというコンセプトに沿って、当社は専任のサービスチームと成熟した思慮深いサービスシステムを構築しました。クライアントがNCP-MCAトレーニング資料を購入する前に無料トライアルを提供するだけでなく、販売後に相談サービスも提供します。クライアントがNCP-MCA認定ガイドについて体系的かつ的を絞った学習を行えるように、複数の機能を提供しています。したがって、クライアントは間違いなくNCP-MCA試験の教材を信頼できます。

### Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) 認定 NCP-MCA 試験問題 (Q25-Q30):

#### 質問 # 25

What is the correct method to upgrade Calm?

- A. Calm Dashboard
- B. LCM via Prism Element
- C. Calm Marketplace
- **D. LCM via Prism Central**

正解: D

#### 質問 # 26

A blueprint service needs to use scaling. The requirements are:

Windows 2019 VM (12 vCPU, 24 GB memory, 500 GB volume)

Minimum VMs needed at any time and at time of deployment is 2 VMs

VMs should not exceed the project quota of 100 vCPUs or 300 GB of memory There are no other services in use within the project Which scaling VM replica settings meet all requirements?

- A. MIN: 2, MAX: 10, Default: 1
- B. MIN: 2, MAX: 8, Default: 1
- **C. MIN: 2, MAX: 7, Default: 2**
- D. MIN: 2, MAX: 11, Default: 2

正解: C

解説:

Scaling VM replica settings allow you to specify the minimum, maximum, and default number of VMs that can be created from a blueprint service. The minimum and default values must be equal to or greater than the number of VMs needed at any time and at time of deployment, which is 2 in this case. The maximum value must be equal to or less than the project quota divided by the VM resources, which is  $100/12 = 8$  for vCPUs and  $300/24 = 12$  for memory. The lowest of these two values is the limit for the maximum value, which is 8. Therefore, the only option that meets all the requirements is B. MIN: 2, MAX: 7, Default: 2.

### 質問 # 27

Which role is required to create a playbook?

- A. Self-Service Admin
- B. Prism Viewer
- **C. Prism Admin**
- D. Developer

正解: C

解説:

Creating and managing Playbooks within the Intelligent Operations (X-Play) feature of Prism Central requires an administrative role with sufficient privileges to define system-wide automation rules.

\* Prism Admin: The Prism Admin (or Super Admin) role is explicitly required to create, edit, enable, and manage Playbooks. This role grants full control over the Intelligent Operations module.

\* Prism Viewer (A): This role has read-only access and can view Playbooks but cannot create or modify them.

\* Self-Service Admin (D): This role is specific to the Self-Service (Calm) application and its blueprints /projects, not the X-Play automation engine in Prism Central.

### 質問 # 28

Refer to the exhibit.

```

16 + FullyQualifiedErrorId : CouldNotMapNetworkDrive,Microsoft.PowerShell.Commands.NewPSDriveCommand
```

Calm encountered the error shown in the exhibit when importing a script that maps a network drive.

Upon further investigation, the Calm administrator was unable to run the script manually on a VM and discovered that elevated permissions were needed.

Which command should the administrator add to the script?

- A. Enable-WSManCredSSP -Role Client
- **B. Enable-WSManCredSSP -Role Server -Force**
- C. Enable-WSManCredSSP -Role Server
- D. Disable-WSManCredSSP -Role Server -Force

正解: B

### 質問 # 29

An administrator is tasked with making a newly-deployed Prism Central and its associated AHV clusters available to a Project. The administrator created the Nutanix provider account, verified it, added it to the Project, and whitelisted the clusters. Project users are reporting they are unable to deploy marketplace blueprints on the new infrastructure.

What should the administrator do?

- A. Make sure the provider service account credentials are correct.
- **B. Create a new environment in the Project using the new account.**
- C. Add the users to the Consumer role on the new account.
- D. Republish the blueprint to the marketplace.

正解: B

解説:

For users to successfully deploy Marketplace Blueprints to a specific infrastructure, the Project must have a configured Environment.

\* The Gap: Merely adding the Account and whitelisting the Cluster in the Project settings (the

"Infrastructure" tab) only authorizes access. It does not tell the Self-Service engine how to use that infrastructure (e.g., which Networks to attach, which Storage Containers to use, or what sizing policies to apply).

\* The Solution: The administrator must go to the Environmentstab within the Project and Create a New Environment mapped to the new Account and Cluster.

\* Marketplace Logic: Marketplace blueprints are typically "Environment Agnostic." When a user launches one, they are prompted to select a destination Environment. If no Environment exists for the new cluster, the user cannot select it as a target for deployment.
