SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management C-S4TM-2023 Prüfungsfragen mit Lösungen (Q21-Q26):

21. Frage

A carrier has an agreement with a shipper on January 1st, for fuel price as 5% of the base freight. Fuel surcharge is pegged to the current price of 3 USD a gallon. The fuel surcharge can change proportionally based on the fuel price on the pricing date. How will you define fuel surcharge calculation in SAP TM? Note: there are 2 correct answers to this question.

- A. Use a rate table for fuel surcharge with pricing date as a scale
- B. Use a rate table determination rule for fuel surcharge
- C. Use a calculation reference for the fuel surcharge charge item
- D. Use an index table for the fuel surcharge charge item

Antwort: C,D

22. Frage

The following settings are defined for a freight order from location A to location B with two freight units:

* The distance between locations A and B in the transportation lane is 1500 km, the duration is 19 hours and the Fix Transportation Duration flag is set. The average speed for the means of transport is defined as 100 km/h and the GIS quality flag is NOT set.

Loading and unloading of each freight unit at locations A and B is defined as 1 hour.

The vehicle resource is available weekdays from 8:00 am to 8:00 pm

* Loading starts on Monday at 8:30 am. When is unloading finished?

Please choose the correct answer.

- A. Tuesday 3:30 pm
- B. Tuesday 7:30 am
- C. Tuesday 5:30 pm
- D. Tuesday 7:30 pm

Antwort: D

23. Frage

Which of the following can you define for a means of transport?

There are 3 correct answers to this question.

- A. GIS quality
- B. Factory calendar
- C. Low speed
- D. Capacity
- E. Transportation mode

Antwort: A,C,E

24. Frage

What functionality is available with Basic Shipping in SAP S/4HANA Supply Chain for transportation management? Note: There are 3 correct answers to this question.

- A. Transportation planning based on sales orders
- B. Transportation planning based on forwarding orders
- C. Transportation execution without event management
- D. Transportation planning based on outbound deliveries
- E. Transportation planning based on inbound deliveries

Antwort: C,D,E

Begründung:

Basic Shipping in SAP S/4HANA Supply Chain for Transportation Management provides limited transportation management functionality compared to Advanced Shipping. According to the SAP documentation, the following features are available:

* Transportation execution without event management (A): Basic Shipping supports execution processes like freight order creation and carrier assignment but does not include event management capabilities.

* Transportation planning based on inbound deliveries (B): Basic Shipping allows planning for inbound deliveries, enabling transportation requirements to be managed for goods receipt.

* Transportation planning based on outbound deliveries (C): Basic Shipping supports planning for outbound deliveries, covering the shipping process from warehouses to customers.

The other options are incorrect:

* Transportation planning based on forwarding orders (D) is part of Advanced Shipping, typically used in logistics service provider scenarios.

* Transportation planning based on sales orders (E) is not directly supported in Basic Shipping, as sales orders trigger order-based transportation requirements in Advanced Shipping.

25. Frage

From which of the following transportation management documents can you trigger integration to SAP Extended Warehouse Management?

- A. Freight unit
- B. Package unit
- C. Freight order
- D. Consignment order

Antwort: C

Begründung:

Freight Order Management
