They strive to locate authentic and up-to-date Salesforce Experience-Cloud-Consultant Practice Questions for the Salesforce Experience-Cloud-Consultant exam, which is a tough ask.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q165-

Q170):

NEW QUESTION # 165

A manager at Ursa Major Solar is responsible for creating and editing only the community users for the Partner Community they have recently set up using Experience Cloud. However, the manager is able to make organizational changes to the user records of the internal users as well.

What could be the possible issue here?

- A. The manager has been given the Manage User permission.
- B. The manager has been given the Manage Customer Users permission.
- C. The manager has been given the Manage Profiles and Permission Sets permission.
- D. The manager has been given the Manage External Users permission.

Answer: A

Explanation:

This permission allows the manager to create, edit, and delete all users in the org, including internal users.

This permission overrides the sharing settings and role hierarchy that normally restrict access to user records. To limit the manager's access to only community users, the manager should be given the Manage External Users permission instead.

NEW QUESTION # 166

Dreamscape Flowers (DF) has a community for its flower growers. DF now wants to create communities for its franchisee network as well as direct B2C customers as part of a company-wide digital transformation. Other subsidiaries of DF are also undergoing digital transformation and are interested in setting up similar communities based on DF's approach.

In what two ways can Lightning Bolt help DF accomplish this?

Choose 2 answers

- A. Lightning Bolts can help reduce implementation time.
- B. Lightning Bolts can help organize, manage, and reuse digital content.
- C. Lightning Bolts can help minimize licensing and provisioning cost.
- D. Lightning Bolts can be distributed and reused.

Answer: A,D

Explanation:

Two ways that Lightning Bolt can help DF accomplish this are A and B. Lightning Bolt is a framework that allows you to create and distribute industry-specific solutions that include prebuilt themes, templates, pages, components, and business logic. By using Lightning Bolt, DF can create a solution for its flower business that includes all the features and functionality they need for their communities. They can then distribute and reuse this solution for their subsidiaries or other customers who want to set up similar communities. This can help reduce implementation time and ensure consistency and quality across different communities.

NEW QUESTION # 167

Universal Containers (UC) works with regional partners to sell localized products. UC is actively accepting new partner applications in certain regions. Partners can only apply using UC's referral program, and the application form in certain regions can potentially contain a varying degree of sensitive information. The list of existing partners must not be shared with the general public.

What should the Experience Cloud consultant recommend?

- A. Create a public site for existing partners and allow them to generate token-based referral links for prospect partners.
- B. Create a public site for prospect partners, show them a nondisclosure agreement, and allow them to fill out an application form on the site.
- C. Create an app for the Internal business development team and allow them to generate token-based referral links for existing partners in their region.
- D. Create an authenticated digital experience for partners and allow them to refer other partners in their region.

Answer: C

Explanation:

This option allows UC to control the access to the partner application form and ensure that only qualified partners can apply. Token-based referral links are unique and expire after a certain time, which adds an extra layer of security. Creating an app for the internal

team also allows UC to track the performance of the referral program and reward the existing partners accordingly1

NEW QUESTION # 168

How can records owned by Customer Community users be shared with internal users?

- A. Create a Sharing Set that includes a Customer Community profile and create a Share Group for the Sharing Set.
- B. Use the standard is Owned By External User checkbox on records to create a criteria-based sharing rule to share records owned by Customer Community users with all internal users.
- C. Create a Share Group for a Customer Community profile that is not associated with a Sharing Set.
- **D. Create an owner-based sharing rule to share records owned by a Customer Community role with all internal users.**

Answer: D

Explanation:

The administrator should create a digital experience for agents and share the URL with employees. A digital experience is a branded online destination that allows you to connect with your customers, partners, or employees. By creating a digital experience for agents, the administrator can provide them with a portal where they can view Knowledge articles and chat live with a support agent. By sharing the URL with employees, the administrator can allow them to access the digital experience as well.

NEW QUESTION # 169

Cloud Kicks has recently rolled out a new Experience Cloud site for its customers. The site has been activated and the contacts have been enabled as customer users. However, none of the users received their login credentials in an email.

What caused this issue?

- A. The roles were not enabled for the users.
- B. The sender's email address was changed and not verified.
- **C. The welcome emails were not enabled for the site.**
- D. The sender's email address was changed while it was pending verification.

Answer: C

NEW QUESTION # 170

.....
