NEW QUESTION # 27

Which statement about deploying VMs in a gateway subnet is true?

- A. VMs are automatically deployed in a gateway subnet
- B. VMs are required in a gateway subnet
- C. VMs are not allowed in a gateway subnet
- D. VMs can be deployed in a gateway subnet only after you deploy the VPN Gateway

Answer: C

Explanation:

Azure does not allow the deployment of virtual machines (VMs) in a gateway subnet. The gateway subnet is specifically reserved for Azure VPN Gateway or ExpressRoute Gateway instances, and deploying other resources in it can cause gateway deployment or operation failures.

NEW QUESTION # 28

Your organization is planning to deploy FortiWeb in Azure to provide a web application security solution to its web servers. One of the requirements is to have granular control of the number of vCPUs and memory assigned to this resource.

Which cloud model could meet this requirement?

- A. Infrastructure-as-a-Service (IaaS)
- B. Function-as-a-Service (FaaS)
- C. Platform-as-a-Service (PaaS)
- D. Software-as-a-Service (SaaS)

Answer: A

Explanation:

Infrastructure-as-a-Service (IaaS) allows you to deploy FortiWeb as a virtual machine in Azure, giving you granular control over vCPU and memory allocation. This model provides full flexibility over the compute resources and network configuration, which is essential for deploying and scaling security appliances like FortiWeb.

You are configuring an SDN connector for Azure on a FortiGate device. You completed all the required steps on the Azure side. While configuring the FortiGate side, you notice that you did not save the client secret used in the Azure App Registration. What is the quickest way to obtain the value of the client secret?

- A. Create a new app registration
- B. Create a new external connector for Azure
- C. Create a new resource group
- D. Create a new client secret

Answer: D

Explanation:

Azure does not allow you to view an existing client secret's value after creation for security reasons. If you did not save the client secret when it was first generated, the quickest and only option is to create a new client secret under the existing app registration and use the new value in your FortiGate configuration.
