As a brand in the field, our Plat-Dev-210 exam questions are famous for their different and effective advantages. Our professional experts have developed our Plat-Dev-210 study materials to the best. So if you buy them, you will find that our Plat-Dev-210 learning braindumps are simply unmatched in their utility and perfection. Our huge clientele is immensely satisfied with our product and the excellent passing rate of our Plat-Dev-210 simulating exam is the best evidence on it.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.

Topic 2	<ul style="list-style-type: none"> • Omniscritps: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 3	<ul style="list-style-type: none"> • Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.
Topic 4	<ul style="list-style-type: none"> • Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
Topic 5	<ul style="list-style-type: none"> • Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.

Plat-Dev-210 Updated Demo & Plat-Dev-210 Real Question

DumpsTorrent Plat-Dev-210 Questions have helped thousands of candidates to achieve their professional dreams. Our Salesforce Certified Omnistudio Developer (Plat-Dev-210) exam dumps are useful for preparation and a complete source of knowledge. If you are a full-time job holder and facing problems finding time to prepare for the Salesforce Certified Omnistudio Developer (Plat-Dev-210) exam questions, you shouldn't worry more about it.

Salesforce Certified Omnistudio Developer Sample Questions (Q44-Q49):

NEW QUESTION # 44

What should a developer's first step be when troubleshooting whether a DataRaptor Extract is retrieving data?

- A. Go to the Lightning Console and reload the page to test.
- B. Deactivate the card and layout, and go to the PREVIEW tab for the card to test.
- C. Add a key/value pair in the DataRaptor to test it.
- **D. Go to the PREVIEW tab In OmniScript to test.**

Answer: D

Explanation:

The PREVIEW tab in OmniScript allows the developer to test the DataRaptor Extract by providing a record ID and viewing the output data. This is a quick and easy way to troubleshoot whether the DataRaptor Extract is retrieving data correctly.

NEW QUESTION # 45

A developer is configuring a DataRaptor Load to Savecontract data. The developer needs to set the record type of the contact using DeveloperName.

Which two configuration actions should the developer take to set this up in the DataRaptor Load?

- A. Add Link to RecordType object in the Contact Object with the id field of RecordType object.

- B. Check is Lookup property when mapping the fields.
- C. Select RecordType in the Lookup Object list. ID in the Lookup Field list, and Development in the Lookup requested Field list.
- D. Select RecordType in the Lookup object list. Development in the lookup Field list, and ID in the Lookup Requested Field list.

Answer: B,D

Explanation:

A Set Values Action in a Value field and a Remote Action in an Additional Output value field can execute a function like CONCAT or DATEDIFF by using the syntax {{function(parameters)}}. For example, {{CONCAT('Hello', 'World')}} or {{DATEDIFF('2021-01-01', '2021-01-31')}}.

NEW QUESTION # 46

Refer to the exhibit below. A developer has configured an Integration Procedure element with SEND /RESPONSE TRANSFORMATIONS as shown.

Alternatively, how could the developer configure Additional Input to send exactly the same data? Assume that the developer checked Send Only Additional Input.

- A.

Key	Value
SecondaryAccount	{DRExtractAction:Account}
- B.

Key	Value
SecondaryAccount	DRExtractAction:Account
- C.

Key	Value
DRExtractAction:Account	SecondaryAccount
- D.

Key	Value
{DRExtractAction:Account}	SecondaryAccount

Answer: B

Explanation:

The Additional Input property allows the developer to specify additional input parameters to be sent to the Integration Procedure element. The input parameters can be specified as a JSON object or as a list of key- value pairs. If the developer checked Send Only Additional Input, then only the input parameters specified in Additional Input are sent, and the SEND/RESPONSE TRANSFORMATIONS are ignored. Therefore, the developer needs to specify the same input parameters as in the SEND/RESPONSE TRANSFORMATIONS in Additional Input. Option C shows how to do this using a JSON object with two properties: "DBExtractAction: Account" and "DBExtractAction:SecondaryAccount". The values of these properties are the same as in the SEND/RESPONSE TRANSFORMATIONS.

NEW QUESTION # 47

A developer needs to display read-only contact information in a OmniScript. The developer will format the information as a table, using merge codes to dynamically include first name, last name, street address, state, postal, code, and country from the data JSON. Which OmniScript element should the developer use to meet this requirement?

- A. Text area
- **B. Text Block**
- C. Rich text Area
- D. Edit Block

Answer: B

Explanation:

A Text Block element allows the developer to display read-only text in a table format, using merge codes to dynamically include data from the data JSON. A Rich Text Area element is used to display formatted text with images and links. A Text Area element is used to display editable text in a single line or multiple lines.

An Edit Block element is used to display editable fields in a form layout.

NEW QUESTION # 48

A developer needs to display the following information together on one FlexCard:

* Account name, address, phone number, website

* Primary contact first name, contact name, address, phone number, email The account information must always be visible, and the contact information should only be visible as needed by the user.

What approach should the developer use to display the contact information on the card?

- A. Use a conditional FlexCard State
- B. Use a Data table element
- C. Set the class " collapsible" on the block element
- **D. Set the collapsible property on the block element**

Answer: D

Explanation:

Setting the collapsible property on the block element allows the user to expand or collapse the block as needed. Using a Data table element is not suitable for displaying contact information. Setting the class " collapsible" on the block element has no effect. Using a conditional FlexCard State requires a condition to be met, not a user choice.

NEW QUESTION # 49

.....

To make sure your situation of passing the certificate efficiently, our Plat-Dev-210 practice materials are compiled by first-rank experts. So the proficiency of our team is unquestionable. They help you review and stay on track without wasting your precious time on useless things. They handpicked what the Plat-Dev-210 Study Guide usually tested in exam recent years and devoted their knowledge accumulated into these Plat-Dev-210 actual tests. We are on the same team, and it is our common wish to help your realize it. So good luck!
