

# Pass Guaranteed Cisco - Trustable 300-540 - Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Reliable Test Camp

What's more, part of that Itexamguide 300-540 dumps now are free: <https://drive.google.com/open?id=1qzagqMTcWsETRbt0L3DX2F1YBcI0hi3l>

Itexamguide has been on the top of the industry over 10 years with its high-quality 300-540 exam braindumps which own high passing rate up to 98 to 100 percent. Ranking the top of the similar industry, we are known worldwide by helping tens of thousands of exam candidates around the world pass the 300-540 Exam. To illustrate our 300-540 exam questions better, you can have an experimental look of them by downloading our demos freely.

## Cisco 300-540 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Virtualized Architecture: This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Cloud Interconnect: This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR</li> <li>• MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Service Assurance and Optimization: This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Security: This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.</li> </ul>

## 300-540 Latest Test Online & 300-540 Actual Exams

Many candidates failed exam before. They have no confidence for next exam and they also hesitate if they have to purchase valid 300-540 brain dumps materials or if dumps are actually valid. Now I advise you download our free demo before you are determined to buy. Our free demo is a little of the real test, you can see several questions answers and explanations. You will know the validity of Cisco 300-540 Brain Dumps materials.

## Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q120-Q125):

### NEW QUESTION # 120

What is used to protect against an API logic flaw?

- A. Data encryption in transit
- B. Data encryption at rest
- C. SSH encryption at rest
- D. Remediation of vulnerabilities

Answer: D

Explanation:

Comprehensive and Detailed Explanation

An API logic flaw is a weakness in the API's business logic- not in encryption or transport security. It occurs when:

- \* API functions are misused
- \* Business rules are bypassed
- \* Security validation is missing
- \* Workflow logic is incorrect

These issues cannot be solved through encryption (at rest or in transit). They require:

#Vulnerability remediation

#Fixing API code logic

#Updating API validation, flow control, and authentication logic

Thus the correct answer is C. Remediation of vulnerabilities.

#### NEW QUESTION # 121

Streaming telemetry with gRPC and gNMI is used for:

- A. Data encryption
- B. Physical network repairs
- C. Real-time network monitoring
- D. Reducing network traffic

**Answer: C**

#### NEW QUESTION # 122

SNMP traps are utilized for which of the following purposes?

- A. Sending unsolicited alerts from network devices to a management station
- B. Virtualizing network functions
- C. Encrypting data packets
- D. Monitoring network performance in real-time

**Answer: A**

#### NEW QUESTION # 123

An engineer must create a new VPC and deploy several Amazon EC2 instances in AWS. Only SSH connections originating from IP address 20.20.20.20 must be allowed to reach the EC2 instances. What must be configured?

- A. Access control list
- B. Security group
- C. Web application firewall
- D. Resource group

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation

AWS Security Groups act as the primary stateful firewalls for EC2 instances.

To restrict SSH (TCP/22) to a single host (20.20.20.20/32), a Security Group must be configured with:

- \* Inbound rule: TCP 22
- \* Source: 20.20.20.20/32

ACLs operate at the subnet level but are not used for instance-specific SSH restrictions.

WAF controls HTTP/HTTPS traffic, not SSH.

Resource groups only organize cloud assets.

Thus, B is the correct solution.

#### NEW QUESTION # 124

Which of the following is considered a virtualized Cisco platform?

- A. Cisco Catalyst
- **B. Cisco IOS XRv**
- C. Cisco Nexus
- D. Cisco Aironet

**Answer: B**

## NEW QUESTION # 125

.....

Itexamguide Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) PDF exam questions file is portable and accessible on laptops, tablets, and smartphones. This pdf contains test questions compiled by experts. Answers to these pdf questions are correct and cover each section of the examination. You can even use this format of Designing and Implementing Cisco Service Provider Cloud Network Infrastructure questions without restrictions of place and time. This Cisco 300-540 Pdf Format is printable to read real questions manually. We update our pdf questions collection regularly to match the updates of the Cisco 300-540 real exam.
